Nature On The Rampage A Natural History:

1001 Questions Answered about Earthquakes, Avalanches, Floods, and Other Natural Disasters Barbara Tufty, 1978 This book answers 1001 questions about all kinds of natural disasters earthquakes volcanoes tsunamis avalanches landslides floods droughts fires and animal plagues A very informative readable book 18 photographs 23 line drawings *Catalog: Catalog of books.*-v.3-6.*Special indexing file* Denver Public Library. Conservation Library, 1974 Selected Bibliography of Mass Movement, 1952-1966 Gary Chadburn, 1978 Catalog of the Library of the Academy of Natural Sciences of Philadelphia Academy of Natural Sciences of Philadelphia. Library, 1972 **Animal Horror Cinema** Katarina Gregersdotter, Johan Höglund, Nicklas Hållén, 2016-02-22 This first full length scholarly study about animal horror cinema defines the popular subgenre and describes its origin and history in the West The chapters explore a variety of animal horror films from a number of different perspectives This is an indispensable study for students and scholars of cinema horror and animal studies Geological Survey Bulletin, 1949 **Imagining Atlantis** Richard Ellis, 2012-01-11 Ever since Plato created the legend of the lost island of Atlantis it has maintained a uniquely strong grip on the human imagination For two and a half millennia the story of the city and its catastrophic downfall has inspired people from Francis Bacon to Jules Verne to Jacques Cousteau to speculate on the island s origins nature and location and sometimes even to search for its physical remains It has endured as a part of the mythology of many different cultures yet there is no indisputable evidence let alone proof that Atlantis ever existed What then accounts for its seemingly inexhaustible appeal Richard Ellis plunges into this rich topic investigating the roots of the legend and following its various manifestations into the present He begins with the story s origins Did it arise from a common prehistorical myth Was it a historical remnant of a lost city of pre Columbians or ancient Egyptians Was Atlantis an extraterrestrial colony Ellis sifts through the scientific evidence marshaled to prove these theories and describes the mystical and spiritual significance that has accrued to them over the centuries He goes on to explore the possibility that the fable of Atlantis was inspired by a conflation of the high culture of Minoan Crete with the destruction wrought on the Aegean world by the cataclysmic eruption around 1500 b c of the volcanic island of Thera or Santorini A fascinating historical and archaeological detective story *Imagining Atlantis* is a valuable addition to the literature on this essential aspect of our mythohistory The British National Bibliography Arthur James Wells, 2004 **Bibliography of North American Geology**, 1966 1919 28 cumulation includes material previously issued in the 1919 20 1935 36 issues and also material not published separately for 1927 28 1929 39 cumulation includes material previously issued in the 1929 30 1935 36 issues and also material for 1937 39 not published separately Natural Disasters, Cultural Responses Christof Mauch, Christian Pfister, 2009-03-16 Catastrophes it seems are becoming more frequent in the twenty first century According to UN statistics every year approximately two hundred million people are directly affected by natural disasters seven times the number of people who are affected by war Discussions about global warming and fatal disasters such as Katrina and the

Tsunami of 2004 have heightened our awareness of natural disasters and of their impact on both local and global communities Hollywood has also produced numerous disaster movies in recent years some of which have become blockbusters This volume demonstrates that natural catastrophes _earthquakes hurricanes floods etc _have exercised a vast impact on humans throughout history and in almost every part of the world It argues that human attitudes toward catastrophes have changed over time Surprisingly this has not necessarily led to a reduction of exposure or risk The organization of the book resembles a journey around the globe _from Europe to North Africa the Middle East and Asia and from the Pacific through South America and Mexico to the United States While natural disasters appear everywhere on the globe different cultures societies and nations have adopted specific styles for coping with disaster Indeed how humans deal with catastrophes depends largely on social and cultural patterns values religious belief systems political institutions and economic structures The roles that catastrophes play in society and the meanings they are given vary from one region to the next they differ _and this is one of the principal arguments of this book _from one cultural political and geographic space to the next The essays collected here help us to understand not only how people in different times throughout history have learned to cope with disaster but also how humans in different parts of the world have developed specific cultural social and technological strategies for doing so
