Navies in the Nuclear Age Norman Friedman, 1993 Consulting editor Norman Friedman This volume reflects broad themes such as types of warfare or aspects of equipment which cross many ship types *Navies in the Nuclear Age* Norman Friedman, 2001-08 By 1945 the threat to warships from above and below the water's surface had come to dominate naval strategic and tactical planning Although many of the traditional ship designations like cruisers, destroyers and frigates continue to be used they no longer imply a specific role This volume therefore emphasizes such broader themes as anti submarine warfare or electronics which involve many ship types **The Oxford Illustrated History of the Royal Navy** J. R. Hill, Bryan Ranft, 2002 Throughout its history the Royal Navy has been of great importance for the defense of Britain and has over the centuries entrenched itself in the national psyche making itself manifest not only through the hero worship of its principal characters such as Horatio Nelson and Sir Francis Drake but also finding expression through art, music and literature The Oxford Illustrated History of the Royal Navy is the definitive one volume history of the Royal Navy The text has now been updated for this paperback edition to cover more recent events and developments covering every aspect of naval history from the Anglo Saxon period to the dawn of the new millennium including terrorist attacks on New York and Washington and the subsequent retaliation on terrorist bases in Afghanistan With a full chronology which has been brought up to date to the end of 2001 and an extensive list of further reading this highly illustrated reference book gives an authoritative and highly readable account of a unique fighting service and its people US Navy Gun Destroyers 1945-88 Mark Stille, 2023-10-26 An illustrated history of the long Cold War careers of the US Navy's last gun destroyers from the modernized World War II era Fletcher class to the Forrest Sherman class The finest American destroyers of World War II had surprisingly long careers into the Cold War and the missile age The 175 strong Fletcher class was the largest class of US Navy destroyers ever built and most received some modernization after World War II A handful were converted into ASW Anti Submarine Warfare escorts and one was even converted into the US Navy's first guided missile destroyer Many Sumner class destroyers were also kept in service with the last decommissioned in 1973 The Gearing class was the classic US Navy wartime destroyer to have a second Cold War career some being modified into picket ships and others into ASW escorts Ninety five were extensively modernized under the Fleet Modernization and Rehabilitation FRAM program which allowed them to serve until 1980 The majority of these ships then saw service with foreign navies However the story of Cold War gun destroyers is not just one of World War II relics Commissioned in the 1950s the 18 ships of the Forrest Sherman class were the US Navy's last all gun destroyers and were considered to be the pinnacle of US Navy gun destroyer design Later in their careers most were modernized for ASW and anti-air warfare The virtually unknown Norfolk class was originally built as a destroyer leader and maximized for ASW but only two were modernized and the other three retired early Many of these ships such as USS Edson, Cassin Young and Turner Joy still survive as museum ships today Using battlescene artwork detailed

Oceans, Seas, Shorelines and Warfare Richard Harding,Ross Anderson,Mick de Ruyter,2024-09-23 For as long as humanity has ventured on the seas naval warfare has been an integral part of their activities and the focal point for many histories and ideas of heritage This book presents a rarely explored aspect the long term impact of those battles on shorelines seas and oceans Dramatic and altering the physical scars of battles remain with us today in the form of cultural landscapes and archaeological sites while the geopolitical consequences of warfare have been world changing The migrations of peoples across the seas accompanied by violence have done more to shape the demographic and cultural map of the modern world than almost anything else Both seaborne opportunities and threats have influenced the way of life of coastal communities Today technology has seen these threats extend far into the deepest ocean and reach across continents This book shows how despite being virtually invisible to an increasing percentage of the world s population the ocean is more significant now than it has ever been Ranging from the world of antiquity to the present day with a global perspective the volume is intended to appeal to those interested in history archaeology social sciences and the environment **The Royal Navy 1930-1990** Richard Harding,2004-11-25 This new book explores innovation within the Royal Navy from the financial constraints of the 1930s to World War Two the Cold War and the refocusing of the Royal Navy after 1990 Successful adaptation to new conditions has been critical to all navies at all times *British Aircraft Carriers 1945-2010* Angus Konstam,2023-04-27 The history of the Royal Navy flagships that led the fleet through the Cold War ensured victory in the Falklands War and saw action in Iraq and the Balkans In 1945 at the end of World War II the Royal Navy s carrier fleet proved essential to the post war world Royal Navy carriers fought in the Korean War with the UN fleet in the debacle at Suez and in British operations in the last days of Empire in Malaya Borneo and Aden But most famously they were the key to the Royal Navy s victory in the Falklands campaign and they went on to fight in the two Iraq wars Illustrated throughout with new profiles of the key carriers and their development as well as a cutaway of HMS Victorious and superb new illustrations of the carriers in action this book explains how the Royal Navy s air power changed throughout the Cold War and beyond Renowned naval historian Angus Konstam explains how the World War II carriers were rebuilt in a pioneering modernization that allowed them to operate a new generation of naval jets As carriers became more expensive to operate the Royal Navy had to scrap its conventional fast jets and introduce a new generation of light carriers designed for the innovative Harrier jump jet When the Falklands War broke out it was one of these new carriers and one veteran carrier from World War II that gave the Task Force the fighters it needed to defend itself in hostile waters and retake the islands Covering a period of

dramatic change for the Royal Navy this book is a history of the Royal Navy's most important ships throughout the Cold War the retreat from Empire and the Falklands and Iraq wars up to the moment Royal Navy fixed wing air power was temporarily axed in 2010
