Nature Conservation 2 The Role Of Corridors:

Nature Conservation 2, the Role of Corridors Denis Allan Saunders, Richard J. Hobbs, 1991 **Conservation Biology**

Principles for Forested Landscapes Joan Voller, Scott Harrison, 2011-11-01 This book is intended to provide information to those who wish to interact with the landbase in an ecologically sustainable manner Practitioners charged with the administration of land based programs in industry and government will find the information presented useful It should also be a resource for many community groups involved in land use decision making Humans continue to use forests and make decisions about land use without perfect information Conservation Biology Principles for Forested Landscapes is intended to enable the improvement of planning and decision making processes by providing ecological information on issues of forest use Current approaches are not working Where information exists on new ecologically sustainable approaches practitioners should switch Where the information on a better approach is not yet available practitioners should replace the current inappropriate approach with a variety of flexible ones that offer the opportunity to change with new knowledge **Wildlife Review**, 1992 The Ecology of Transportation: Managing Mobility for the Environment John Davenport, Julia L. Davenport, 2006-06-30 Human transport by land sea and air has increased exponentially through time in intensity paralleling rises in population prosperity and rates of technological change Transport has considerable ecological effects many of them detrimental to environmental sustainability This volume brings together international experts from a variety of disciplines to review the ecological effects and their causes in terms of road rail ship and aircraft transport The contributors have different attitudes and agendas Some are ecologists some planners others social scientists Focus ranges from identification of threats and amelioration of damaging effects through to future design of transport systems to minimize environmental degradation Some chapters consider restricted areas of the globe others the globe itself Views encompass deep pessimism and cautious optimism *Integrated Protected Area Management* Mike Walkey, Ian R. Swingland, Shaun Russell, 1999-05-31 Protected areas have become an increasingly important tool both in the conservation of biodiversity and in revenue generation through sustainable use This is the only sure way to guarantee the protection necessary for many species habitats and ecosystems in the future Integrated Protected Area Management features contributions that consider the design management and sustainable use of these regions Three principal aspects are considered the theory and practice of designation community based conservation and the concept of sustainability identifying priorities for management The emphasis throughout is on the importance of an interdisciplinary approach to planning and the active involvement of all stakeholders in decision making processes as a means of ensuring long term sustainability Wildlife And Roads: The Ecological Impact John Burton, David Cutler, J Marsden, Bryan Sherwood, 2002-06-12 Wildlife and Roads The Ecological Impact is a timely publication as there are growing concerns about the impact made by roads on the environment Many of the aspects of the complex problem of siting new roads and lessening their negative environmental effects are addressed by contributors who are specialists in their

respective subject areas Among the topics discussed are legal aspects transport interests planners and contractors viewpoints plant and animal ecology and innovative solutions to some of the problems that roads inevitably impose on the natural environment The articles are based on papers presented at a meeting held by the Linnean Society of London Each author has made revisions for this book where necessary to reflect current circumstances

Reducing the Impacts of Development on Wildlife James Gleeson, Deborah Gleeson, 2012-04-12 The rapidly increasing number of threatened flora and fauna species worldwide is one of the chief problems confronting environmental professionals today This problem is largely due to the impact humans have had on land use through development e g agricultural residential industrial infrastructure and mining developments The requirement for developers to implement measures to reduce the impacts of development on wildlife is underpinned by government legislation A variety of measures or strategies are available to reduce such impacts including those to reduce impacts on flora and fauna during land clearance to deter fauna from potential hazards to facilitate the movement of fauna around and through a development site as well as those to provide additional habitat In recent years considerable advances have been made in the techniques used to reduce the impacts of development on wildlife in Australia and overseas Reducing the Impacts of Development on Wildlife contains a comprehensive range of practical measures to assist others to reduce the impacts resulting from development on terrestrial flora and fauna and promotes ecologically sustainable development It will be very useful to environmental consultants and managers developers strategists policy makers and regulators as well as community environmental groups and students 2012 Whitley Award Commendation for Zoological Text

Ecosystem Management and Sustainability Robin Kundis Craig, John Copeland Nagle, Bruce Parry, Oswald J. Schmitz, William K. Smith, Norman L. Christensen Jr, Janet Neuman, 2012-02-27 Ecosystem Management and Sustainability analyzes myriad human initiated processes and tools developed to foster sustainable natural resource use preservation and restoration It also examines how humans interact with plant marine and animal life in both natural and human altered environments Experts explain the complex ecosystem relationships that result from invasive species roads fencing and even our homes by addressing topics such as fire and groundwater management disturbance and ecosystem resilience Because most people in the 21st century live in urban environments the volume pays special attention to the ecology of cities with detailed coverage on topics ranging from urban agriculture to landscape architecture The volume focuses on how ecosystems across the world can be restored maintained and used productively and sustainably

Land Mosaics Richard T. T. Forman, 1995-11-09 An analysis and synthesis of the ecology of heterogeneous land areas *Ecology, Planning, and Management of Urban Forests* Margaret M. Carreiro, Yong-Chang Song, Jianguo Wu, 2007-10-31 It has been increasingly recognized that trees and vegetation in urban areas provide a number of ecological services beyond beautifying cities The purpose of urban forestry is to use trees and natural habitat patches to ameliorate negative environmental impacts of cities and to contribute to the creation of more livable ecological sustainable cities Ecology Planning and Management

of Urban Forests takes an international approach to sharing knowledge about the management of urban forests that has been learned through studies in many different regions. This allows the reader to evaluate methods and management that are appropriate for particular geographic, environmental, and socio-political contexts. Urban forests are also approached on regional and landscape scales to encompass more natural environments in and around cities rather than within arbitrary municipal boundaries.
