KIDD,2019 **Savage Childhood** Dudley Kidd,1906 *Savage Childhood* Dudley Kidd,2015-07-19 Excerpt from Savage Childhood A Study of Kafir Children The beginnings of things are always interesting and instructive The mind cannot rest until it reaches the beginning of a process We cannot fully understand the structure of an animal until we study the development of the embryo zoology and morphology are bound to start with embryology we cannot understand the mind of the adult until we study the development of the mind of the child psychology is bound to start with child study we cannot understand the social or religious life of civilised races until we study the development of the social and religious life of savage tribes sociology and theology are bound to start with ethnography finally we cannot understand the life of the savage until we study the childhood of the savage An immense amount of work has been done in all the initial stages referred to above except in the case of the childhood of the savage On applying to the London Library and to the Childhood Society I could not find any trace of an English book devoted to the subject About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Savage Childhood: a Study of Kafir Children ... With Illustrations, Etc** Dudley KIDD,1906 An Introduction to Childhood Heather Montgomery,2011-09-09 In An Introduction to Childhood Heather Montgomery examines the role children have played within anthropology how they have been studied by anthropologists and how they have been portrayed and analyzed in ethnographic monographs over the last one hundred and fifty years Offers a comprehensive overview of childhood from an anthropological perspective Draws upon a wide range of examples and evidence from different geographical areas and belief systems Synthesizes existing literature on the anthropology of childhood while providing a fresh perspective Engages students with illustrative ethnographies to illuminate key topics and themes The Neurologically-Impaired Child Robert A. Cummins,2018-10-03 For the 25 years before publication a form of therapy known as the Doman Delacato Techniques had been applied to children with disabilities The therapy originated from the work of Glen Doman and Carl Delacato who established the Institutes for the Achievement of Human Potential in Philadelphia The institutes claim to be able to treat a wide range of disabilities and their best known technique is called Patterning and is prescribed for children who have no capacity for voluntary movement Yet many professional bodies and associations have denounced the approach as overly expensive ineffective creating false hopes being destructive to family life and based on false theoretical assumptions Originally published in 1988 this book was the first to offer a detailed analysis

and critique of the Doman Delacato approach The author draws on data from evolution neuroanatomy and neurophysiology to challenge its theoretical assumptions He shows that there is no sound scientific basis to the techniques Any improvements in a child's condition can be attributed to the increased energy and attention given to that child rather than the content of the programme At the same time parents become emotionally ransomed and deluded by false expectations Written in a style that will be accessible to non specialists the book is an important work for both parents and professionals concerned with the welfare of neurologically impaired children

National Character in South African English Children's Literature Elwyn Jenkins, 2006-11-01 This is the first full length study of South African English youth literature to cover the entire period of its publication from the late nineteenth century to the early twenty first century Jenkins book focuses on what made the subsequent literature essentially South African and what aspects of the country and its society authors concentrated on What gives this book particular strength is its coverage of literature up to the 1960s which has until now received almost no scholarly attention Not only is this earlier literature a rewarding subject for study in itself but it also throws light on subsequent literary developments Another exceptional feature is that the book follows the author's previous

work in placing children's literature in the context of adult South African literature and South African cultural history e.g. cinema. He also makes enlightening comparisons with American, Canadian and Australian children's literature.

This is a book for parents which deals with principles rather than with problems or cases. It aims to help parents to think for themselves and does not undertake to present ready-made formulas for the training of children or prescriptions for use in various emergencies. It is not mere theory; however, most of its materials lie within the author's experience as parent and as teacher. Preface.
