Regulating Decision-Making in Multiple Pregnancy Jeffrey Wale, 2021-06-22 This book examines the regulation and practice of medical decision making where the context is that of a multiple pregnancy and where the question is whether or not to carry out a fetal reduction procedure It concerns three main lines of inquiry first the nature of fetal reduction and the legal grounds for termination typically relied upon secondly the extent to which legal ethical and professional norms guide or constrain this particular kind of decision making and thirdly the adequacy of these norms The book uses empirical sources to develop its analysis contributing new insight and the kind of evidence necessary to shape regulation clinical practice and future research The key findings show that fetal abnormality is often given as the justifying ground that the legal ethical and professional norms offer little explicit guidance for fetal reduction and on the general question of termination ethical norms suffer from a high level of contestation the key norms in the UK abortion legislation are unclear and disconnected from practice and professional norms are only marginally more adequate Given the indeterminacy of these norms it is no surprise that the evidence indicates that doctors are only weakly guided by them in making their decisions Various recommendations are advanced in this book including the need for a situational emphasis on shared decision making and patient centred care
