Nursing Home And Its Organizational Climate An Ethnography:

A Nursing Home and Its Organizational Climate Bonnie C. Farmer, 1996-06-18 Nursing home reform Professor Farmer asserts calls for increased emphasis upon issues related to life rather than care Organizational climate which reflects the nursing home's unique position to impact life issues provides a conceptual framework for effective interventions evaluations and ultimately meaningful reform The general atmosphere of most nursing homes remains overwhelmingly negative in spite of those few homes that are credited with excellence Professor Farmer believes that the concept of organizational climate holds promise for better understanding the complexities and impact of atmosphere in any one nursing home At the same time organizational climate as a concept is poorly understood There is a need to rethink the concept and return to the original notion of weather as its metaphor Farmer attempts this in her case study by describing organizational climate where it can best be captured Practitioners of long term care from the fields of administration gerontology nursing nutrition policy makers occupational and physical therapy social work and therapeutic recreation will find the insights of this study of great value as will graduate students scholars and others concerned with organizational studies and issues in gerontology

Ageing selves and everyday life in the north of England Cathrine Degnen, 2018-02-28 Seeking to explore what it means to grow older in contemporary Britain from the perspective of older people themselves this richly detailed ethnographic study engages in debates over selfhood and people's relationships with time Based on research conducted in a former coal mining village in South Yorkshire England Cathrine Degnen explores how the category of old age comes to be assigned and experienced in everyday life through multiple registers of interaction including that of social memory in a postindustrial context of great social transformation Challenging both the notion of a homogenous relationship with time across generations and the idea of a universalised middle aged self Degnen argues that the complex interplay of social cultural and physical attributes of ageing means that older people can come to have a different position in relation to time and to the self than younger people unseating normative conventions about narrative and temporality
