## **Realism And Racism Concepts Of Race In Sociological Research:**

**Realism and Racism** Bob Carter,2002-01-04 There are continuing difficulties within social science surrounding concepts of race This book suggests that these difficulties stem from the uncertain ontological and epistemological status of ideas about race itself a consequence of the recognition that concepts of race have all but lost their relevance as sociologically significant descriptions This book surveys ways in which social scientists have attempted to come to terms with this situation before developing an alternative approach based on recent work by realist authors This approach offers a radical revision of orthodox debates about race concepts about the possibility of a social science and about the nature of empirical research This illustrated through two policy examples an account of post war migration to the UK and debates about trans racial adoption in the UK and the USA

**Qualitative Research in European Migration Studies** Ricard Zapata-Barrero, Evren Yalaz,2018-06-19 This open access book covers the main issues challenges and techniques concerning the application of qualitative methodologies to the study of migration It discusses theoretical epistemological and empirical questions that must be considered before during and after undertaking qualitative research in migration studies It also covers recent innovative developments and addresses the key issues and major challenges that qualitative migration research may face at different stages i e crafting the research questions defining approaches developing concepts and theoretical frameworks mapping categories selecting cases dealing with concerns of self reflection collecting and processing empirical evidence through various techniques including visual data dealing with ethical issues and developing policy research dialogues Each chapter discusses relative strengths and limitations of qualitative research The chapters also identify the main drivers for qualitative research development in migration studies It is a unique volume as it brings together a multidisciplinary perspective as well as illustrations of different issues derived from the research experience of the recognized authors One additional value of this book is its geographic focus on Europe It seeks to explore theoretical and methodological issues that are raised by distinctive features of the European context This volume will be a useful reference source for scholars and professionals in migration studies and in social sciences as well The publication is also addressed to graduate and post graduate students and more generally to those who embark on the task of doing qualitative research for the first time in the field of migration

Qualitative Methods in Migration Studies Dr Theodoros Iosifides,2013-01-28 Recent years have witnessed growing interest in a series of issues related to migration including identity formation and change the role of social capital and social networks ethnic discrimination racism and xenophobia socio political participation and mobilisation and the complex nature of the causal mechanisms linked to migration issues that are better highlighted and investigated using qualitative methods Moving away from the quantitative and empiricist positivist approaches that have often characterised migration research Qualitative Methods in Migration Studies explores in a concise but comprehensive way the key issues involved in researching migratory phenomena in a qualitative manner It addresses themes including the

basic characteristics of contemporary migration qualitative research into social processes related to migration and the relationship between theory research design and practice Drawing upon empirical case studies and a series of real and hypothetical examples the book develops a critical realist alternative both to empiricism and interpretivist social constructionist and post structuralist relativism in qualitative migration research With special emphasis on the meta theoretical dimensions of qualitative research practice this volume connects qualitative findings to policy formation and politics making exploring the multiple dimensions involved in researching migratory phenomena such as ontology epistemology methodology ethics and research practice As such it will be of interest to students and researchers in migration across the social sciences

ideas about language Language as a cultural emergent property Researching language learning theories evidence claims Social categories and theoretical descriptions Social domain theory interpreting intercultural communication Language in the world properties and powers A social realist approach to research in applied linguistics *In the Province of History* Ian McKay, Robin Bates, 2010-05-18 Using archival sources novels government reports and works on tourism and heritage Ian McKay and Robin Bates look at how state planners key politicians and cultural figures such as Henry Wadsworth Longfellow long time premier Angus L Macdonald and novelist Thomas Raddall were all instrumental in forming tourism history The authors argue that Longfellow's 1847 poem *Evangeline* on the brutal British expulsion of Acadians from Nova Scotia became a template a new kind of profit making history that exalted whiteness and excluded ethnic minorities women and working class movements A remarkable look at the intersection of politics leisure and the presentation of public history In the Province of History is a revealing account of how a region has both used and distorted its own past **Classifying**

**Genocide in International Law** Onur Uraz, 2022-08-05 This book offers an in depth examination into genocide law by focusing on one of the lesser examined yet practically significant issues the substantiality requirement This refers to the requirement in international law that intended destruction should be directed towards a substantial part of a protected group in order for an atrocity to qualify as genocide This comprehensive and detailed study draws connections between different judicial approaches to substantiality and the varying theoretical presumptions about the constitutive concepts of the crime This prima facie doctrinal problem is used as a springboard to scrutinise the broader theoretical problems underlying the legal conceptualisation of genocide The book systematically explores how the individualistic and collectivistic conceptions of the crime have been able to co exist in case law and how the different approaches to assessing substantiality have played a backdoor role between these two conceptions The work demonstrates that these two philosophical standpoints are far from effectively representing the reality of the protected groups and fully explaining the harm inherent to group destruction The book revisits the recent philosophical and sociological studies on the crime and considering ideas from the emerging relational approaches to genocide offers a third way to understand the existing legal representation of the crime and consequently the idea of substantiality It demonstrates the practical significance of its theoretical debates and applies its novel perspective through a case study on South Sudan This book will be highly useful to students and scholars with an interest in genocide studies international criminal law and legal theory It will also be of interest to policymakers engaged with issues around genocide Critical Realist Applications in Organisation and Management Studies Stephen

Ackroyd, Steve Fleetwood, 2005-12 This book extends critical realism by showing how it has been applied to topics in critical management studies accountancy marketing health care management operations research the nature of work HRM labour process and more **Racialization** Karim Murji, John Solomos, 2005 Racialization has become one of the central concepts in the study of race and racism It is widely used in both theoretical and empirical studies of racial situations There has been a

proliferation of texts that use this notion in quite diverse ways It is used broadly to refer to ways of thinking about race as well as to institutional processes that give expression to forms of ethno racial categorization An important issue in the work of writers such as Robert Miles for example concerns the ways in which the construction of race is shaped historically and how the usage of that idea forms a basis for exclusionary practices The concept therefore refers both to cultural or political processes or situations where race is invoked as an explanation as well as to specific ideological practices in which race is deployed It is evident however that despite the increasing popularity of the concept of racialization there has been relatively little critical analysis exploring its theoretical and empirical usages It is with this underlying concern in mind that *Racialization Studies in Theory and Practice* brings together leading international scholars in the field of race and ethnicity in order to explore both the utility of the concept and its limitations

*The Rise and Fall of the Caucasian Race* Bruce Baum, 2008-07 Originating in 1795 the term Caucasian identifies both the peoples of the Caucasus Mountains region as well as those thought to be Caucasian This text explores the history of the term and the category of the Caucasian race more broadly in light of the changing politics of racial theory and identity

*Reorienting Economics* Tony Lawson, 2012-08-21 Contemporary economics is characterized by a mismatch between its methods of analysis and the nature of the world it seeks to interpret Despite regular economic crises and ongoing critique of the discipline the drift from political economy into applied mathematics appears to continue unabated In this book Tony Lawson advocates a realignment of economics with social reality In analyzing mainstream economists misplaced universality the author places ontology at the heart of a reoriented future in which economics is integrated within the wider human and social sciences

### **In Defence of Objectivity** Andrew

Collier, 2004-03-01 First Published in 2004 This volume addresses the interlocking themes of realism objectivity existentialism and eco socialist politics based on critical realism However it moves beyond the purely scientific orientation of earlier contributions to this philosophy to further develop the themes The title essay defends objectivity in science everyday knowledge and ethics and examines both subjective idealism and existentialist critiques of objectivity The other essays examine some of the same themes but from different angles keeping the politics of the issues at the forefront

*On Christian Belief* Andrew Collier, 2003-08-29 First Published in 2004 *On Christian Belief* offers a defence of realism in the philosophy of religion It argues that religious belief with particular reference to Christian belief is not something unlike any other kind of belief but is cognitive making claims about what is real and is open to rational discussion between believers and non believers The author begins by providing a critique of several views which try either to describe a faith without cognitive context or to justify believing on non cognitive grounds He then discusses what sense can be made of the phenomenon of religious conversion by realists and non realists After a chapter on knowledge in general he defends the idea that religious knowledge is very like other knowledge in being based on reliable testimony sifted by reason and tested by experience The logical status of the content of religious belief is then discussed with reference to Christianity
