Nature History A Study In Theological

Professor Christopher B Kaiser

Nature History A Study In Theological:

A Natural History of Natural Theology Helen De Cruz, Johan De Smedt, 2024-06-11 An examination of the cognitive foundations of intuitions about the existence and attributes of God Questions about the existence and attributes of God form the subject matter of natural theology which seeks to gain knowledge of the divine by relying on reason and experience of the world Arguments in natural theology rely largely on intuitions and inferences that seem natural to us occurring spontaneously at the sight of a beautiful landscape perhaps or in wonderment at the complexity of the cosmos even to a nonphilosopher In this book Helen De Cruz and Johan De Smedt examine the cognitive origins of arguments in natural theology They find that although natural theological arguments can be very sophisticated they are rooted in everyday intuitions about purpose causation agency and morality Using evidence and theories from disciplines including the cognitive science of religion evolutionary ethics evolutionary aesthetics and the cognitive science of testimony they show that these intuitions emerge early in development and are a stable part of human cognition De Cruz and De Smedt analyze the cognitive underpinnings of five well known arguments for the existence of God the argument from design the cosmological argument the moral argument the argument from beauty and the argument from miracles Finally they consider whether the cognitive origins of these natural theological arguments should affect their rationality

A Preface to Theology W. Clark Gilpin, 1996-11-15 At a time of widespread perplexity about the social role of humanistic scholarship few disciplines are as anxious about their nature and purposes as academic theology In this important work W Clark Gilpin dean of the University of Chicago Divinity School proposes that American theological scholarship become responsible to a threefold public the churches the academic community and civil society Gilpin approaches this goal indirectly by investigating the historic social roles of Protestant theologians and the educational institutions in which they have pursued their scholarship and teaching Ranging from analyses of the New England Puritan Cotton Mather to contemporary theologians as public intellectuals Gilpin proposes that we find out what theology is by asking what theologians do By showing how particular cultural problems have always shaped the work of theologians Gilpin's work profoundly illuminates the foundations of American academic theology providing insights that will help guide its future

The Routledge Research Companion to Nineteenth-Century British Literature and Science John Holmes, Sharon Ruston, 2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative and up to date foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for

the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman

Toward a Theology of Scientific Endeavour Professor Christopher B Kaiser,2013-05-28 Foundations of science are specific conditions of the cosmos of human intelligence of cultural beliefs and of technological structures that make the pursuit of modern science possible Each of the four foundations of scientific endeavour can be studied as a topic on its own The concurrent study of all four together reveals several tensions and interconnections among them that point the way to a greater unification of faith and science This book explores four foundations of scientific endeavour and investigates some of the paradoxes each of them raises Kaiser shows that the resolution of these paradoxes inevitably leads us into theological discourse and raises new challenges for theological endeavour In order to address these challenges Kaiser draws on the wider resources of the Judeo Christian tradition and argues for a refocusing of contemporary theology from the perspective of natural science
