Natures Children:

Getting to Know ... Nature's Children ,1998 **Children, Nature, Cities** Ann Marie F. Murnaghan, Laura J. Shillington, 2016-05-26 Why does the way we think about urban children and urban nature matter This volume explores how dichotomies between nature culture rural urban and child adult have structured our understandings about the place of children and nature in the city By placing children and youth at the center of re theorising the city as a socio natural space the book illustrates how children and youth s relations to and with nature can change adultist perspectives and help create more ecologically and socially just cities As a key contribution to children s studies the book engages and enlivens debates in urban political ecology and urban theory which have not yet treated age as an important axis of difference With examples from ten localities the chapters in this volume ask how we can subvert both romanticized and modernist conceptualizations of nature and childhood that conflate innocence and purity with children and nature the volume asks what happens when we re invent urban natures with children s needs and perspectives in mind *Children and Nature* Peter H. Kahn, Jr., Stephen R. Kellert, 2002-05-03 For much of human evolution the natural world was one of the most important contexts of children s maturation Indeed the experience of nature was and still may be a critical component of human physical emotional intellectual and even moral development Yet scientific knowledge of the significance of nature during the different stages of childhood is sparse This book provides scientific investigations and thought provoking essays on children and nature *Children and Nature* incorporates research from cognitive science developmental psychology ecology education environmental studies evolutionary psychology political science primatology psychiatry and social psychology The authors examine the evolutionary significance of nature during childhood the formation of children s conceptions values and sympathies toward the natural world how contact with nature affects children s physical and mental development and the educational and political consequences of the weakened childhood experience of nature in modern society *Nature and Young Children* Ruth Wilson, 2018-04-02 Now in its third edition *Nature and Young Children* promotes the holistic development of children by connecting them with nature It offers practical advice on how to set up indoor and outdoor nature play spaces as well as encouraging environmentally responsible attitudes values and behaviour in your early childhood setting With fully revised chapters in line with recent developments to policy and practice and brand new material covering Early Childhood Education for Sustainability the power of pro nature poetry and philosophical discussions and children living in urban environments this book reveals just how important nature play can be in the development of young children The user friendly chapters offer guidance on alternative settings for nature focused programs culturally sensitive approaches to nature play in early childhood the role of the adult in nature based learning using nature play for cross curricular learning environmentally appropriate practices integrating nature education and peace education health safety and risky play Highly accessible detailed and now extensively updated *Nature and Young Children* will provide all early years practitioners

teachers and students with a wealth of ideas on how to foster creative play and learning in nature focused environments while also encouraging positive connections with nature

Children's Nature Leslie Paris, 2010-05-10 The summer camps have provided many American children's first experience of community beyond their immediate family and neighbourhoods This title chronicles the history of the American summer camp from its invention in the late nineteenth century through its rise in the first four decades of the twentieth century OCLC

Nature Education with Young Children Daniel R. Meier, Stephanie Sisk-Hilton, 2013-05-29 Nature Education with Young Children is a thoughtful sophisticated teacher resource that blends theory and practice on nature education children's inquiry based learning and reflective teaching The book's guiding conceptual framework is founded upon the integration of four key ideas for effective and transformative nature education The power and value of equity and access to nature education Effective teaching encompasses child development domains and integrates ECE curriculum Children learn best through inquiry based and child centered teaching Powerful teaching is founded upon teacher inquiry and reflection Implementing nature study is one critical way that educators can integrate more science learning across the ECE curriculum and do so in an active discovery based manner Nature Education with Young Children strives for an American version of what the Reggio Emilia educators do so well creating a seamless integration of science concepts into the daily intellectual investigations that occur in classrooms everywhere

Nature and Young Children Ruth A. Wilson, 2012 From adding richness and variety to learning to redesigning a playground this highly accessible text will provide early years practitioners with a wealth of ideas on how to foster creative play and learning in the outdoor environment with a focus on interacting with the natural world

Children, Nature and Cities Claire Freeman, Yolanda van Heezik, 2018-06-14 That children need nature for health and well being is widely accepted but what type of nature Specifically what type of nature is not only necessary but realistically available in the complex and rapidly changing worlds that children currently live in This book examines child nature definitions through two related concepts the need for connecting to nature and the processes by which opportunities for such contact can be enhanced It analyses the available nature from a scientific perspective of habitats species and environments together with the role of planning to identify how children in cities can and do connect with nature This book challenges the notion of a universal child and childhood by recognizing children's diverse life worlds and experiences which guide them into different and complex ways of interacting with the natural world Unfortunately not all children have the freedom to access the nature that is present in the cities where they live This book addresses the challenge of designing biodiverse cities in which nature is readily accessible to children

Arts in Nature with Children and Young People Zoe Moula, Nicola Walshe, 2024-12-23 This novel text brings together research and practice on the intersection between arts and nature and their impact on children and young people's wellbeing health equality and sustainability Existing literature focuses on either the impact of the arts or the impact of being in with nature on children's and young people's wellbeing However the

intersection between the two arts and nature and their combined effect on wellbeing has received limited attention Through five research based and seven practice based chapters this book draws upon arts in nature practices that incorporate visual arts music movement drama and poetry in a range of natural environments such as forests beaches greenhouses parks community areas and school playgrounds Arts in Nature with Children and Young People will appeal to anyone working with children and young people including mental health and healthcare professionals teachers researchers artists and arts therapists It is also an accessible guide for parents and families looking for inspiration and ideas for creative and outdoor activities

Discovering Nature with Young Children Ingrid Chalufour, Karen Worth, 2003-11-17 Field tested across the country this comprehensive curriculum expands and extends the role science has traditionally played in the early childhood classroom The first in a new series Discovering Nature with Young Children explores the wide ranging elements that make up the natural world around us The curriculum replaces simple fact feeding practices with the development of long term scientific reasoning including literacy skills and numeracy skills such as hypothesis inference prediction and estimation
