Temporal Experience Giuliano Torrenco, 2024-09-19 Many physical theories suggest that time does not pass yet temporality deeply permeates our experience We perceive change and movement we are aware of living in the present of the constant flux of our sensations and thoughts and of time itself flowing In Temporal Experience Torrenco considers the core facts of temporal experience and their interconnections ultimately defending the atomist dynamic model of temporal experience The book critically examines prevalent theories of experience of change succession and passage of time both in philosophy and psychology Each chapter contributes to the construction of the atomist dynamic model Experience of change and movement are explained through mental events that present virtually instantaneous movement and change Torrenco challenges the common belief in the perception of presentness and proposes an error theory based on narrative cognition The experience of succession is elucidated through the concept of an overarching phenomenology arguing against the tendency to overstate the phenomenal continuity of experience Finally the experience of the passage of time is approached through the non representationalist theory of the phenomenal modifier and the book concludes by discussing the surprising consequences of applying the experiential model defended to the scientific image of our existence in time as a sequence of physical events

The 13

Principles of Faith Moses Maimonides, 2009 Rambam Maimonides 1135-1204 is revered as one of the greatest Jewish scholars who ever lived. Among his vast contributions to Jewish scholarship is a series of thirteen core beliefs of Judaism. The brevity of this credo belies the depth of the ideas it represents. Now Kol Menachem presents an extensive work of scholarship that will elucidate these principles for all those interested in the heart of Jewish belief. Organized into a sequence of user-friendly lessons, this series takes the reader on a journey through more than 150 traditional sources that influenced these beliefs through the ages. Added to this is the Toras Menachem commentary on the Principles culled from the Lubavitcher Rebbe's extensive lectures and writings.

What are the similarities and differences between `Pointers` and `References`? `Pointers` and `Arrays`? `Constructors` and `Copy Constructors`? `Nested` and `Local Inner Classes`? Why is `Multiple Interface Inheritance` seen to be beautiful but `Multiple Implementation Inheritance` considered evil? When is `Polymorphism` `Static` or `Dynamic`? `Bounded` or `Unbounded`? Answers on these questions and much more are explained in this book. *Cybernetics in C*: What makes this text so different and appealing in comparison to existing books on the market? The Bulleted style, as opposed to Prose, produces results much faster, both in learning and reference. Rules of Thumb and further expert Tips are given throughout in how to optimise your code. The Prospective Evils sections tell you what to avoid. Literature and the Brain Norman Norwood Holland, 2009 LITERATURE AND THE BRAIN goes straight to the human core of literature when it explains the different ways our brains convert stories, poems, plays, and films into pleasure. When we are deep into a film or book, we find ourselves absorbed, unaware of our bodies or our surroundings. We don't doubt the existence of Spider-Man or Harry Potter, and we have real feelings about these purely imaginary beings. Our brains are behaving oddly because we know we cannot act to change what we are seeing. This is only one of the special ways our brains behave, with literature ways that LITERATURE AND THE BRAIN reveals. 474 pp, 13 ill.
