Popularizing Science Krishna R. Dronamraju, 2017 J B S Haldane 1892 1964 is widely appreciated as one of the greatest and most influential British scientists of the 20th century making significant contributions to genetics physiology biochemistry biometry cosmology and other sciences More remarkable then is the fact that Haldane had no formal qualification in science He made frequent appearances in the media making pronouncements on a variety of poignant topics including mining disasters meteorites politics and the economy and was a popular scientific essay writer Haldane also was famed for conducting painful experiments on himself including several instances in which he permanently injured himself A staunch Marxist and convert to Hinduism Haldane lived a diverse lively and interesting life that is still revered by today's science community A biography of Haldane has not been attempted since 1968 and that book provided an incomplete account of the man's scientific achievement The Life and Works of J B S Haldane serves to fix this glaring omission providing a complete biographical sketch written by Krishna Dronamraju one of the last living men to have worked personally with Haldane A new genre of biographies of 20th century scientists has come into being and thus far works have been written about men like Einstein Oppenheimer Bernal Galton and many more the inclusion of Haldane within this genre is an absolute necessity Dronamraju evaluates Haldane's social and political background as well as his scientific creativity and accomplishments Haldane embodies a generation of intellectuals who believed and promoted knowledge for its own sake and that spirit of scientific curiosity and passion is captured in this biography *Distinguished Family's Marriage Plot* Yi

Militarizing Outer Space Alexander C.T. Geppert, Daniel Brandau, Tilmann Siebeneichner, 2020-12-02 Militarizing Outer Space explores the dystopian and destructive dimensions of the Space Age and challenges conventional narratives of a bipolar Cold War rivalry Concentrating on weapons warfare and violence this provocative volume examines real and imagined endeavors of arming the skies and conquering the heavens The third and final volume in the groundbreaking European Astroculture trilogy Militarizing Outer Space zooms in on the interplay between security technopolitics and knowledge from the 1920s through the 1980s Often hailed as the site of heavenly utopias and otherworldly salvation outer space transformed from a promised sanctuary to a present threat where the battles of the future were to be waged Astroculture proved instrumental in fathoming forms and functions of warfare s futures past both on earth and in space The allure of dominating outer space the book shows was neither limited to the early twenty first century nor to current American space force rhetorics
