William Frank Ponder

New Zealand Trucks Historics Haulers And Heavies:

New Zealand Trucks Tim Chadwick, 2004-01-01 **Back on Track** Philip G. Laird, 2001 Australia's freight transport system now has the highest proportion of truck use of any developed country in the world and with New Zealand its cities are heavily dependent on cars **Back on Track** considers the historic economic and political issues that have led to this situation and concludes that the emergence of such a strongly road oriented system has not been in the national interest on both economic and environmental grounds It develops a detailed analysis of Australia's road transport deficit The authors suggest that rail is the neglected element in Australian and New Zealand transport systems and despite a history of policy paralysis they offer a rail based ten point plan that could see both countries transport systems back on track Using new data on transportation trends from Australia and around the world the book sets out a vision for the future of freight and inter capital transport in Australia and New Zealand and offers innovative transport strategies for each of the major cities in both countries
