Computational Intelligence: A Compendium John Fulcher, 2008-05-28 Computational Intelligence A Compendium presents a well structured overview about this rapidly growing field with contributions from leading experts in Computational Intelligence The main focus of the compendium is on applied methods tried and proven as being effective to realworld problems which is especially useful for practitioners researchers students and also newcomers to the field This state of handbook style book has contributions by leading experts Conceptual Structures for Knowledge Creation and Communication Aldo de Moor, Wilfried Lex, Bernhard Ganter, 2003-09-09 This volume contains the proceedings of ICCS 2003 the 11th International Conference on Conceptual Structures This conference series continues to be the main forum for the presentation and discussion of state of the art research on conceptual structures The theories methodologies and techniques presented here have grown considerably in scope in recent years On the other hand solid bridges spanning the boundaries between such diverse fields as Conceptual Graphs Formal Concept Analysis and others are increasingly being built in our community The theme of this year's conference was Conceptual Structures for Knowledge Creation and Communication In our increasingly interconnected world the potential support of information technology for the creation and communication of quality knowledge is almost boundless However in reality many conceptual barriers prevent the use of this potential The main problem is no longer in the technological infrastructure but in how to navigate use and manage the wealth of available data resources Thus the question is how to create and communicate from data the information and ultimately the knowledge

required by an ever more complex and dynamic society Conceptual structures research focuses on what is behind and between the data glut and the information overload that need to be overcome in answering this question In this way our editor contributes important ideas on how to actually realize some of the many still ambitious visions All regular papers were reviewed in a thorough and open process by at least two reviewers and one editor Charting the Topic Maps Research and Applications Landscape Lutz Maicher, 2006-02-21 This book constitutes the thoroughly refereed post proceedings of the First International Workshop on Topic Map Research and Applications held in October 2005 The 17 revised full papers and five revised short papers presented together with one invited lecture were carefully selected during two rounds of reviewing and improvement from more than 35 submissions One of the goals of the workshop is to survey and structure the field of topic map research and the emerging topic map technologies **Conceptual Graphs and Fuzzy Logic** Tru Hoang Cao, 2010-07-17 In this volume first we formulate a framework of fuzzy types to represent both partial truth and uncertainty about concept and relation types in conceptual graphs Like fuzzy attribute values fuzzy types also form a lattice laying a common ground for lattice based computation of fuzzy granules Second for automated reasoning with fuzzy conceptual graphs we develop foundations of order sorted fuzzy set logic programming extending the theory of annotated logic programs of Kifer and Subrahmanian 1992 Third we show some recent applications of fuzzy conceptual graphs to modelling and computing with generally quantified statements approximate knowledge retrieval and natural language query understanding **AI 2001: Advances in Artificial Intelligence** Mike Brooks, Dan Corbett, Markus Stumptner, 2003-07-31 This book constitutes the refereed proceedings of the 14th Australian Joint Conference on Artificial Intelligence AI 2001 held in Adelaide Australia in December 2001 The 55 revised full papers presented together with one invited contribution were carefully reviewed and selected from a total of 100 submissions The papers cover the whole range of artificial intelligence from theoretical and foundational issues to advanced applications in a variety of fields AI 2001: Advances in Artificial Intelligence Markus Stumptner, 2001-11-28 This book constitutes the refereed proceedings of the 14th Australian Joint Conference on Artificial Intelligence AI 2001 held in Adelaide Australia in December 2001 The 55 revised full papers presented together with one invited contribution were carefully reviewed and selected from a total of 100 submissions The papers cover the whole range of artificial intelligence from theoretical and foundational issues to advanced applications in a variety of fields **AI 2008: Advances in Artificial Intelligence** Wayne Wobcke, 2008-11-13 This book constitutes the refereed proceedings of the 21th Australasian Joint Conference on Artificial Intelligence AI 2008 held in Auckland New Zealand in December 2008 The 42 revised full papers and 21 revised short papers presented together with 1 invited lecture were carefully reviewed and selected from 143 submissions The papers are organized in topical sections on knowledge representation constraints planning grammar and language processing statistical learning machine learning data mining knowledge discovery soft computing vision and image processing and AI applications Conceptual Graphs for Knowledge
