Remembering The Manhattan Project - Perspectives On The Making Of The Atomic Bomb & Its Legacy Cynthia C Kelly, 2005-01-27 During World War II nations raced to construct the world's first nuclear weapon that would determine the future of the world. The Manhattan Project, one of the most significant achievements of the 20th century, was the culmination of America's war effort. Today, although the issue of nuclear weapons frequently dominates world politics, few are aware of the history behind its development. Part I of this book, comprised of papers from the Atomic Heritage Foundation's Symposium on the Manhattan Project, recounts the history of this remarkable effort and reflects upon its legacy. Most of the original structures of the Manhattan Project have been inaccessible to the public and in recent years have been stripped of their equipment and slated for demolition. Part II proposes a strategy for preserving these historical artifacts for the public and future generations. This book has been selected for coverage in Index to Scientific Technical Proceedings, ISTP CDROM version, ISI Proceedings, Index to Social Sciences Humanities Proceedings, ISSHP, ISI Proceedings, Index to Social Sciences Humanities Proceedings, ISSHP CDROM version, ISI Proceedings, CC Proceedings, Engineering Physical Sciences.

War Beyond the Battlefield David Grondin, 2013-09-13 In an effort to make sense of war beyond the battlefield in studying the wars that were captured under the rubric of the War on Terror, this special issue book seeks to explore the complex spatial relationships between war and the spaces that one is not used to thinking of as the battlefield. It focuses on the conflicts that still animate the spaces and places where violence has been launched and that the war has not left untouched. In focusing on war beyond the battlefield, it is not that the battlefield as the place where war is waged has gone in smoke or has borne out of importance; it is rather the case that the battlefield has been displaced, re-designed, re-shaped and rethought through new spatializing practices of warfare. These new spaces of war, new in the sense that they are not traditionally thought of as spaces where war takes place or is brought to, are television screens, cellular phones, and bandwidth. George W. Bush's ranch in Crawford, Texas, videogames, popular culture sites, news media, blogs, and so on. These spaces of war beyond the battlefield are crucial to understanding what goes on the battlefield in Iraq, Afghanistan, or in other fronts of the War on Terror, such as the homeland.
