Bloomsbury World Englishes Volume 1: Paradigms Britta Schneider, Theresa Heyd, Mario Saraceni, 2021-05-20

Bloomsbury World Englishes offers a comprehensive and rigorous description of the facts, implications and contentious issues regarding the forms and functions of English in the world. International experts cover a diverse range of varieties and topics offering a more accurate understanding of English across the globe and the various social contexts in which it plays a significant role. With volumes dedicated to research paradigms, language ideologies and pedagogies, the collection pushes the boundaries of the field to go beyond traditional descriptive paradigms and contribute to moving research agendas forward. Volume 1 Paradigms analyzes the ways in which we make sense of English as a global language, its many varieties and how these come into contact and interact with other languages. It moves the field beyond existing models that are no longer sufficient to describe English in the era of globalization.

Bulletin of the New York Public Library, 1907 Includes its Report 1896-1945 *Forest and Stream*, 1894 **The Routledge Companion to Marine and Maritime Worlds 1400-1800** Claire Jowitt, Craig Lambert, Steve Mentz, 2020-05-21 This book has been nominated for The Mountbatten Award for Best Book in the Maritime Media Awards 2021. The Routledge Companion to Marine and Maritime Worlds 1400-1800 explores early modern maritime history, culture and the current state of the research and approaches taken by experts in the field. Ranging from cartography to poetry and decorative design to naval warfare, the book shows how once traditional and often Euro chauvinistic depictions of oceanic mastery during the early modern period have been replaced by newer global ideas. This comprehensive volume challenges underlying assumptions by balancing its assessment of the consequences and accomplishments of European navigators in the era of Columbus, da Gama and Magellan with an awareness of the sophistication and maritime expertise in Asia, the Arab world and the Americas. By imparting riveting new stories and global perceptions of maritime history and culture, the contributors provide readers with fresh insights concerning early modern entanglements between humans and the vast unpredictable ocean. With maritime studies growing and the ocean's health in decline, this volume is essential reading for academics and students interested in the historicization of the ocean and the ways early modern cultures both conceptualized and utilized seas.
