Gardent,2020-03-20 Text production has many applications It is used for instance to generate dialogue turns from dialogue moves verbalise the content of knowledge bases or generate English sentences from rich linguistic representations such as dependency trees or abstract meaning representations Text production is also at work in text to text transformations such as sentence compression sentence fusion paraphrasing sentence or text simplification and text summarisation This book offers an overview of the fundamentals of neural models for text production In particular we elaborate on three main aspects of neural approaches to text production how sequential decoders learn to generate adequate text how encoders learn to produce better input representations and how neural generators account for task specific objectives Indeed each text production task raises a slightly different challenge e g how to take the dialogue context into account when producing a dialogue turn how to detect and merge relevant information when summarising a text or how to produce a well formed text that correctly captures the information contained in some input data in the case of data to text generation We outline the constraints specific to some of these tasks and examine how existing neural models account for them More generally this book considers text to text meaning to text and data to text transformations It aims to provide the audience with a basic knowledge of neural approaches to text production and a roadmap to get them started with the related work The book is mainly targeted at researchers graduate students and industrials interested in text production from different forms of inputs

**Appalachian Autumn** Marcia Bonta,2011-12-01 Like her popular Appalachian Spring Marcia Bonta s new book offers a day by day account of the changing world of nature in the mountains of central Pennsylvania This time she chronicles the

beauties of the autumn months as she walks the familiar roads and trails of her 500 acre mountain top farm noting the minute transformations of the season as well as the more dramatic ones But her quiet sojourn in the natural world is shattered by the intrusion of a lumberman who insists upon clear cutting a neighboring property The massive bulldozers and skidders crush every tree and shrub weed and wildflower leaving only rubble in their wake The Bontas become involved in a lawsuit challenging this violation of the land they love and seeking to protect their own property from the effects of the logging Autumn is a bittersweet time Bonta writes a season of good byes when after the flaming leaves fall and start the inevitable process of decay we are left with only the bare bones of nature Fleeing from the whine of chain saws and the crash of falling trees she roams the mountain top watching wild turkeys forage in the field flocks of migrating birds feast on wild grapes does and bucks eye each other in their mating ritual But she can never completely evade the insistent question What is the relationship between humans and nature Does ownership give one the right to do as one pleases with the land and all the flora and fauna living on it Does the natural world exists solely to satisfy mankind s desire for profit The answer is not simple it cannot be drawn in winter s black and white But the issues must be of concern to every thoughtful person Marcia Bonta s Appalachian Autumn offers a new voice in the ongoing debate
