Natural Landscapes Of Britain From The Air:

Natural Landscapes of Britain from the Air Nicholas Stephens, 1990-09-06 *Historic Landscapes of Britain from the Air* Robin Edgar Glasscock, 1992-10-29 Britain's Changing Environment from the Air Tim Bayliss-Smith, Susan E. Owens, 1990-11-15 Commercial pressures and mechanization have rendered almost unrecognizable the natural and man made landscapes of Britain as they existed before World War I How this happened and how we can best conserve what is left is charted using the perspective of aerial photography in this book Landscape and Identity Wendy Joy Darby, 2020-08-20 In England perhaps more than most places people's engagement with the landscape is deeply felt and has often been expressed through artistic media The popularity of walking and walking clubs perhaps provides the most compelling evidence of the important role landscape plays in people's lives Not only is individual identity rooted in experiencing landscape but under the multiple impacts of social fragmentation global economic restructuring and European integration membership in recreational walking groups helps recover a sense of community Moving between the 1750s and the present this transdisciplinary book explores the powerful role of landscape in the formation of historical class relations and national identity The author's direct field experience of fell walking in the Lake District and with various locally based clubs includes investigation of the roles gender and race play She shows how the politics of access to open spaces has implications beyond the immediate geographical areas considered and ultimately involves questions of citizenship *Glaciological Data* World Data Center A for Glaciology, 1977 **Natural Woodland** George F. Peterken, 1996-03-28 A fascinating account of woodland natural history for all those concerned with woodland management and ecology **Quaternary of South-West England** S. Campbell, C.O. Hunt, James D. Scourse, D.H. Keen, N. Stephens, 2012-12-06 STRUCTURE OF THE VOLUME AND TERMINOLOGY USED This book contains scientific descriptions of 63 localities Figure A of at least national importance for Quaternary geology geomorphology and environmental change in South West England These sites were selected by the Geological Conservation Review and are accordingly designated GCR sites Chapter 1 provides an introduction to the Quaternary Chapter 2 synthesizes the geomorphological development and Quaternary history of the region and outlines the principles involved in site selection The individual GCR site descriptions form the core of the book In the following chapters sites are arranged and described in broad geographic areas and by research topic This is necessitated by the widely disparate nature of the field evidence in South West England sites demonstrating the full range of Quaternary and geomorphological features are not evenly and conveniently dispersed throughout the region and some areas have significant gaps Neither do the individual chapters contain sites that necessarily equate with particular site selection networks Rather the chosen chapter headings provide the least repetitive means of describing the sites and background material Where possible a chronological approach from oldest to youngest has been used to describe sites within a given chapter Again this approach is not always possible and a group of sites may show variations on landform or Stratigraphic evidence broadly

within one major time interval or chronostratigraphic stage inevitably there are many overlaps *The Routledge Companion to Landscape Studies* Peter Howard,Ian Thompson,Emma Waterton,Mick Atha,2013-02-15 Landscape is a vital synergistic concept which opens up ways of thinking about many of the problems which beset our contemporary world such as climate change social alienation environmental degradation loss of biodiversity and destruction of heritage As a concept landscape does not respect disciplinary boundaries Indeed many academic disciplines have found the concept so important it has been used as a qualifier that delineates whole sub disciplines landscape ecology landscape planning landscape archaeology and so forth In other cases landscape studies progress under a broader banner such as heritage studies or cultural geography Yet it does not always mean the same thing in all of these contexts The Routledge Companion to Landscape Studies offers the first comprehensive attempt to explore research directions into the many uses and meanings of landscape The Companion contains thirty nine original contributions from leading scholars within the field which have been divided into four parts Experiencing Landscape Landscape Culture and Heritage Landscape Society and Justice and Design and Planning for Landscape Topics covered range from phenomenological approaches to landscape to the consideration of landscape as a repository of human culture from ideas of identity and belonging to issues of power and hegemony and from discussions of participatory planning and design to the call for new imaginaries in a time of global and environmental crisis Each contribution explores the future development of different conceptual and theoretical approaches as well as recent empirical contributions to knowledge and understanding Collectively they encourage dialogue across disciplinary barriers and reflection upon the implications of research findings for local national and international policy in relation to landscape This Companion provides up to date critical reviews of state of the art perspectives across this multifaceted field embracing disciplines such as anthropology archaeology cultural studies geography landscape planning landscape architecture countryside management forestry heritage studies ecology and fine art It serves as an invaluable point of reference for scholars researchers and graduate students alike engaging in the field of landscape studies **Modern British Nature Writing, 1789-2020** Will Abberley,Christina Alt,David Higgins,Graham Huggan,Pippa Marland,2022-03-17 This first full length study of modern British nature writing is timely and invaluable for literary scholarship in the environmental crisis Permafrost Bibliography Update, 1988-1992 ,1993
