Lost Knowledge Confronting The Threat Of An Aging Workforce

Marius Leibold, Sven C. Voelpel

Lost Knowledge Confronting The Threat Of An Aging Workforce:

Lost Knowledge David W. DeLong, 2004-09-09 Executives today recognize that their firms face a wave of retirements over the next decade as the baby boomers hit retirement age At the other end of the talent pipeline the younger workforce is developing a different set of values and expectations which creates new recruiting and employee retention issues The evolution from an older traditional highly experienced workforce to a younger more mobile employee base poses significant challenges particularly when considered in the context of the long term orientation towards downsizing and cost cutting This is a solution oriented book to address one of the most pressing management problems of the coming years How do organizations transfer the critical expertise and experience of their employees before that knowledge walks out the door It begins by outlining the broad issues and providing tools for developing a knowledge retention strategy and function It then goes on to outline best practices for retaining knowledge including knowledge transfer practices using technology to enable knowledge retention retaining older workers and retirees and outsourcing lost capabilities **Lost Knowledge** David W. De Long, 2004 Addressing one of the most vital management problems of the coming years this book asks how organisations can transfer the stores of knowledge experience from older workers to the next generation As the workforce ages so this dilemma is becoming more acute *Lost Knowledge* David W. DeLong, 2007 *Aging workforce : what does it mean for businesses and the economy? : hearing , The Aging Workforce* United States. Congress. Senate. Special Committee on Aging, 2007

Managing the Aging Workforce Marius Leibold, Sven C. Voelpel, 2007-06-27 Managing the Aging Workforce is one of the crucial topics for many of the world s enterprises The increasing average age of populations does not only affect social systems countries and communities but also has a strong impact on the work of businesses and companies The decline in demographic fitness will not only hit countries like the U S the Western European countries or Japan but also the upcoming societies in China or in the Eastern European countries In many of these countries during three or four decades the average age will grow from about 40 years now to about 50 years Where experts are needed this may result in an increase of the workforce s age of between 5 and 10 years in only one decade For companies thus a number of challenges arise that have to be overcome fast and continuously The main topics in this field will be new strategies in leadership new concepts in health management new ways in knowledge management and learning as well as new models how to drive ideas for diversity and innovation On the one hand enterprises therefore will have to invest in their aging employees for supporting their talents helping them to learn and keeping them in the company On the other they will have to increase productivity keep on searching for new products and integrate experts from abroad This has to be combined with new ways of strategies and HR management This book presents an analysis of the present and upcoming situation and an introduction into the strategic concepts enterprises will need to survive in aging societies *Information Diffusion Management and Knowledge Sharing: Breakthroughs in Research and Practice* Management Association, Information Resources, 2019-10-11 Within the past 10

years tremendous innovations have been brought forth in information diffusion and management. Such technologies as social media have transformed the way that information is disseminated and used, making it critical to understand its distribution through these mediums. With the consistent creation and wide availability of information, it has become imperative to remain updated on the latest trends and applications in this field. *Information Diffusion Management and Knowledge Sharing Breakthroughs in Research and Practice* examines the trends, models, challenges, issues, and strategies of information diffusion and management from a global context. Highlighting a range of topics such as influence maximization, information spread, control, and social influence, this publication is an ideal reference source for managers, librarians, information systems specialists, professionals, researchers, and administrators seeking current research on the theories and applications of global information management.

Strategies for Attracting, Maintaining, and Balancing a Mature Workforce Hughes, Claretha, 2019-12-27. There is no end in sight as the Fourth Industrial Revolution becomes more prevalent across the world. Artificial intelligence (AI) is making it imperative that machines and technology be integrated within the workplace. As the workforce ages, there has to be a way to acquire the tacit and explicit knowledge of these workers. The fields of human resource development and workforce development must lead in efforts to train and develop these workers for continuous technological change. *Strategies for Attracting, Maintaining, and Balancing a Mature Workforce* is an essential reference source that examines efforts for engaging, retaining, and utilizing an aging workforce in a workplace that is increasingly becoming more technology centered and provides reskilling and upskilling strategies to address the skills gaps. The title compiles vital human resource and workforce development strategies that assist these professionals with helping all employees at all levels within the workforce attain work, keep their jobs, and grow in their development to assist others. Featuring research on topics such as organizational culture, career learning, and agile workforce, this book is ideally designed for managers, executives, recruiters, hiring professionals, managing directors, human resources professionals, business researchers, industry professionals, academicians, and students.

Invaluable Knowledge William J. Rothwell, 2011. As organizations face a loss of people due to retirement, resignation, or disability, leaders are paying more attention to their talent management strategies, from grooming internal successors to aggressively recruiting from their competitors. The need is most acute in technical and other knowledge areas where the loss of a particular skill set demands an equally focused response. *Invaluable Knowledge* clarifies the unique and urgent issues of attracting, developing, retaining, and transferring the knowledge of IT professionals, engineers, accountants, analysts, and other specialists. The book's structure follows a typical talent cycle from identifying recruitment challenges to hiring and training top talent to building career development initiatives and finally to laying the groundwork for the next generation. *Invaluable Knowledge* makes an indisputable case for the importance of this specific facet of talent management and offers practical examples, repeatable processes, and a multitude of specific tips to help any organization's talent strategists create seamless transitions and maintain critical knowledge.
