Nursing Informatics:

Introduction to Nursing Informatics Kathryn J. Hannah, Marion J. Ball, Margaret J.A. Edwards, 2013-04-17 This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons It does not attempt to compete with the primers already on the market Eminent international experts will edit author or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field Each book will be practical easy to use and well referenced Our aim is for the series to encompass all of the health professions by focusing on specific professions such as nursing in individual volumes However integrated computing systems are only one tool for improving communication among members of the health care team Therefore it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship Our joint values put people first If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients then our efforts will have succeeded

Computer literacy information management nursing taxonomies and standards Web based teaching strategies and the electronic patient record are some of the topics addressed in the text *Nursing Informatics* Marion J. Ball, Judith V. Douglas, Patricia Hinton Walker, Donna DuLong, Brian Gugerty, Kathryn J. Hannah, Joan Kiel, Susan K. Newbold, Joyce E. Sensmeier, Diane J. Skiba, Michelle R. Troseth, 2011-01-21 Like the three editions that preceded it this new edition targets markets in health care practice and educational settings It addresses practicing nurses and nursing students together with nursing leadership and nursing faculty It speaks to nursing informatics specialists and in a departure from earlier editions of this title to all nurses regardless of their specialty extending its usefulness as a text as noted below In recognition of the evolving electronic health information environment and of interdisciplinary health care teams the book is designed to be of interest to members of other health care professions quality officers administrators etc as well as health information technology professionals in health care facilities and in industry The book will include numerous relevant case studies to illustrate the theories and principles discussed making it an ideal candidate for use within nursing curricula both undergraduate and graduate as well as continuing education and staff development programs This book honors the format established by the first three editions by including a content array and questions to guide the reader This 4th edition also includes numerous brief case studies that help to illustrate the theories and practices described within the various chapters Most of these mini cases are provided by members of professional nursing organizations that comprise the TIGER Initiative These mini cases are listed in the front matter and highlighted via formatting throughout the text Book Only Dee McGonigle, Kathleen Mastrian, 2012 This book is the ideal student guide to the history of healthcare informatics current issues basic informatics concepts and health information management applications An Introduction to Nursing Informatics, Evolution, and Innovation Susan Murphy Houston, 2019 **An Introduction to Nursing Informatics** William N. Kelly, 2015-03-27 This book is the ideal gateway to all the professional possibilities this continuously evolving discipline has to offer Describing the evolution of nursing informatics from its origins to current practice in today's complex diverse healthcare environment this book offers the next generation of nurse informaticists a keen understanding of the discipline Essentials of Nursing Informatics Virginia K. Saba, Kathleen Ann McCormick, 2006 Learn how computers and technology affect the nurse's role in caring for the patient Now fully updated and enhanced the fourth edition includes new coverage of PDAs the impact of HIPAA guidelines patient safety issues privacy issues optimal use of decision support tools and much more **Nursing Informatics** Susan J. Grobe, Elly S. P. Pluyter-Wenting, 1994 Since 1985 the nursing profession has made significant progress in informatics The Fifth International Symposium on Nursing Informatics clearly showed that the nursing profession is well aware of the potential that computer technology holds for improving the quality and efficiency of health care if information systems are well designed integrated and professionally managed The structure of the Symposium and the organization of the papers in this volume represent the work of the Scientific Programme Committee and the editors In

addition to the scientific papers the editors have also included authors descriptions of panels posters and scientific demonstrations giving readers an excellent overview of the current state of the art of nursing informatics In order to encourage young colleagues to publish graduate students in nursing informatics submitted poster abstracts that are also included in the volume The Nursing Informatics Implementation Guide Eleanor Callahan Hunt,Sara Breckenridge Sproat,Rebecca Rutherford Kitzmiller,2013-03-09 Health institutions are investing in and fielding information technology solutions at an unprecedented pace With the recommendations from the Institute of Medicine around information technology solutions for patient safety mandates from industry groups such as Leapfrog about using information systems to improve health care and the move toward evidence based practice health institutions cannot afford to retain manual practices The installation of multi million dollar computerized health systems represents the very life blood of contemporary clinical operations and a crucial link to the financial viability of institutions Yet the implementation of health information systems is exceptionally complex expensive and often just plain messy The need for improvement in the art and science of systems implementation is clear up to 70 80% of information technology installations fail The reasons are multifaceted ranging from the complexity of the diverse workflows being computerized the intricate nature of health organizations the knowledge and skills of users to other reasons such as strategies for obtaining key executive support weaving through the politics peculiar to the institution and technical facets including the usability of systems Thus the art and science of successfully implementing systems remains deeply layered in elusiveness Still given the pervasiveness of system implementations and the importance of the outcomes this is a critical topic especially for nurses and informatics nurse specialists
