**International Handbook of Development Economics** Amitava Krishna Dutt, Jaime Ros, 2008-01-01 The essays are concise yet comprehensive and each essay contains a substantial set of references which an interested researcher or student could follow up In addition to representing multidisciplinary interactions this collection encompasses several different perspectives within development economics so the reader can learn for example both about neoclassical approaches and dependency theories in the same volume This makes the collection unique and all the more valuable This is a very good reference collection as the individual essays are informative and provide a good overall perspective on the topic that they set out to address The extensive bibliography at the end of each essay adds further value to this collection Ashwini Deshpande Economic and Political Weekly These new volumes impress along two dimensions First they highlight important connections between economic development and variables such as culture warfare and ethnicity which are sometimes ignored by mainstream economists Second they analyze the economic development experience of

different regions such as Africa Latin America and East Asia a valuable reference for scholars and practitioners in the field Highly recommended H A Faruq Choice This two volume original reference work provides a comprehensive overview of development economics and comprises contributions by some of the leading scholars working in the field Authors are drawn from around the world and write on a wide range of topics After providing an introduction to the subject by examining issues like the meaning and measurement of development historical and interdisciplinary approaches empirical regularities and data problems the contributors provide a wealth of perspectives on and analyses of development economics They discuss alternative approaches to development the macroeconomics of growth factors and sources of economic development such as capital labor entrepreneurship resources and technology major sectors of concern such as agriculture industry services and the informal sector and international issues such as trade capital and labor flows and technology transfers Income distribution and poverty the state and other institutions and actual development experiences are explored The contributors provide analytical contributions as well as the relation between these contributions and real world and policy issues from a variety of alternative perspectives Scholars students policymakers and other development practitioners will all find this comprehensive reference invaluable

### **Digital Technologies to Implement the UN Sustainable Development Goals**

Walter Leal Filho,Sandeep Kautish,Tony Wall,Sonja Rewhorn,Sanjay Kumar Paul,2024-09-16 Against this background and in order to facilitate a broad discussion on the contribution of IT toward implementing the UN SDGs this book is being produced The book gathers inputs from universities enterprises and research organizations working on matters related to IT and sustainable development in a variety of contexts It also provides a platform for the dissemination of information on the latest initiatives paving the way for technology transfer and networking Last but not least a further aim of the book is to present methodological approaches and experiences deriving from case studies and projects which aims to show how IT may support sustainability efforts in a wide range of settings and contexts Digital technologies are now widely spread and the variety of tools and methods available today means that they can potentially useful in helping to achieve the United Nations Sustainable Development Goals UN SDGs However the gap between technological innovation and sustainable development applications is quite wide For instance it is unclear how artificial intelligence can be leveraged to tackle some of the world s biggest environmental challenges including climate change biodiversity and water management Also there is a need to highlight how innovative green technologies and their applications in areas such as renewable energy waste management and sustainable agriculture may be used and to showcase how technological innovation can lead to more sustainable production and consumption patterns

**The Elgar Companion to Social Economics, Second Edition** John B. Davis, Wilfred Dolfsma, 2015-05-29 Social economics is a dynamic and growing field that emphasizes the key roles social values play in the economy and economic life This second edition of the Elgar Companion to Social Economics revises all chapters from the first edition and adds important new chapters on *Global Cooperation and the Human Factor in International Relations* Dirk Messner, Silke Weinlich, 2015-12-14 This book aims to pave the way for a new interdisciplinary approach to global cooperation research It does so by bringing in disciplines whose insights about human behaviour might provide a crucial yet hitherto neglected foundation for understanding how and under which conditions global cooperation can succeed As the first profoundly interdisciplinary book dealing with global cooperation it provides the state of the art on human cooperation in selected disciplines evolutionary anthropology and biology decision sciences social psychology complex system sciences written by leading experts The book argues that scholars in the field of global governance should know and could learn from what other disciplines tell us about the capabilities and limits of humans to cooperate This new knowledge will generate food for thought and cause creative disturbances allowing us a different interpretation of the obstacles to cooperation observed in world politics today It also offers first accounts of interdisciplinary global cooperation research for instance by exploring the possibilities and consequences of global we identities by describing the basic cooperation mechanism that are valid across disciplines or by bringing an evolutionary perspective to diplomacy This book will be of great interest to scholars and postgraduates in International Relations Global Governance and International Development The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

**Handbook of International Negotiation** Mauro Galluccio, 2014-12-04 This book reinforces the foundation of a new field of studies and research in the intersection between social sciences and specifically between political science international relations diplomacy psychotherapy and social cognitive psychology It seeks to promote a coherent and comprehensive approach to international negotiation from a multidisciplinary viewpoint generating a longer term of studies researches and networking process that both respond to changes and differences in our societies and to the unprecedented demand and opportunities for international conflict prevention and resolution There is a need to increase cooperation coherence and efficiency of international negotiation It is necessary to focus our shared attention on new ways to better formulate integrated and sustainable negotiating strategies for conflict resolution This book acquires innovative relevance in and will impact on the new context of international challenges which do not have a one off solution that can be settled through a single target oriented negotiation process The book brings together leading scholars and researchers into the field from different disciplines diplomats politicians senior officials and even a Cardinal of the Holy See to give their contributions and make proposals on how best to optimize the use of negotiation and diplomacy structures tools and instruments However unlike most studies and researches on international negotiation this

book emphasizes processes not simply outcomes or even tools but the way in which tools are and can be used to achieve better outcomes in international reality based negotiation      Handbook Of The Fundamentals Of Financial Decision Making (In 2 Parts) Leonard C Maclean, William T Ziemba, 2013-05-10 This handbook in two parts covers key topics of the theory of financial decision making Some of the papers discuss real applications or case studies as well There are a number of new papers that have never been published before especially in Part II Part I is concerned with Decision Making Under Uncertainty This includes subsections on Arbitrage Utility Theory Risk Aversion and Static Portfolio Theory and Stochastic Dominance Part II is concerned with Dynamic Modeling that is the transition for static decision making to multiperiod decision making The analysis starts with Risk Measures and then discusses Dynamic Portfolio Theory Tactical Asset Allocation and Asset Liability Management Using Utility and Goal Based Consumption Investment Decision Models A comprehensive set of problems both computational and review and mind expanding with many unsolved problems are in an accompanying problems book The handbook plus the book of problems form a very strong set of materials for PhD and Masters courses both as the main or as supplementary text in finance theory financial decision making and portfolio theory For researchers it is a valuable resource being an up to date treatment of topics in the classic books on these topics by Johnathan Ingersoll in 1988 and William Ziemba and Raymond Vickson in 1975 updated 2nd edition published in 2006

*Capital for the Future* The World Bank, 2013-05-16 The gradual acceleration of growth in developing countries is a defining feature of the past two decades This acceleration came with major shifts in patterns of investment saving and capital flows This second volume in the Global Development Horizons series analyzes these shifts and explores how they may evolve through 2030 Average domestic saving in developing countries stood at 34 percent of their GDP in 2010 up from 24 percent in 1990 while their investment was around 33 percent of their GDP in 2012 up from 26 percent These trends in saving and investment along with higher growth rates in developing countries have resulted in developing countries share of global savings now standing at 46 percent nearly double the level of the 1990s The presence of developing countries on the global stage will continue to expand over the next two decades Analysis in this report projects that by 2030 China will account for 30 percent of global investment activity far and away the largest share of any single country while India and Brazil at 7 percent and 3 percent will account for shares comparable to those of the United States and Japan 11 percent and 5 percent The complex interaction among aging growth and financial deepening can be expected to result in a world where developing countries will contribute 62 of every 100 dollars of world saving in 2030 up from 45 dollars in 2010 and where they account for between 6 2 trillion and 13 trillion of global gross capital flows rising from 1 3 trillion in 2010 Trends in investment saving and capital flows through 2030 will affect economic conditions from the household level to the global macroeconomic level with implications not only for national policy makers but also for international institutions and policy coordination Policymakers preparing for this change will benefit from a better understanding of the unfolding dynamics of global capital

and wealth in the future This book is accompanied by a website <http://www.worldbank.org/CapitalForTheFuture> that includes a host of related electronic resources data sets underlying the two main scenarios presented in the report background papers technical appendixes interactive widgets with variations to some of the assumptions used in the projections and related audio and video resources

**Global Responsible Intergenerational Leadership** Julia M. Puaschunder, 2018-01-01 Today's grand policy dilemmas from climate change to over indebtedness to demographic shifts have momentous long term implications Future generations will be constrained by our present decisions to an extent that is without precedent in advanced capitalist democracies This book is an extensively researched and reasoned appeal in favor of intergenerational fairness the ability to provide to future generations an at least as favorable standard of living as that enjoyed today Intergenerational equity is an essential consideration in finding lasting solutions to the multifaceted crises of our time As an implicit contract and transfer between living and future generations intergenerational equity avoids discriminating against future generations The book aims to theoretically define intergenerational equity and to frame it as a natural behavioral law capturing human ethicality bounds It follows a long and distinguished tradition of scholarly discourse in turning to natural law for solutions to major social predicaments Outlining some of the causes of the current intergenerational imbalances regarding climate change and over indebtedness it sets the basis for understanding their drivers and implications A central proposition is that the natural human drive towards intergenerational fairness can be the basis for the necessary behavioral responses the human imbued moral compass of natural law can be a useful complement if not alternative to public policy

This book fills an important gap. Despite a resurgence of literature, the economic and social dimensions of intergenerational equity remain underexplored. Existing literature misses a holistic ethical framework of decision making failures that addresses intergenerational concerns. Whilst evolutionary grounded intergenerational fairness has not been recognized as a natural behavioral law, a human imbued drive being bound by human fallibility. Practical implications and recommendations in advancing an agenda for the advancement of intergenerational equity are provided. Attention is drawn to the problem of providing the required leadership to promote the idea of intergenerational equity as a guiding principle in corporate social and policy action. This book contributes both theoretical and practical insights and will be of interest to economists, sociologists, public policy makers and corporate executives tasked with tackling the most pressing contemporary challenges of mankind.

*Affective Determinants of Health Behavior* David M. Williams, Ryan E. Rhodes, Mark T. Conner, 2018-04-16. In the last 20-30 years, research on affective determinants of health behavior has proliferated. *Affective Determinants of Health Behavior* brings together this burgeoning area of research into a single volume and features contributions from leading experts in their respective areas. Editors David M. Williams, Ryan E. Rhodes, and Mark T. Conner, and their contributing authors, focus on a fascinating range of affective concepts including, but not limited to, hedonic response, incidental affect, perceived satisfaction, anticipated affect, affective attitudes, and affective associations. In the first part of the book, the role of affective concepts in multiple theories of health behavior is highlighted and expanded, including theories of action control, dual processing, temporal self-regulation, self-determination, and planned behavior, along with a new theory of hedonic motivation. The second part of the book focuses on the role of affective concepts in specific health behavior domains, including physical activity, eating, smoking, substance use, sex, tanning, blood donation, the performance of health professionals, cancer screenings, and cancer control. *Affective Determinants of Health Behavior* offers readers an important window into existing research and serves as a showcase for important insights on possible new directions and implications for intervention.
