Handbook of Effective Inclusive Schools James McLeskey, Fred Spooner, Bob Algozzine, Nancy, L. Waldron, 2014-05-16 Over the last decade the educational context for students with disabilities has significantly changed primarily as a result of mandates contained in NCLB and IDEA The purpose of this book is to summarize the research literature regarding how students might be provided classrooms and schools that are both inclusive and effective Inclusive schools are defined as places where students with disabilities are valued and active participants in academic and social activities and are given supports that help them succeed Effectiveness is addressed within the current movement toward multi tiered systems of support and evidence based practices that meet the demands of high stakes accountability

Direct Instruction: A practitioner's handbook Kurt Engelmann, 2024-04-05 Direct Instruction DI is a powerful instructional approach designed to ensure that students master critical skills and content required for more advanced learning Although

DI has existed since the late 1960s there are many common misconceptions about the approach its potential to enhance student learning and the way its proper implementation facilitates students academic success This book provides a systematic explanation of the Direct Instruction methodology and DI program design as it outlines a roadmap for teachers and school leaders on how to implement DI successfully Divided into three main sections the first section describes DI as a coherent and complete teaching and learning system that contrasts DI with lower case di or explicit instruction which focuses on effective instructional delivery techniques The second section provides a step by step guide to implementing DI The third section is devoted to cautions about implementing DI This section reinforces the notion that the physical possession of the DI curricula does not by itself lead to student success Those who adopt DI need to ensure that it is implemented with fidelity for the benefit of their students who are reliant on them to provide them with the means to achieve their academic potential so they may lead healthy productive lives

Validated Practices for Teaching Students with Diverse Needs and Abilities Susan Peterson Miller, 2002 Dedicated to research based practices only as opposed to opinion based practices this text provides in depth coverage of validated methods that may be applied to teaching across all the content areas The authors emphasize effective teaching behaviors regardless of the content being taught This book helps bridge the research to practice gap and includes Less is More Approach Limiting content to validated practices results in more thorough descriptions of the selected practices than what is typically found in methods books Models The organizational structure of the book reflects the sequential process involved in effective teaching and learning i e Planning Instruction Delivering Instruction and Evaluating Student and Teacher Performance Formative review questions are provided after Chapters 3 7 and 10 and a summative review is provided after Chapter 10 to promote synthesis and retention of important concepts Each chapter is organized to model effective pedagogy Overarching Themes The content is grounded in overarching themes i e student diversity importance of quality instruction technology applications and career long learning among teachers that reflect accurate understandings of current school contexts
