

OPEN DECISION FRAMEWORK

PHASE: LAUNCH

Steps you can take to be open

Begin with the end in mind

- Demonstrate alignment with Red Hat's strategy, mission, culture, and values
- Outline the steps you've taken to make this decision openly
- Highlight use of this framework
- Tell associates where to find detailed information
- Show how feedback shaped the decision or project
- Explain how to provide input after launch
- Acknowledge when you're not fully satisfied with the decision or know that others will not be
- Share your timeline or criteria for revisiting the decision
- Stay engaged with those who reject the decision

Default to open

- Reiterate relevant business requirements and constraints
- Share relevant legal, reporting, or confidentiality issues
- Communicate success criteria and publish relevant metrics

Contribute upstream

- Publish your methods, lessons learned, communications, and decision criteria to the archive, so others can review past decisions, learn why a decision was made, and see how leaders have responded to similar issues in the past
- Offer guidance to others on open decision making and choosing collaboration tools

Questions to ask

- How will we monitor mailing lists and other feedback channels after the launch?
- If we have done early releases, will we continue to make incremental improvements based on feedback?
- How willing are we to make revisions based on feedback?
- What's a reasonable window of time for additional input and refinement?
- Did we overlook something important? How do we address it?
- Does the decision need to be revisited?
- Did open decision-making lead to the desired outcomes (slide 5)?
- How can we share our lessons learned and encourage open decision-making at Red Hat?

Business Case Analysis with R Robert D. Brown III, 2018-03-01 This tutorial teaches you how to use the statistical programming language R to develop a business case simulation and analysis. It presents a methodology for conducting business case analysis that minimizes decision delay by focusing stakeholders on what matters most and suggests pathways for minimizing the risk in strategic and capital allocation decisions. Business case analysis often conducted in spreadsheets exposes decision makers to additional risks that arise just from the use of the spreadsheet environment. R has become one of the most widely used tools for reproducible quantitative analysis and analysts fluent in this language are in high demand. The R language traditionally used for statistical analysis provides a more explicit flexible and extensible environment than spreadsheets for conducting business case analysis. The main tutorial follows the case in which a chemical manufacturing company considers constructing a chemical reactor and production facility to bring a new compound to market. There are numerous uncertainties and risks involved including the possibility that a competitor brings a similar product online. The company must determine the value of making the decision to move forward and where they might prioritize their attention to make a more informed and robust decision. While the example used is a chemical company, the analysis structure it presents can be applied to just about any business decision from IT projects to new product development to commercial real estate. The supporting tutorials include the perspective of the founder of a professional service firm who wants to grow his business and a member of a strategic planning group in a biomedical device company who wants to know how much to budget in order to refine the quality of information about critical uncertainties that might affect the value of a chosen product development pathway. What You'll Learn: Set up a business case abstraction in an influence diagram to communicate the essence of the problem to other stakeholders. Model the inherent uncertainties in the problem with Monte Carlo simulation using the R language. Communicate the results graphically. Draw appropriate insights from the results. Develop creative decision strategies for thorough opportunity cost analysis. Calculate the value of information on critical uncertainties between competing decision strategies to set the budget for deeper data analysis. Construct appropriate information to satisfy the parameters for the Monte Carlo simulation when little or no empirical data are available. Who This Book Is For: Financial analysts, data practitioners, and risk business professionals also appropriate for graduate level finance, business, or data science students.

The European Impact Assessment and the Environment Kilian Bizer,Sebastian Lechner,Martin Führ,2010-08-03

This volume contains papers presented in a workshop of international experts in September 2008 in Berlin. The experts discussed how environmental consequences of EU legislation can be incorporated in a more effective way. In other words, this contribution focuses on the question of which measures can strengthen the consideration of environmental effects in the EU impact assessment procedure and in the subsequent legislative decision making process. This allows drawing conclusions for the impact assessment process in Germany. This volume begins with an introductory paper by Bizer Lechner, which served as the basis for discussion in our workshop. The questions raised in this paper are addressed by the authors of the subsequent chapters. Stephen White, DG Environment, EU Commission, discusses the impact assessment from an internal perspective within the Commission. Pendo Maro, European Environmental Bureau, reviews the impact assessment practice from the perspective of an environmental NGO. Martin Schmidt et al. discuss the potential for more formalism to strengthen environmental issues within impact assessments and favour a checklist.

The UN Convention on the Rights of Persons with Disabilities and the European Union Carmine Conte, 2022-02-24. This book analyses the impact of the UN Convention on the Rights of Persons with Disabilities (CRPD) on EU non-discrimination law and governance. The CRPD places the protection of persons with disabilities at the heart of international human rights law. The Convention is the first human rights treaty open for signatures by regional organisations and the European Union favourably acceded to it in December 2010. Ten years after this historic event, this book explores whether the theory has been put into practice and examines the effects of the CRPD on EU non-discrimination law and governance. This book brings together the practices of the European Court of Justice (CJEU) with regard to disability discrimination to show whether the CRPD is living up to its full potential to substantially improve the protection of the rights of persons with disabilities in the EU. It examines whether the judicial interpretation of the Directive 2000/78/EC, establishing a general framework for equal treatment in employment and occupation, does or does not comply with the new legal background delineated by the CRPD. In addition, it investigates whether the governance mechanisms underlying the EU Framework for promoting, protecting and monitoring the CRPD are effectively fostering the implementation of the CRPD and the role of civil society. The prohibition of discrimination on grounds of disability has undergone substantial changes and developments since it was first introduced under international and EU law. This book highlights the main changes to disability discrimination which have occurred in the EU legal order in the last ten years. The book will be of interest to academics, law students and legal practitioners working in the field of EU non-discrimination and equality law.

Business Improvement Districts in the United States Abraham Unger,2016-11-12 This book examines how privatization has transformed cities particularly through the role of

Business Improvement Districts (BIDs) in the revitalization of America's downtown. These public-private partnerships between property owners and municipal government have developed retail strips across the United States into lifestyle and commercial hubs. BIDs are non-profit community organizations with the public power to tax and spend on services in their districts but they are unelected bodies often operating in the shadows of local government. They work as agents of economic development but are they democratic? What can we learn from BIDs about the accountability of public-private partnerships and how they impact our lives as citizens? Unger explores these questions of local democracy and urban political economy in this age of rampant privatization and the reinvention of neighborhoods.
