Reasoning Voter Communication And Persuasion In Presidential Campaigns:

The Reasoning Voter Samuel L. Popkin, 2024-05-31 The Reasoning Voter is an insider's look at campaigns candidates media and voters that convincingly argues that voters make informed logical choices Samuel L Popkin analyzes three primary campaigns Carter in 1976 Bush and Reagan in 1980 and Hart Mondale and Jackson in 1984 to arrive at a new model of the way voters sort through commercials and sound bites to choose a candidate Drawing on insights from economics and cognitive psychology he convincingly demonstrates that as trivial as campaigns often appear they provide voters with a surprising amount of information on a candidate's views and skills For all their shortcomings campaigns do matter Professor Popkin has brought V O Key's contention that voters are rational into the media age This book is a useful rebuttal to the cynical view that politics is a wholly contrived business in which unscrupulous operatives manipulate the emotions of distrustful but gullible citizens The reality he shows is both more complex and more hopeful than that David S Broder The Washington Post

Studies of Identity in the 2008 Presidential Campaign Robert E. Denton Jr., 2010-06-14 To simply say the 2008 presidential election was historic seems like an understatement The election was unique in many ways beyond the selection of the nation's first African American as President The drama of the election was also heightened by the historic nomination battle between Hillary Clinton and Barack Obama The contest generated issues of race and gender throughout the campaign as did the candidacy of Sarah Palin as the Republican Vice Presidential nominee And John McCain brought his own unique qualities to the campaign Vietnam War hero long term Congressional service record feisty temperament and the oldest first time presidential candidate to run for the Presidency Thus issues of race gender and age dominated the campaign both implicitly and explicitly The candidacies of Clinton Obama McCain and Palin provided the context and dynamics for charges of racism sexism and ageism **Studies of Identity in the 2008 Presidential Campaign** explores issues of identity politics and the presidential election Investigating all aspects of race gender or ageism the contributors to this volume address the role and function of identity politics in political campaigns and highlight challenges of identity politics in contemporary political campaigns

Campaigns and Voters in Developing Democracies Noam Lupu, Virginia Oliveros, Luis Schiumerini, 2019-02-26 Voting behavior is informed by the experience of advanced democracies yet the electoral context in developing democracies is significantly different Civil society is often weak poverty and inequality high political parties ephemeral and attachments to them weak corruption rampant and clientelism widespread Voting decisions in developing democracies follow similar logics to those in advanced democracies in that voters base their choices on group affiliation issue positions valence considerations and campaign persuasion Yet developing democracies differ in the weight citizens assign to these considerations Where few social identity groups are politically salient and partisan attachments are sparse voters may place more weight on issue voting Where issues are largely absent from political discourse valence considerations and campaign effects play a larger role **Campaigns and Voters in Developing Democracies** develops a theoretical framework to

specify why voter behavior differs across contexts **Campaign Warriors** James A. Thurber, Candice J. Nelson, 2001-09-19 Campaign politics has become increasingly professionalized in recent years The growing prevalence and influence of paid consultants in the United States and other democracies is one of the most important factors changing the nature of electoral politics Campaign Warriors thoroughly examines this critical and controversial development and its impact on the political system in the U S and other countries The contributors approach the topic from several different perspectives including the increasing use of spin doctors and the resulting loss of influence of state and national political parties The book investigates the role of these paid advisers who they are what they do and why and how they feel about their work The contributors discuss the consultant s relationship with candidates and parties and analyze the effect of their efforts on election outcome

Campaign Reform Larry M. Bartels, Lynn Vavreck Lewis, 2010-08-04 What is wrong with American political campaigns How could the campaign process be improved This volume brings the expertise of leading political scientists to the public debate about campaign reform These scholars probe the reality behind the conventional wisdom that nasty vacuous campaigns dominated by big money and cynical media coverage are perverting our political process and alienating our citizenry Some of their conclusions will be startling to campaigners and critics alike For example attack advertisements prove to be no more effective than self promotional advertisements but are more substantive Indeed candidates in their advertisements and speeches focus more on policy and less on strategy and process than any major news outlet including the New York Times The volume suggests that as a result prospective voters in 1996 knew more about the candidates issue positions than in any presidential election in decades yet turnout and public faith in the electoral process continued to decline For aspiring reformers Bartels and his colleagues provide a bracing reality check For students and scholars of electoral politics political communication and voting behavior they provide an authoritative summary and interpretation of what we know about the nature and impact of political campaigns The insights and evidence contained in this volume should be of interest to anyone concerned about the present state and future prospects of American electoral process Larry M Bartels is Professor of Politics and Public Affairs and Stuart Professor of Communications and Public Affairs in the Woodrow Wilson School Princeton University Lynn Vavreck is Assistant Professor of Government Dartmouth College Other contributors are Bruce Buchanan Tami Buhr Ann Crigler John G Geer Kathleen Hall Jamieson Marion Just Daron R Shaw and John Zaller The Damming of the Presidency Frederick D. medical experts are scrambling to develop a vaccine Undoubtedly economic social and political landscapes are being redefined including their impact on presidential elections Thus a seminal question surfaces How do force majeure events impact a political campaign Other studies have yielded general assessments regarding presidential decision making during unforeseen events notably with 9 11 and Hurricane Katrina This book offers a vanguard approach by applying a historical lens and seeking to test the axiom of Farley s Law This important law suggests that peoples minds are made up at least six months before a national election and no matter how poorly situations develop party allegiance is supreme *Young v. Old* Susan A. Collective Preferences in Democratic Politics Scott L. Althaus, 2003-09-08 Since so few people appear knowledgeable

about public affairs one might question whether collective policy preferences revealed in opinion surveys accurately convey the distribution of voices and interests in a society This study the first comprehensive treatment of the relationship between knowledge representation and political equality in opinion surveys suggests some surprising answers Knowledge does matter and the way it is distributed in society can cause collective preferences to reflect disproportionately the opinions of some groups more than others Sometimes collective preferences seem to represent something like the will of the people but frequently they do not Sometimes they rigidly enforce political equality in the expression of political viewpoints but often they do not The primary culprit is not any inherent shortcoming in the methods of survey research Rather it is the limited degree of knowledge held by ordinary citizens about public affairs Accounting for these factors can help survey researchers journalists politicians and concerned citizens better appreciate the pitfalls and possibilities for using opinion polls to represent the people s voice

Politics Is a Joke! S. Robert Lichter, Jody C Baumgartner, Jonathan S. Morris, 2018-09-03 Does late night political humor matter Are late night comedians merely entertaining or do they have the power to influence the way we think about politics and politicians Politics Is a Joke situates late night comedy in the historical context of political humor and demonstrates how the public turn to this venue for political information and are in turn affected by it Using exclusive data collected by the Center for Media and Public Affairs the authors conduct a detailed and exhaustive analysis of political jokes on late night TV shows dating back to 1992 in order to pinpoint the main targets and themes of late night comedy Politics Is a Joke uses a wide range of examples from jokes about politicians physical appearance and sex scandals to jokes about Congress and even the news media to assess and understand the impact of political humor on political institutions politicians and their policies and behavior Engagingly written with analysis of jokes from comedians like Jay Leno Conan O'Brien Jon Stewart and Stephen Colbert Politics is a Joke is essential reading for anyone who wants to understand the crucial role late night comedy plays in our political universe and anyone

who enjoys a good laugh **Picking Presidents** Gautam Mukunda,2022-10-18 This book synthesizes a new way of understanding leader selection with research from political science management psychology and other fields to provide an objective non partisan way to evaluate Presidential candidates that anyone can use and that requires only information about candidates that would be widely available before the election It s a system that American citizens can use to answer the most important question they are ever asked Should this person be President We begin by identifying what sort of presidential candidates are likely to become Presidents who will make a real difference Surprisingly not all Presidents do Some despite the awesome power placed in their hands are surprisingly inconsequential Then we ll examine some of the best and worst of the 44 members of history s most exclusive club which will help us understand what traits are likely to produce failed and successful presidencies and how to detect them Next we ll use this lens to examine Donald Trump the modern president who has perhaps inflamed the most intense passions on either end of the political spectrum and Joe Biden the President as this book goes to print Finally I will suggest some plausible reforms to the way we nominate candidates and changes to the powers of the Presidency that might help us improve the quality and performance of future presidents Conventional Wisdom and American Elections Jody C Baumgartner,Peter L. Francia,2019-11-12 During every election cycle political observers generate a seemingly limitless supply of theories opinions and predictions Unfortunately many of these assertions oversimplify complex subjects or overhype the latest political fads Inevitably some misinformation becomes part of the conventional wisdom about American elections The objective of Conventional Wisdom and American Elections Exploding Myths Exploring Misconceptions is to bring clarity to several of these subjects For example it is now commonplace for commentators to emphasize the negative tactics and practices of the campaigns of presidential candidates In 2016 some commentators suggested that the presidential campaign was the nastiest ever with the campaigns of President Donald Trump Hillary Clinton and their supporters going to new extremes of negativity However these claims are not new Dating as far back as the presidential election of 1800 critics of Thomas Jefferson stated that his potential victory would bring about legal prostitution and the burning of the Bible In 1824 opponents of Andrew Jackson charged that he was a murderer and that his wife was a bigamist Perhaps most scurrilous of all Jackson s opponents even accused his dead mother of being a prostitute In total Conventional Wisdom and American Elections identifies eleven widely held myths and misconceptions about elections in the United States The conclusions drawn throughout the book are based on the most current political science research In some instances the literature is clear in debunking popular myths about American elections On other issues research findings are more mixed In either case Conventional Wisdom and American Elections clarifies the issues so that readers can discern between those in which scholars have largely resolved and those in which honest debate remains Constitutional Ratification without Reason Jeffrey A. Lenowitz,2022-03-10 This volume focuses on constitutional ratification the procedure in which a draft constitution is submitted by its creators to the people or their representatives in an up or down vote

determining implementation Ratification is increasingly common and routinely recommended by experts Nonetheless it is neither neutral nor inevitable Constitutions can be made without it and when it is used it has significant effects This raises the central question of the book should ratification be recommended Put another way is there a reason for treating the procedure as a default for the constitution making process Surprisingly these questions are rarely asked The procedure's worth is assumed not demonstrated while ratification is generally overlooked in the literature In fact this is the first sustained study of ratification To address these oversights this book defines ratification and its types explains the procedure's effects conceptual origins and history and then concentrates on finding reasons for its use Specifically it builds up and analyzes the three most likely normative justifications These urge the implementation of ratification because the procedure enables the constituent power to make its constitution fosters representation during constitution making or helps create a legitimate constitution Ultimately these justifications are found wanting leading to the conclusion that ratification lacks a convincing context independent justification Thus until new arguments are developed experts should not give recommendations for ratification as a matter of course practitioners should not reach for it uncritically and more generally one should avoid the blanket application of concepts from democratic theory to extraordinary contexts such as constitution making
