Nature Of Horses Exploring Equine Evolution Intelligence And Behavior:

The Nature of Horses Stephen Budiansky, 1997 Horses have a shared history with man going back millennia to their domestication around 4000 B C Yet only in very recent years have scientists begun to turn the tools of modern science on this remarkable animal that has been so wrapped up in human dreams and legends Now modern scientific research is beginning to explain long standing mysteries about the true nature of the horse How well can horses really see What causes breakdowns in racehorses How intelligent are they compared to other animals and are some breeds smarter than others Does nature or nurture matter more in creating a great sport horse What causes cribbing and other vices In this beautifully illustrated compelling narrative Budiansky tells the story of the origins behavior intelligence and language of the horse

The Nature of Horses Stephen Budiansky, 2015-10-29 What makes a winning racehorse How intelligent are horses What are horses trying to tell us when they stamp their hooves and snort Do horses talk to each other The horse long a symbol of beauty and athletic prowess has made and lost fortunes and transformed human history and culture and yet has retained mysteries that baffle even those who work with them every day There has recently been an explosion of scientific research on the horse In this book Stephen Budiansky brings the insights of modern science to a wider audience of horse enthusiasts and animal lovers

Cherney,2019-11-01 Ableism a form of discrimination that elevates able bodies over those perceived as less capable remains one of the most widespread areas of systematic and explicit discrimination in Western culture Yet in contrast to the substantial body of scholarly work on racism sexism classism and heterosexism ableism remains undertheorized and underexposed In this book James L Cherney takes a rhetorical approach to the study of ableism to reveal how it has worked its way into our everyday understanding of disability *Ableist Rhetoric* argues that ableism is learned and transmitted through the ways we speak about those with disabilities Through a series of textual case studies Cherney identifies three rhetorical norms that help illustrate the widespread influence of ableist ideas in society He explores the notion that deviance is evil by analyzing the possession narratives of Cotton Mather and the

modern horror touchstone *The Exorcist* He then considers whether normal is natural in Aristotle's *Generation of Animals* and in the cultural debate over cochlear implants Finally he shows how the norm body is able to operate in Alexander Graham Bell's writings on eugenics and in the legal cases brought by disabled athletes Casey Martin and Oscar Pistorius These three simple equivalencies play complex roles within the social institutions of religion medicine law and sport Cherney concludes by calling for a rhetorical model of disability which he argues will provide a shift in orientation to challenge ableism's epistemic ideological and visual components Accessible and compelling this groundbreaking book will appeal to scholars of rhetoric and of disability studies as well as to disability rights advocates Civil War Field Artillery Earl J. Hess, 2022-10-05

The American Civil War saw the creation of the largest most potent artillery force ever deployed in a conflict fought in the Western Hemisphere It was as sizable and powerful as any raised in prior European wars Moreover Union and Confederate artillery included the largest number of rifled pieces fielded in any conflagration in the world up to that point Earl J Hess's *Civil War Field Artillery* is the first comprehensive general history of the artillery arm that supported infantry and cavalry in the conflict Based on deep and expansive research it serves as an exhaustive examination with abundant new interpretations that reenvision the Civil War's military Hess explores the major factors that affected artillerists and their work including the hardware the organization of artillery power relationships between artillery officers and other commanders and the influence of environmental factors on battlefield effectiveness He also examines the lives of artillerymen the use of artillery horses manpower replacement practices effects of the widespread construction of field fortifications on artillery performance and the problems of resupplying batteries in the field In one of his numerous reevaluations Hess suggests that the early war practice of dispersing guns and assigning them to infantry brigades or divisions did not inhibit the massing of artillery power on the battlefield and that the concentration system employed during the latter half of the conflict failed to produce a greater concentration of guns In another break with previous scholarship he shows that the efficacy of fuzes to explode long range ordnance proved a problem that neither side was able to resolve during the war Indeed cumulative data on the types of projectiles fired in battle show that commanders lessened their use of the new long range exploding ordnance due to bad fuzes and instead increased their use of solid shot the oldest artillery projectile in history **Timberland** Allen E.

Walls, 2025-09-12 A man came up behind Henry Ford with an axe and was going to kill him William Perry grabbed the axe out of the man's hands and then Mr Ford said you have a job with me for life and he did until the day he died Excerpt from the oral reminiscences of Irene Johnson neighbour of William and Melinda Perry William Perry's friendship had a significant influence on Henry Ford and the hiring of African Americans at the Ford Motor Company In later years Henry used the metaphor of having shared a cross cut saw with William Perry to explain his belief that African Americans and whites should work together in harmony with The coloured man sawing at one end of the log and the white man at the other This is a story of William Perry's life and adventures before and after this historic encounter with Henry Ford Although the story is

fictionalized the facts are true *Making the San Fernando Valley* Laura R. Barraclough, 2011 In the first book length scholarly study of the San Fernando Valley home to one third of the population of Los Angeles Laura R Barraclough combines ambitious historical sweep with an on theground investigation of contemporary life in this iconic western suburb She is particularly intrigued by the Valley s many rural elements such as dirt roads tack and feed stores horse keeping districts citrus groves and movie ranches Far from natural or undeveloped spaces these rural characteristics are she shows the result of deliberate urbanplanning decisions that have shaped the Valley over the course of more than a hundred years The Valley s entwined history of urban development and rural preservation has real ramifications today for patterns of racial and class inequality and especially for the evolving meaning of whiteness Immersing herself in meetings of homeowners associations equestrian organizations and redistricting committees Barraclough uncovers the racial biases embedded in rhetoric about open space and western heritage The Valley s urban cowboys enjoy exclusive semirural landscapes alongside the opportunities afforded by one of the world s largest cities Despite this enviable position they have at their disposal powerful articulations of both white victimization and with little contradiction color blind politics
