Last Call for the African-American Church Chester Williams, 2014-12-24 Last Call for the African American Church revisits the commandment Jesus left his followers to proclaim the gospel worldwide until his return one that by all accounts is no longer a priority in the contemporary African American church Despite the presence of euphoric praise and worship celebrations and the proliferation of diverse ministries it advertises as cutting edge the implosion of missions has occurred in this church s pulpits and pews Selected biblical foundations of missions are provided for those new to the parlance and for others needing a refresher course Along with conventional missions distinctions Chester Williams logs some concepts in the glossary he himself has constructed for readers and for collegial review They include the feminization of missions rummage sale missions missions without Jesus and window dressing missions For the most part these concepts represent a radical departure from apostolic missions and are viewed as biblical tinkering and convolution most importantly as obstructions to the Great Commission world harvesting

Journal of Human Services Abstracts , 1977 **The Logics of Healthcare** Paul Lillrank, 2018-01-03 Most of the current literature on healthcare operations management is focused on importing principles and methods from manufacturing The evidence of success is scattered and nowhere near what has been achieved in other industries This book develops the idea that the logic of production and production systems in healthcare is significantly different A line of thing that acknowledges the ingenious characteristics of health service production is developed This book builds on a managerial segmentation of healthcare based on fundamental demand supply constellations Demand can be classified with the variables urgency severity and randomness Supply is constrained by medical technology accuracy of diagnostics efficacy of therapies patient health behavior co creation of health and resource availability Out of this emerge seven demand supply based operational types DSO prevention emergencies one visit electives cure care and projects Each of these have distinct managerial characteristics such as time perspective level of co creation value proposition revenue structure productivity and other key performance indicators KPI The DSOs can be envisioned as platforms upon which clinical modules are attached For example any Emergency Department ED must be managed to deal with prioritization time windows agitated patients the necessity to save and stabilize and variability in demand Specific clinical assets and skill sets are required for say massive trauma strokes cardiac events or

poisoning While representing different specialties of clinical medicine they when applied in the emergency context must conform to the demand supply based operating logic A basic assumption in this book is that the perceived complexity of healthcare arises from the conflicting demands of the DSO and the clinical realms The seven DSOs can neatly be juxtaposed on the much used Business Model Canvas BMC which postulates the business model elements as value proposition customer segments channels and relations key activities resources and partners the cost structure and the revenue model
