Link,Donald S. Siegel,Mike Wright,2015-03-09 As state support and federal research funding dwindle universities are increasingly viewing their intellectual property portfolios as lucrative sources of potential revenue Nearly all research universities now have a technology transfer office to manage their intellectual property but many are struggling to navigate this new world of university industry partnerships Given the substantial investment in academic research and millions of dollars potentially at stake identifying best practices in university technology transfer and academic entrepreneurship is of paramount importance The Chicago Handbook of University Technology Transfer and Academic Entrepreneurship is the first definitive source to synthesize state of the art research in this arena Edited by three of the foremost experts in the field the handbook presents evidence from entrepreneurs administrators regulators and professors in numerous disciplines Together they address the key managerial and policy implications through chapters on how to sustain successful research ventures ways to stimulate academic entrepreneurship maintain effective open innovation strategies and improve the performance of university technology transfer offices A broad and ambitious work the handbook offers comprehensive coverage for universities of all types allowing them to confidently handle technology commercialization and further cultivate innovation *The British National Bibliography* Arthur James Wells,2005 *The Genealogy of a Gene* Myles W. Jackson,2015-03-06 The history of the CCR5 gene as a lens through which to view such issues as intellectual property Big Pharma personalized medicine and race and genomics In *The Genealogy of a Gene* Myles Jackson uses the story of the CCR5 gene to investigate the interrelationships among science technology and society Mapping the varied genealogy of CCR5 intellectual property natural selection Big and Small Pharma human diversity studies personalized medicine ancestry studies and race and genomics Jackson links a myriad of diverse topics The history of CCR5 from the 1990s to the present offers a vivid illustration of how intellectual property law

has changed the conduct and content of scientific knowledge and the social political and ethical implications of such a transformation The CCR5 gene began as a small sequence of DNA became a patented product of a corporation and then when it was found to be an AIDS virus co receptor with a key role in the immune system it became part of the biomedical research world and a potential moneymaker for the pharmaceutical industry When it was further discovered that a mutation of the gene found in certain populations conferred near immunity to the AIDS virus questions about race and genetics arose Jackson describes these developments in the context of larger issues including the rise of biocapitalism the patentability of products of nature the difference between U S and European patenting approaches and the relevance of race and ethnicity to medical research
