Nature and art [ed. by F.B. Ward]. Francis Beckford Ward, 1866 **Abstraction in Art and Nature** Nathan Cabot Hale, 2012-06-19 In this stimulating thought provoking guide a noted sculptor and teacher demonstrates how to discover a rich new design source in the abstractions inherent in natural forms Through systematic study of such properties as line form shape mass pattern light and dark space proportion scale perspective and color as they appear in nature students can learn to utilize the infinite variety and diversity of those elements as a wellspring of creative abstraction The author invites students to learn the necessary techniques through a series of projects devoted to exploring and drawing plants animals birds landscapes seascapes skies and more Lines of growth and structure water and liquid forms weather and atmospheric patterns luminosity in plants and animals earth colors and lightning are among the sources of abstraction available to the artist who is aware of them This book will train you to see and use these elements and many more An intriguing blend of art psychology and the natural sciences *Abstraction in Art and Nature* is profusely illustrated with over 370 photographs scientific illustrations diagrams and reproductions of works by the great masters It not only offers a mind stretching new way of learning and teaching basic design but deepens our awareness of the natural environment In short Mr Hale's book is an indispensable guide that artists teachers and students will want to have close at hand for instruction inspiration and practical guidance *Shakespeariana*, 1887 *Art and Industry* United States. Office of Education, 1892 **Art and Theory of Art** Rudolf Steiner, 2021-10-19 An Author's Summary 1888 Four Essays Written between 1890 and 1898 Eight Lectures between 1909 and 1921 CW 271 The challenge of saying something about art was personal for Rudolf Steiner He experienced it as deeply connected with his biography It is not for nothing that in the last lecture of this volume he points to his repeated attempts to develop a new approach and new forms of expression for speaking about art We find at least three forms of this attempted approach in this book Zvi Szir from the introduction The subject practice and vital importance of art was a thread

that ran through Rudolf Steiner's life from his early work as a scholar of Goethe through his time as an editor of a literary and arts journal in Berlin in the 1890s and to his two and a half decades as a spiritual researcher and teacher. Understanding and articulating the significance of art was a perennial challenge for Rudolf Steiner. This volume of Steiner's Collected Works is unique in that it showcases a survey of both early written works and later lectures to anthroposophic audiences and in doing so presents a picture of a lifetime of intensive effort to convey something essential about the arts. Beginning with his early philosophical work and literary criticism at the end of the nineteenth century and on into his later lectures, this volume follows Steiner's endeavor to reveal in words the mystery obscured by the vague concept of what art is. Viewed as a whole, this volume forms one of the most provocative collections of the twentieth century on the subject of art. It offers a unique analysis of the origin, foundation, and method of the creative process. This book is a translation of *Kunst und Kunsterkenntnis: Grundlagen einer neuen Ästhetik*, 3rd edition, published by Rudolf Steiner Verlag, Dornach, Switzerland, 2010, GA 271.
