IIM COGLEY,2014-04-22 What we don't know can still deeply affect us This book contains groundbreaking material that expands the horizons of self awareness For many people it has implications that are enormous and far reaching It is a medical fact that more than one in eight people began their journey into life not on their own They had a wombtwin or were part of a multiple pregnancy It is a medical fact that for every set of twins born at least one in five were triplets There is ever increasing evidence that the memory of this early loss can be carried through life as a form of psychological trauma that has previously been unrecognized and usuallymisdiagnosed. The symptoms of having

experienced loss in the womb or shortly after include A sadness and sense of loss that persists A loneliness that eats into the bones A difficulty with close relationships A burden of guilt that is irrational A black hole that nothing can fill A tendency towards isolation A creativity that is stunted A difficulty with letting go A search that is endless A depressive mentality A restlessness of spirit A poor sense of self Whether the twin loss took place during the first few months in the latter stages of the pregnancy during or after birth the symptoms seem to vary very little Could this be you or someone that you know If so this book could shed light on the mysterious world of what it s like to be a wombtwin survivor and point the way towards healing and recovery Here are the stories of so many who discovered the key to the mystery that had plagued them all their lives Written in language that is easily understood the steps towards identification and resolution are clearly outlined Here is a book that could truly change your life It could be the most important book you will ever read Sociobiological Perspectives on Human Development Kevin B.
