Private Warfare in the Age of Sail Daniel K. Benjamin, 2013 Modern naval warfare is the exclusive province of government Until relatively recently however governments tolerated even encouraged private sector participation in maritime hostilities Naval and merchant vessels were not strongly differentiated from one another and neither type of vessel was well suited to all weather year round duty at sea When combined with rudimentary and relatively costly systems of taxation this gave monarchs an incentive to focus their naval ventures during good weather months and to rely on merchant ships as important supplements to the Crown's navy Thus until the eighteenth century privately owned and operated merchant vessels were used as men of war and they served in the war on enemy trade into the nineteenth century We seek to explain the observed variation in the key contractual provisions of privateer contracts by examining over 60 contracts from the period 1744 to 1807 gathered from the files of the Public Record Office in London We suggest reasons for many of the general patterns seen in the contracts notably we believe we have a remarkably simple yet powerful explanation for the enormous variation observed in the distribution of the prizes between the owners and crew We also provide a clearer picture of the variation in the distribution of prize shares among crew members using measures of inequality to compare different privateers' allotments Most importantly we have developed a method of using contractual provisions to infer the expectations of privateers regarding the prizes they were likely to capture We are then able to use these estimates to infer expected total earnings of seafarers at all levels of the chain of command One implication of these estimates is that crew serving on privateers could expect to earn substantially more than men serving on merchant ships For able seamen the privateering premium was at least fifty percent for higher ranks it likely was even greater

Warfare on the Mediterranean in the Age of Sail David S.T. Blackmore, 2014-01-10 Between the last battle fought entirely under oars in 1571 and the first fought entirely under steam in 1866 naval warfare in the Middle Seas and adjacent Atlantic waters was dominated by the sailing warship This exploration of that distinct period in military history begins with an overview of the galley warfare that dominated the Mediterranean for millennia and a discussion of the technological developments including the sail and the cannon which led to the galley's demise Subsequent chapters discuss the role of sailing ships in every major conflict on the Mediterranean from the 16th century Eighty Years War to the late 19th century Austro-Prussian Italian War In addition to the major battles the book also highlights smaller encounters between single ships or light squadrons important conflicts often overlooked in naval histories
