Nature Of Cities Ecocriticism And Urban Environments:

The Nature of Cities Michael Bennett, David W. Teague, 2021-10-12 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one attempts to adopt and adapt an environmental perspective for analyzing urban life The Nature of Cities offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement **Melvin Burgess** Alison Waller, 2013-10-01 Melvin Burgess has made a powerful name for himself in the world of children's and young adult literature emerging in the 1990s as the author of over twenty critically acclaimed novels This collection of original essays by a team of established and new scholars introduces readers to the key debates surrounding Burgess's most challenging work including controversial young adult novels *Junk* and *Doing It* Covering a variety of critical and theoretical perspectives the volume also presents exciting new readings of some of his less familiar fiction for children and features an interview with the author *Mussolini's Cities*, *Ecocinema in the City* Robin L. Murray, Joseph K. Heumann, 2017-11-15 In *Ecocinema in the City* Murray and Heumann argue that urban ecocinema both reveals and critiques visions of urban environmentalism The book emphasizes the increasingly transformative power of nature in urban settings explored in both documentaries and fictional films such as *Children Underground* *White Dog* *Hatari* and *Lives Worth Living* The first two sections *Evolutionary Myths Under the City* and *Urban Eco trauma* take more traditional ecocinema approaches and emphasize the city as a dangerous constructed space The last two sections *Urban Nature and Interdependence* and *The Sustainable City* however bring to life the vibrant relationships between human and nonhuman nature *Ecocinema in the City* provides a space to explore these relationships revealing how ecocinema shows that both human and nonhuman nature can interact sustainably and thrive *Routledge Handbook of the Digital Environmental Humanities* Charles Travis, Deborah P.

Dixon, Luke Bergmann, Robert Legg, Arlene Crampsie, 2022-09-12 The Routledge Handbook of the Digital Environmental Humanities explores the digital methods and tools scholars use to observe interpret and manage nature in several different academic fields Employing historical philosophical linguistic literary and cultural lenses this handbook explores how the digital environmental humanities DEH as an emerging field recognises its convergence with the environmental humanities As such it is empirically critically and ethically engaged in exploring digitally mediated visualised and parsed framings of past present and future environments landscapes and cultures Currently humanities geographical cartographical informatic and computing disciplines are finding a common space in the DEH and are bringing the use of digital applications coding and software into league with literary and cultural studies and the visual film and performing arts In doing so the DEH facilitates transdisciplinary encounters between fields as diverse as human cognition gaming bioinformatics and linguistics social media literature and history music painting philology philosophy and the earth and environmental sciences This handbook will be essential reading for those interested in the use of digital tools in the study of the environment from a wide range of disciplines and for those working in the environmental humanities more generally **Unplanned Cities in Modern**

American Poetry Daniela Kukrechtová, 2025-07-10 Reveals how five modern American poets challenged prevailing discourses about urbanization through lyrical representations of cities and the diverse people who lived in them In early 20th century America industrialization and the influx of immigrants and rural migrants into urban centers fostered a certain representation of and distaste for cities and their inhabitants The dominant discourse was one of containment through utopian planning and violent reshaping often reflected in both policy making and writings about cities during this time Yet as Daniela Kukrechtová identifies urban literature also reveals voices that challenged that narrative Unplanned Cities in Modern American Poetry shows how the formally innovative works of five poets Jean Toomer William Carlos Williams Hart Crane Frank O'Hara and Gwendolyn Brooks worked against anti urban discourse Their works displayed a love for disorderly cityscapes and the actual urbanites who inhabit them promoting the radical idea that cities were for people while revealing the extreme dystopian utopian discourses that helped create and maintain divisions and disparities Kukrechtová argues that besides offering a radical critique these poets also used their poetry to imagine the mental and emotional attitudes of urban dwellers toward their environment She therefore offers the urban ecocritical approach often missing in literary analyses of modern American poetry Simultaneously the lyrical and socially engaged imagination in these works that is the human implications of various plans designs and policies that helped create the modern American city represent a voice often unheard in urban studies and its history **A Companion to Global Environmental History** J.
