Naturalizing Epistemology A Bradford

Hilary Kornblith

Naturalizing Epistemology A Bradford:

Naturalizing Epistemology Hilary Kornblith, 1997 *Naturalizing Epistemology* Hilary Kornblith, 1994-01 explores the interaction between psychology and epistemology and addresses empirical questions about how we should arrive at our beliefs and whether the processes by which we arrive at our beliefs are the ones by which we ought to arrive at our beliefs

A Companion to Epistemology Jonathan Dancy, Ernest Sosa, Matthias Steup, 2010-02-15 With nearly 300 entries on key concepts review essays on central issues and self profiles by leading scholars this companion is the most comprehensive and up to date single volume reference guide to epistemology Epistemology from A Z is comprised of 296 articles on important epistemological concepts that have been extensively revised to bring the volume up to date with many new and re written entries reflecting developments in the field Includes 20 new self profiles by leading epistemologists Contains 10 new review essays on central issues of epistemology

Naturalistic Epistemology A. Shimony, Debra Nails, 2012-12-06 1 AIMS OF THE INTRODUCTION The systematic assessment of claims to knowledge is the central task of epistemology According to naturalistic epistemologists this task cannot be well performed unless proper attention is paid to the place of the knowing subject in nature All philosophers who can appropriately be called naturalistic epistemologists subscribe to two theses a human beings including their cognitive faculties are entities in nature interacting with other entities studied by the natural sciences and b the results of natural scientific investigations of human beings particularly of biology and empirical psychology are relevant and probably crucial to the epistemological enterprise Naturalistic epistemologists differ in their explications of theses a and b and also in their conceptions of the proper admixture of other components needed for an adequate treatment of human knowledge e.g. linguistic analysis logic decision theory and theory of value Those contributors to this volume who consider themselves to be naturalistic epistemologists the majority differ greatly in these respects It is not my intention in this introduction to give a taxonomy of naturalistic epistemologies I intend only to provide an overview which will stimulate a critical reading of the articles in the body of this volume by facilitating a recognition of the authors assumptions emphases and omissions

The Oxford Handbook of Philosophical Methodology Herman Cappelen, Tamar Szabó Gendler, John Hawthorne, 2016-06-23 This is the most comprehensive book ever published on philosophical methodology A team of thirty eight of the world's leading philosophers present original essays on various aspects of how philosophy should be and is done The first part is devoted to broad traditions and approaches to philosophical methodology including logical empiricism phenomenology and ordinary language philosophy The entries in the second part address topics in philosophical methodology such as intuitions conceptual analysis and transcendental arguments The third part of the book is devoted to essays about the interconnections between philosophy and neighbouring fields including those of mathematics psychology literature and film and neuroscience

Epistemology and Cognition J.H. Fetzer, 2012-12-06 This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge information and

data processing systems of all kinds no matter whether human other animal or machine Its scope is intended to span the full range of interest from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and sociobiology concerning the mental powers of other species to ideas related to artificial intelligence and computer science While primary emphasis will be placed upon theoretical conceptual and epistemological aspects of these problems and domains empirical experimental and methodological studies will also appear from time to time The present volume reflects the kind of insights that can be obtained when research workers in philosophy artificial intelligence and computer science explore problems of common concern The issues here tend to fall into two broad but varied sets namely those concerned with content and concepts on the one hand and those concerned with semantics and epistemology on the other The collection begins with a prologue that focuses upon the relations between connectionism and alternative conceptions of nativism and ends with an epilogue that examines the significance of alternative conceptions of the Frame Problem for artificial intelligence Because these papers are rich and diverse they ought to appeal to a wide and heterogeneous audience J H F

The Current State of the Coherence Theory J. Bender, 2012-12-06 The subtitle of this book should be read as a qualification as much as an elaboration of the title If the goal were completeness then this book would have included essays on the work of other philosophers such as Wilfrid Sellars Nicholas Rescher Donald Davidson Gilbert Harman and Michael Williams Although it would be incorrect to say that each of these writers has set forth a version of the coherence theory of justification and knowledge it is clear that their work is directly relevant and reaction to it could easily fill a companion volume This book concentrates however on the theories of Keith Lehrer and Laurence Bonjour and I doubt that any epistemologist would deny that they are presently the two leading proponents of coherentism A sure indication of this was the ease with which the papers in this volume were solicited and delivered The many authors represented here were willing prepared and excited to join in the discussion of Bonjour's and Lehrer's recent writings I thank each one personally for agreeing so freely to contribute All of the essays but two are published for the first time here Marshall Swain's and Alvin Goldman's papers were originally presented at a symposium on Bonjour's *The Structure of Empirical Knowledge* at the annual meeting of the Central Division of the American Philosophical Association Chicago Illinois in April 1987

Free Will and Epistemology Robert Lockie, 2018-01-11 In the first in depth study of the transcendental argument for decades *Free Will and Epistemology* defends a modern version of the famous transcendental argument for free will that we could not be justified in undermining a strong notion of free will as a strong notion of free will is required for any such process of undermining to be itself epistemically justified By arguing for a conception of internalism that goes back to the early days of the internalist externalist debates it draws on work by Richard Foley William Alston and Alvin Plantinga to explain the importance of epistemic deontology and its role in the transcendental argument It expands on the principle that ought implies can and presents a strong case for a form of self determination With references to cases in the neuroscientific

and cognitive psychological literature Free Will and Epistemology provides an original contribution to work on epistemic justification and the free will debate

The Selected Writings of Eva Picardi Eva Picardi, 2020-07-09 Eva Picardi has been one of the most influential Italian analytic philosophers of her generation She taught for forty years at the University of Bologna raising three generations of students This collection of selected writings honors her work confirming Picardi's status as one of the most important Frege scholars of her generation and a leading authority on the philosophy of Donald Davidson Bringing together Picardi's contributions to the history of analytic philosophy it includes her papers on major 20th century figures such as Wittgenstein Quine Davidson Rorty and Brandom She examines their work in comparison with the philosopher Michael Dummett's illuminating contrasts between American Neo pragmatism and Continental philosophy By considering key contributions made by Gadamer and Adorno and contrasting them with Davidson and Rorty's proposals Picardi is able to bridge the Analytic and Continental divide Featuring an introduction by Annalisa Coliva and new translations of previously unpublished papers this collection emphasizes the significance of Picardi's work for a new generation of readers

An Introduction to the Theory of Knowledge Dan O'Brien, 2016-12-16 An Introduction to the Theory of Knowledge 2nd Edition guides the reader through the key issues and debates in contemporary epistemology Lucid comprehensive and accessible it is an ideal textbook for students who are new to the subject and for university undergraduates The book is divided into five parts Part I discusses the concept of knowledge and distinguishes between different types of knowledge Part II surveys the sources of knowledge considering both a priori and a posteriori knowledge Parts III and IV provide an in depth discussion of justification and scepticism The final part of the book examines our alleged knowledge of the past other minds morality and God In this extensively revised second edition there are expanded sections on epistemic luck social epistemology and contextualism and there are new sections on the contemporary debates concerning the lottery paradox pragmatic encroachment peer disagreement safety sensitivity and virtue epistemology Engaging examples are used throughout the book many taken from literature and the cinema Complex issues such as those concerning the private language argument non conceptual content and the new riddle of induction are explained in a clear and accessible way This textbook is an invaluable guide to contemporary epistemology
