## Numbers A Further Autobiography:

*Life of J. F., ... in a brief autobiographical account, and further extended memoir. With numerous notes and illustrative engravings. [Edited] by E. Henderson* James FERGUSON (F.R.S.), 1867      **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1974      *Autobiographical Tales of 51 Greatest Philosophers* Muska Ayir, 2025-04-23

Autobiographical Tales of Greatest Philosophers invites readers into the intimate worlds of history's most influential thinkers through personal first person narratives. This unique approach allows philosophers like Nietzsche, Confucius, and Socrates to speak directly, sharing their thoughts, struggles, and triumphs as if in a personal conversation. Rather than presenting abstract theories, the book explores how each philosopher's life experiences shaped their ideas, making complex philosophies more relatable and accessible. Readers are drawn into the human side of these great minds, witnessing Nietzsche's existential pain, Confucius's challenges in turbulent times, and the inner journeys that forged their wisdom. Grounded in rigorous research yet written with warmth, the book paints each figure not just as a towering intellect but as a real person navigating life. By blending emotional storytelling with philosophical insight, this collection makes philosophy a deeply human endeavor and encourages readers to reflect on their own experiences through the lens of timeless wisdom.      Numbers Jakov Lind, 1972

Representation of Trait and Autobiographical Knowledge About the Self Thomas K. Srull, Robert S. Wyer, Jr., 2015-12-03

If there is one topic on which we all are experts it is ourselves. Psychologists depend upon this expertise as asking people questions about themselves is an important means by which they gather the data that provide much of the evidence for psychological theory. Personal recollections play an important role in clinical theorizing; people's thoughts, feelings, and beliefs provide the principal data for attitudinal research and judgments of one's traits and descriptions of one's goals and motivations are essential for the study of personality. Yet despite their long dependence on self-report data, psychologists know very little about this basic resource and the processes that govern it. In spite of the importance of the self as a concept in psychology, virtually no empirically tested representational models of self-knowledge can be found. Recently, however,

several theoretical accounts of the representation of self knowledge have been proposed These models have been concerned primarily with the factors underlying a particular type of self knowledge our trait conceptions of ourselves The models all share the starting assumption that the source of our knowledge of the traits that describe us is memory for our past behavior The lead article in this volume reviews the available models of the processes underlying trait self descriptiveness judgments Although these models appear quite different in their basic representational assumptions exemplar and abstraction models sometimes are difficult to distinguish experimentally Presenting a series of studies using several new techniques which the authors believe are effective for assessing whether people recruit specific exemplars or abstract trait summaries when making trait judgments about themselves they conclude that specific behavioral exemplars play a far smaller role in the representation of trait knowledge than previously has been assumed Finally the limitations of social cognition paradigms as methods for studying the representation of long term social knowledge are discussed and the implications of the research for both existing and future social psychological research are explored     *An autobiography* William Henry Seward,1891
