Natures Management Writings On Landscape And Reform 1822 1859:

Nature's Management Edmund Ruffin, 2006 History remembers Edmund Ruffin the Virginia native believed to have fired the first shot against Fort Sumter in 1861 as one of the South's most aggressive fire eaters This volume of Ruffin's work offers us his less known but equally intense passion for agricultural study In carefully edited selections from Ruffin's writings Jack Temple Kirby presents an innovative progressive agronomist and pioneering conservationist Arranged in sections discussing southern agricultural history Ruffin's observations of nature his ideas about land reform and his plans for soil rejuvenation *Nature's Management* shows that Ruffin was a thinker far ahead of his time recognizing our need to improve agriculture and to protect nature Known as the father of soil science in the United States Edmund Ruffin discovered and solved the problem of soil acidity while still in his twenties and published several papers on the subject As the publication of his writing increased Ruffin left his own farming business to pursue his studies This volume contains a collection of Ruffin's essays on a variety of interrelated subjects From the promotion of fencing and methods of malaria prevention to advocacy of a public works program and the recycling of waste Ruffin's ideas paved the way for the early conservation movement associated with Theodore Roosevelt Gifford Pinchot and others *Nature's Management* presents Ruffin's activism and innovative genius at its best replacing the image of a southern firebrand with that of an outspoken reformer deserving of recognition

A Golden Weed Drew A. Swanson, 2014-08-12 Drew A Swanson has written an environmental history about a crop of great historical and economic significance American tobacco A preferred agricultural product for much of the South the tobacco plant would ultimately degrade the land that nurtured it but as the author provocatively argues the choice of crop initially made perfect agrarian as well as financial sense for southern planters Swanson who brings to his narrative the experience of having grown up on a working Virginia tobacco farm explores how one attempt at agricultural permanence went seriously awry He weaves together social agricultural and cultural history of the Piedmont region and illustrates how ideas about race and landscape management became entangled under slavery and afterward Challenging long held perceptions this innovative study examines not only the material relationships that connected crop land and people but also the justifications that encouraged tobacco farming in the region

Mockingbird Song Jack Temple Kirby, 2009-11-05 The American South is generally warmer wetter weedier snakier and more insect infested and disease prone than other regions of the country It is alluring to the scientifically and poetically minded alike With *Mockingbird Song* Jack Temple Kirby offers a personal and passionate recounting of the centuries old human nature relationship in the South Exhibiting violent cycles of growth abandonment dereliction resettlement and reconfiguration this relationship Kirby suggests has the sometimes melodious sometimes cacophonous vocalizations of the region's emblematic avian the mockingbird In a narrative voice marked by the intimacy and enthusiasm of a storyteller Kirby explores all of the South's peoples and their landscapes how humans have used yielded or manipulated varying environments and how they have treated forests water and animals Citing

history literature and cinematic portrayals along the way Kirby also relates how southerners have thought about their part of Earth as a source of both sustenance and delight

Class, Race, and Marxism David R. Roediger, 2019-10-08 Winner of the Working Class Studies Association C L R James Award Seen as a pioneering figure in the critical study of whiteness US historian David Roediger has sometimes received criticism and praise alleging that he left Marxism behind in order to work on questions of identity This volume collects his recent and new work implicitly and explicitly challenging such a view In his historical studies of the intersections of race settler colonialism and slavery in his major essay with Elizabeth Esch on race and the management of labor in his detailing of the origins of critical studies of whiteness within Marxism and in his reflections on the history of solidarity Roediger argues that racial division is part of not only of the history of capitalism but also of the logic of capital

A Companion to American Environmental History Douglas Cazaux Sackman, 2010-02-12 A Companion to American Environmental History gathers together a comprehensive collection of over 30 essays that examine the evolving and diverse field of American environmental history Provides a complete historiography of American environmental history Brings the field up to date to reflect the latest trends and encourages new directions for the field Includes the work of path breaking environmental historians from the founders of the field to contributions from innovative young scholars Takes stock of the discipline through five topically themed parts with essays ranging from American Indian Environmental Relations to Cities and Suburbs

The Republic of Nature Mark Fiege, 2012-03-20 In the dramatic narratives that comprise *The Republic of Nature* Mark Fiege reframes the canonical account of American history based on the simple but radical premise that nothing in the nation's past can be considered apart from the natural circumstances in which it occurred Revisiting historical icons so familiar that schoolchildren learn to take them for granted he makes surprising connections that enable readers to see old stories in a new light Among the historical moments revisited here a revolutionary nation arises from its environment and struggles to reconcile the diversity of its people with the claim that nature is the source of liberty Abraham Lincoln an unlettered citizen from the countryside steers the Union through a moment of extreme peril guided by his clear-eyed vision of nature's capacity for improvement In Topeka Kansas transformations of land and life prompt a lawsuit that culminates in the momentous civil rights case of *Brown v Board of Education* By focusing on materials and processes intrinsic to all things and by highlighting the nature of the United States Fiege recovers the forgotten and overlooked ground on which so much history has unfolded In these pages the nation's birth and development pain and sorrow ideals and enduring promise come to life as never before making a once familiar past seem new *The Republic of Nature* points to a startlingly different version of history that calls on readers to reconnect with fundamental forces that shaped the American experience For more information visit the author's website <http://republicofnature.com>

Coastal Nature, Coastal Culture Paul S. Sutter, Paul M. Pressly, 2018-07-15 One of the unique features of the Georgia coast today is its thorough conservation At first glance it seems to be a place where nature reigns But

another distinctive feature of the coast is its deep and diverse human history Indeed few places that seem so natural hide so much human history In Coastal Nature Coastal Culture editors Paul S Sutter and Paul M Pressly have brought together work from leading historians as well as environmental writers and activists that explores how nature and culture have coexisted and interacted across five millennia of human history along the Georgia coast as well as how those interactions have shaped the coast as we know it today The essays in this volume examine how successive communities of Native Americans Spanish missionaries British imperialists and settlers planters enslaved Africans lumbermen pulp and paper industrialists vacationing northerners Gullah Geechee nature writers environmental activists and many others developed distinctive relationships with the environment and produced well defined coastal landscapes Together these histories suggest that contemporary efforts to preserve and protect the Georgia coast must be as respectful of the rich and multifaceted history of the coast as they are of natural landscapes many of them restored that now define so much of the region Contributors William Boyd S Max Edelson Edda L Fields Black Christopher J Manganiello Tiya Miles Janisse Ray Mart A Stewart Drew A Swanson David Hurst Thomas and Albert G Way

Modernizing a Slave Economy John Majewski,2011-04-01 What would separate Union and Confederate countries look like if the South had won the Civil War In fact this was something that southern secessionists actively debated Imagining themselves as nation builders they understood the importance of a plan for the economic structure of the Confederacy The traditional view assumes that Confederate slave based agrarianism went hand in hand with a natural hostility toward industry and commerce Turning conventional wisdom on its head John Majewski s analysis finds that secessionists strongly believed in industrial development and state led modernization They blamed the South s lack of development on Union policies of discriminatory taxes on southern commerce and unfair subsidies for northern industry Majewski argues that Confederates opposition to a strong central government was politically tied to their struggle against northern legislative dominance Once the Confederacy was formed those who had advocated states rights in the national legislature in order to defend against northern political dominance quickly came to support centralized power and a strong executive for war making and nation building

The Georgia Peach William Thomas Okie,2016-11-22 Imprinted on license plates plastered on billboards stamped on the tail side of the state quarter and inscribed on the state map the peach is easily Georgia s most visible symbol Yet *Prunus persica* itself is surprisingly rare in Georgia and it has never been central to the southern agricultural economy Why then have southerners and Georgians in particular clung to the fruit The Georgia Peach Culture Agriculture and Environment in the American South shows that the peach emerged as a viable commodity at a moment when the South was desperate for a reputation makeover This agricultural success made the fruit an enduring cultural icon despite the increasing difficulties of growing it A delectable contribution to the renaissance in food writing The Georgia Peach will be of great interest to connoisseurs of food southern environmental rural and agricultural history

Port Cities of the Atlantic World Jacob Steere-Williams,Blake C. Scott,2023-12-14 Traces the maritime routes and the

historical networks that link port cities around the Atlantic world *Port Cities of the Atlantic World* brings together a collection of essays that examine the centuries long transatlantic transportation of people goods and ideas with a focus on the impact of that trade on what would become the American South Employing a wide temporal range and broad geographic scope the scholars contributing to this volume call for a sea facing history of the South one that connects that terrestrial region to this expansive maritime history By bringing the study up to the 20th century in the collection s final section the editors Jacob Steere Williams and Blake C Scott make the case for the lasting influence of these port cities and Atlantic world history on the economy society and culture of the contemporary South
