over the causes and consequences of contemporary wars and global political conflicts as well as functioning as an accessible guide to the theoretical utilities of Deleuzian thought for International Relations IR in a manner that is very much lacking in current debates about IR Covering a wide array of topics this volume will provide a set of original contributions focussed in particular upon the contemporary nature of war the increased priorities afforded to the security imperative the changing designs of bio political regimes fascist aesthetics nihilistic tendencies and the modernist logic of finitude the politics of suicide the specific desires upon which fascism draws and of course the recurring pursuit of power An important contribution to the field this work will be of great interest to students and scholars of international relations fascism and international relations theory
