Reality Idealism:

Idealism and the Harmony of Thought and Reality Thomas Hofweber, 2023 Do human beings have a special place in reality Thomas Hofweber argues that we are special because there is an intimate connection between our human minds and reality itself His form of idealism holds that our minds constrain but do not construct reality which is the totality of facts things taken to be completely independent of us

Manifest Reality Lucy Allais, 2015-09-03 At the heart of Immanuel Kant's critical philosophy is an epistemological and metaphysical position he calls transcendental idealism the aim of this book is to understand this position Despite the centrality of transcendental idealism in Kant's thinking in over two hundred years since the publication of the first Critique there is still no agreement on how to interpret the position or even on whether and in what sense it is a metaphysical position Lucy Allais argue that Kant's distinction between things in themselves and things as they appear to us has both epistemological and metaphysical components He is committed to a genuine idealism about things as they appear to us but this is not a phenomenalist idealism He is committed to the claim that there is an aspect of reality that grounds mind dependent spatio temporal objects and which we cannot cognize but he does not assert the existence of distinct non spatio temporal objects A central part of Allais's reading involves paying detailed attention to Kant's notion of intuition and its role in cognition She understands Kantian intuitions as representations that give us acquaintance with the objects of thought Kant's idealism can be understood as limiting empirical reality to that with which we can have acquaintance He thinks that this empirical reality is mind dependent in the sense that it is not experience transcendent rather than holding that it exists literally in our minds Reading intuition in this way enables us to make sense of Kant's central argument for his idealism in the Transcendental Aesthetic and to see why he takes the complete idealist position to be established there This shows that reading a central part of his argument in the Transcendental Deduction as epistemological is compatible with a metaphysical idealist reading of transcendental idealism

My Universe-A Transcendent Reality Alex Vary, 2011-11-21 A theme throughout My Universe is that our consciousness exists simultaneously in transcendent and material domains The gift and power of transcendent consciousness is that we apparently share it with extraterrestrial beings everywhere in the cosmos Author Vary describes sub quantum hyperspace phenomena that enable and mediate our communion with extraterrestrials These reflections prompted Vary to muse that in this sense we are all extraterrestrials Our consciousness transcends the material and elevates and entwines our spirits My Universe A Transcendent Reality is a literary work with profound technological and teleological overtones Vary s prophetic prose poesy essays combine physics metaphysics cosmology theology and philosophy He offers extraordinary radical ideas that can expand our dominion over nature and promote self realization Vary s book differs from others of its genera because it presents a rational basis for understanding the transcendent reality that influences our lives and by which we can enhance our interpersonal relations and infinite potentials My Universe describes the foundation for perceiving a transcendent reality with quantum phenomena which we may experimentally observe as evidence of the intertwining of the transcendent and material From this foundation we may realize transcendent communications with extraterrestrial beings This is because there is a bond between transcendent reality and material reality between transcendent human consciousness and extraterrestrial reality which are seemingly separated only by a tenuous hyperspace interface that may be traversed by advanced human techniques Describes paradigms that enable and implement our transcendent consciousness and our relation to and contact with extraterrestrial worlds and beings Gives entertaining provocative clarification of great ideas in cosmology philosophy theology sociology evolution metaphysics and sub quantum physics Speaks to all cultures innovators writers poets artists scientists explains the nature of our world so that we may better apply our infinite potentials Promotes broadening of one s spiritual self realization challenging revolutionary transformational and inspiring needed in

Personal Reality, Volume 2 Daniel Paksi,2020-01-01 Western civilization was built on the concept of God Today modern science based on the critical method and so called objective facts denies even the existence of our soul There is only matter atoms molecules and DNA sequences There is no freedom there are no well grounded beliefs The decline of Western civilization is not the simple consequence of decadence hedonism and malevolence Modern critical science has liberated us from the old dogmas but failed to establish our freedoms values and beliefs However human knowledge is not objective but personal We are the children of evolution Everybody sees the world from his own personal point of view anchored into his her body We use our billions of years old evolutionary skills and thousands of years old

cultural heritage to recognize and acknowledge the personal facts of our reality freedom and most important natural beliefs respect and speak the truth In reality even science itself is based on our personal knowledge Only our false conceptual dichotomies paralyze our thinking God or matter there is a third choice the emergence of life and human persons This is the only way to defend our freedoms and the Christian moral dynamism of free Western societies **Ethics, Morality, and Human Nature** Hector Davidson, This is a bundle of the following books Aesthetics Analytic Philosophy Critical Theory Cynicism Determinism Humanism Idealism Liberalism Moral Philosophy Naturalism Nihilism Parmenides Phenomenology Structuralism Utilitarianism **The Turn Around Religion in America** Michael P. Kramer, 2016-02-24 Playing on the frequently used metaphors of the turn toward or turn back in scholarship on religion The Turn Around Religion in America offers a model of religion that moves in a reciprocal relationship between these two poles In particular this volume dedicates itself to a reading of religion and of religious meaning that cannot be reduced to history or ideology on the one hand or to truth or spirit on the other but is rather the product of the constant play between the historical particulars that manifest beliefs and the beliefs that take shape through them Taking as their point of departure the foundational scholarship of Sacvan Bercovitch the contributors locate the universal in the ongoing and particularized attempts of American authors from the seventeenth century forward to get it whatever that it might be right Examining authors as diverse as Pietro di Donato Herman Melville Miguel Algarin Edward Taylor Mark Twain Robert Keayne Nathaniel Hawthorne Paule Marshall Stephen Crane Ralph Waldo Emerson and Joseph B Soloveitchik among many others and a host of genres from novels and poetry to sermons philosophy history journalism photography theater and cinema the essays call for a discussion of religion s powers that does not seek to explain them as much as put them into conversation with each other Central to this project is Bercovitch s emphasis on the rhetoric ritual typology and symbology of religion and his recognition that with each aesthetic enactment of religion s power we learn something new **The Turn Around Religion in America** Professor Michael P Kramer, Professor Nan Goodman, 2013-05-28 Playing on the frequently used metaphors of the turn toward or turn back in scholarship on religion The Turn Around Religion in America offers a model of religion that moves in a reciprocal relationship between these two poles In particular this volume dedicates itself to a reading of religion and of religious meaning that cannot be reduced to history or ideology on the one hand or to truth or spirit on the other but is rather the product of the constant play between the historical particulars that manifest beliefs and the beliefs that take shape through them Taking as their point of departure the foundational scholarship of Sacvan Bercovitch the contributors locate the universal in the ongoing and particularized attempts of American authors from the seventeenth century forward to get it whatever that it might be right Examining authors as diverse as Pietro di Donato Herman Melville Miguel Algarin Edward Taylor Mark Twain Robert Keayne Nathaniel Hawthorne Paule Marshall Stephen Crane Ralph Waldo Emerson and Joseph B Soloveitchik among many others and a host of genres from novels and poetry to sermons philosophy history journalism photography theater and

cinema the essays call for a discussion of religion's powers that does not seek to explain them as much as put them into conversation with each other Central to this project is Bercovitch's emphasis on the rhetoric ritual typology and symbology of religion and his recognition that with each aesthetic enactment of religion's power we learn something new Presbyterian Banner, 1907 Understanding Reality Nicholas Rescher, 2018-08-15 The book seeks to show that the present discussion so unfolds as to show that ultimately Reality's inherent impetus to lawful order serves also to account for its existence The ultimate explanation of its order is as something that also provides for its reason for being Step by step a train of thought unfolds to indicate that Reality both exists and has the nature it does for good reason and specifically because this is somehow for the best Such an approach goes back to the Platonism of classical antiquity Many difficulties lie in the way of its acceptance But in the final analysis the theory that works here takes the form of a Neo Platonism of sorts Or if reality has any rational explanation at all it is one that will have to proceed along these lines based upon rationality itself An underlying theme that runs throughout the present elaboration of metaphysics is the dialectic of interaction between descriptive facts on the one hand and normative ideals on the other On such a view it is a salient factor in metaphysics that reality as such is descriptively constituted as a potentially perfect system of knowledge even though we imperfect beings cannot get a more than an imperfectly secure cognitive grip on it Accordingly we can never hope to surmount the contrast between The metaphysical ideal of a perfected system of knowledge The imperfect realization of actuality that we can ever hope to achieve in practice
