A scientific exploration of the advanced ancient civilization known as Doggerland or Fairland that disappeared 5,000 years ago. Looks at the latest archaeological and scientific evidence preserved beneath the North Sea and on the tiny island of Fair Isle. Examines Doggerland's sophisticated technology, including how its people were able to melt solid rock to create vitrified structures far stronger than concrete. Shows how the survivors of the destruction of Doggerland sailed to the British Isles and established the megalithic culture that built Stonehenge. New marine archaeological evidence has revealed the remains of a large landmass to the north of Britain that hosted an advanced civilization 1,000 years before the recognized first
