R. Corwin, 1993

Advanced Mathematics for Applied and Pure Sciences CF Chan Man Fong, D De Kee, 1998-01-13 Covers applicable mathematics that should provide a text at the third year level and beyond appropriate for both students of engineering and the pure sciences The book is a product of close collaboration between two mathematicians and an engineer and it is of note that the engineer has been helpful in pinpointing the problems engineering students usually encounter in books written by mathematicians Instead of just listing techniques and a few examples or providing a list of theorems along with their proofs it explains why the techniques work The emphasis is on helping the student develop an understanding of mathematics and its applications Handbook of Peridynamic Modeling Florin Bobaru, John T. Foster, Philippe H Geubelle, Stewart A.

Silling, 2016-11-03 This handbook covers the peridynamic modeling of failure and damage Peridynamics is a reformulation of continuum mechanics based on integration of interactions rather than spatial differentiation of displacements The book extends the classical theory of continuum mechanics to allow unguided modeling of crack propagation fracture in brittle quasi brittle and ductile materials autonomous transition from continuous damage fragmentation to fracture modeling of long range forces within a continuous body and multiscale coupling in a consistent mathematical framework *Splitting Methods in Communication, Imaging, Science, and Engineering* Roland Glowinski, Stanley J. Osher, Wotao Yin, 2017-01-05 This book is about computational methods based on operator splitting It consists of twenty three chapters written by recognized splitting method contributors and practitioners and covers a vast spectrum of topics and application areas including computational mechanics computational physics image processing wireless communication nonlinear optics and finance Therefore the book

presents very versatile aspects of splitting methods and their applications motivating the cross fertilization of ideas
