Opening and Closing the Doors Frank D. Bean, Georges Vernez, Charles B. Keely, 1989 **Deciding to be Legal**

Jacqueline Maria Hagan, 1994 To study the settlement process of undocumented migrants Jacqueline Hagan examines one of Houston's Maya communities the approximately 900 Maya from a township in the Department of Totonicapán Guatemala She traces this Maya community from its genesis in 1978 when a few men left the township in search of economic opportunity to the complex effects of the 1986 Immigration Reform and Control Act IRCA Based on several years of living and participating in the Totonicapán Maya community in Houston and a visit to the Guatemalan home community Hagan's research combines interviews community participation and observation to evaluate immigration policy Hagan shows that these immigrants do not passively accept U.S. immigration policy but instead interpret it and base their actions on their own agenda within the context of their local community The results often quite unexpected by national policy makers question popular myths about the settlement of immigrant communities The author discusses the different settlement experiences of men and women and the effects of IRCA on family and community structure Analyzing how legal status influences settlement behavior and international networks she finds that strong community based networks and social ties with a home community lead to successful adaptation Author note Jacqueline Maria Hagan is Assistant Professor of Sociology at the University of Houston

On the Move Filiz Garip, 2019-05-28 Why do Mexicans migrate to the United States Is there a typical Mexican migrant Beginning in the 1970s survey data indicated that the average migrant was a young unmarried man who was poor undereducated and in search of better employment opportunities This is the general view that most Americans still hold of immigrants from Mexico On the Move argues that not only does this view of Mexican migrants reinforce the stereotype of their undesirability but it also fails to capture the true diversity of migrants from Mexico and their evolving migration patterns over time Using survey data from over 145 000 Mexicans and in depth interviews with nearly 140 Mexicans Filiz Garip reveals a more accurate picture of Mexico U S migration In the last fifty years there have been four primary waves a male dominated migration from rural areas in the 1960s and 70s a second migration of young men from socioeconomically more well off families during the 1980s a migration of women joining spouses already in the United States in the late 1980s and 90s and a generation of more educated urban migrants in the late 1990s and early 2000s For each of these four stages Garip examines the changing variety of reasons for why people migrate and migrants perceptions of their opportunities in

Bean,1997-03-27 Mexico is becoming increasingly important as a focus of U S immigration policy and the movement of people across the U S Mexico border is a subject of intense interest and controversy The U S approach to cross border flows is in flux the economic climate in Mexico is uncertain and relations between the two neighbors have entered a new stage with the launching of NAFTA This volume draws together original essays by distinguished scholars from a variety of disciplines and both sides of the border to examine current impetuses to migration and policy options for Mexico and the U S Migration Past, Migration Future Klaus J. Bade,Myron Weiner,2001-08-01 The United States is an immigrant country Germany is not This volume shatters this widely held myth and reveals the remarkable similarities as well as the differences between the two countries Essays by leading German and American historians and demographers describe how these two countries have become to have the largest number of immigrants among advanced industrial countries how their conceptions of citizenship and nationality differ and how their ethnic compositions are likely to be transformed in the next century as a consequence of migration fertility trends citizenship and naturalization laws and public attitudes Handbook of Population Dudley L. Poston,Michael Micklin,2006-08-10 This comprehensive handbook provides an overview and update of the issues theories processes and applications of the social science of population studies The volume s 30 chapters cover the full range of conceptual empirical disciplinary and applied approaches to the study of demographic phenomena This book is the first effort to assess the entire field since Hauser and Duncan s 1959 classic The Study of Population The chapter authors are among the leading contributors to demographic scholarship over the past four decades They represent a variety of disciplines and theoretical perspectives as well as

interests in both basic and applied research **Creating Africa in America** Jacqueline Copeland-Carson, 2012-03-13 With a booming economy that afforded numerous opportunities for immigrants throughout the 1990s the Twin Cities area has attracted people of African descent from throughout the United States and the world and is fast becoming a transnational metropolis Minnesota's largest urban area the region now also has the country's most diverse black population A closely drawn ethnography *Creating Africa in America* Translocal Identity in an Emerging World City seeks to understand and evaluate the process of identity formation in the context of globalization in a way that is also site specific Bringing to this study a rich and interesting professional history and expertise Jacqueline Copeland Carson focuses on a Minneapolis based nonprofit the Cultural Wellness Center which combines different ethnic approaches to bodily health and community well being as the basis for a shared translocal African culture The book explores how the body can become a surrogate locus for identity thus displacing territory as the key referent for organizing and experiencing African diasporan diversity Showing how alternatives are created to mainstream majority and Afrocentric approaches to identity she addresses the way that bridges can be built in the African diaspora among different African immigrant African American and other groups As this thoughtful and compassionate ethnographic study shows the fact that there is no simple and concrete way to define how one can be African in contemporary America reflects the tangled nature of cultural processes and social relations at large Copeland Carson demonstrates the cultural creativity and social dexterity of people living in an urban setting and suggests that anthropologists give more attention to the role of the nonprofit sector as a forum for creating community and identity throughout African diasporan history in the United States The Demography of Health and Health Care Louis G. Pol, Richard K. Thomas, 2012-12-06 The 1980s witnessed the emergence of an applied subdiscipline within demography that is coming to be termed health demography As yet there is no distinct body of research formally categorized under this heading nor are there professionals who bear the title of health demographer In fact most of those involved with health demography are not demographers but sociologists economists epidemiologists and others who are applying concepts and techniques from demography to concrete problems in the delivery of health care Nevertheless the vague boundaries of this subdiscipline are becoming increasingly visible and the 1990s promise to be the era of health demography Many factors have contributed to the emergence of this new field The transition the health care industry underwent during the 1980s served to modify dramatically the mindset of those in health care from one based on a philanthropic orientation to a highly competitive business orientation Almost overnight the industry became market driven and consumer oriented resulting in an explosion in the demand for both demographic data and health statistics The need to integrate and interpret data from these two fields has provided a major impetus for the development of health demography At the same time the redefining of health and illness along lines more in keeping with a social than a clinical perspective and the reconceptualization of etiology within a lifestyles framework have further emphasized the need for health demography
