Nature Of Argument:

The Nature of Argument Karel Lambert, William Ulrich, 1980 A dissertation on the Book of Job, its nature, argument, age and author . . . To which are added, four sermons preached at St. Mary's Church in Cambridge and at White-Hall John GARNETT (successively Bishop of Leighlin and Ferns and of Clogher.), 1751 **The Anthropocene** Peter D.

Burdon, 2023-05-24 This book introduces the concept of the Anthropocene and examines its importance for environmental legal thinking research and practice Two main arguments are explored The first is that much of the scholarship in environmental law that addresses the Anthropocene does not respond to Earth systems science or the difference in scale as we move from local to global systems Key examples include a focus on anthropocentrism attempts to constitutionalise environmental protections the prevalence of legal rights and the idea of ecological integrity The second argument is that these points of focus derive from the prevalence of idealism in environmental legal scholarship Idealism in this context does not refer to naivety or the presentation of unrealistic goals Rather this book is concerned with idealism as a philosophical commitment to the power of ideas to determine reality and drive future change As expressed in legal scholarship this book also argues that idealism involves an abstraction from material reality and a refusal to directly engage those forces that have given rise to the Anthropocene In response this book uses a method of critique to uncover the presumptions and presuppositions that underlie environmental scholarship As a counter to idealism it also sketches out a framework for materialism in the Anthropocene This book's engagement with these questions will appeal to undergraduate and postgraduate students in law politics philosophy or the ecological humanities It will also be of interest to academics in these disciplines and libraries around the world *Dialectics and the Macrostructure of Arguments* James B. Freeman, 1991 No detailed description available for *Dialectics and the Macrostructure of Arguments* *Consciousness and Its Place in Nature* Galen Strawson, Anthony Freeman, 2024-05-07 Panpsychism is the philosophical view that consciousness mentality or mindedness in some form is fundamental in the universe The idea has existed for centuries but only recently has it had a serious resurgence Galen Strawson has been on the front line of the battlefield on the topic of panpsychism since the 1990s His paper on realistic monism contained in this volume and originally published in 2006 is now considered something of a classic and a catalyst for panpsychism's recent revival This long overdue new edition of the book gives the original commentators where they feel they have something more to add an opportunity to update their thinking on the topic of panpsychism in general and Strawson's realistic monism in particular Seven new postscripts are included which aim to enhance the original collection and push the discussion onwards Eighteen years have passed since the first edition of this groundbreaking volume and Strawson remains a distinctive and important voice in the field the new edition is a must read for all who are interested in consciousness studies *Wilderness Science in a Time of Change Conference*, 2000 Vol 2 Thirty eight papers related to the theme of wilderness in the context of larger systems are included Three overview papers

Nature, the Utility of Religion, and Theism John Stuart Mill, 1874 *Philosophy and Nature Sports* Kevin Krein, 2018-10-03 Nature sports such as skiing climbing and surfing have had a significant influence on Western popular culture since the mid twentieth century and participation in such sports continues to grow Written in a clear and accessible style this important book provides a comprehensive philosophical analysis of nature sports Philosophy and Nature Sports offers an engaging inquiry into how nature sports differ from mainstream sports how these differences are related to their value as human activities and the role of the environments in which such sports take place Addressing the claim that the most distinctive feature of nature sports is the relationship between participants and the natural world the book also examines a wide range of topics such as ethics risk gender construction the social role of nature sport subcultures and the aesthetic experiences of nature sports athletes Tying these together is the question of what it is that attracts us to nature sports and why they hold meaning for us This is a valuable resource for students and academics in fields such as alternative sports alternative sport subcultures sport philosophy sport and social issues ethics and phenomenology It is also a fascinating read for outdoor educators and practitioners
