Rebel Wind:

The Secret World of Weather Tristan Gooley, 2023-02-28 Learn to see the forecast in the hidden weather signs all around you from the New York Times bestselling author of How to Read a Tree and The Lost Art of Reading Nature's Signs In The Secret World of Weather bestselling author Tristan Gooley turns his gaze up to the sky bringing his signature brand of close observation and eye opening deduction to the fascinating world of weather Every cloud every change in temperature every raindrop every sunbeam every breeze reveals something about our weather if you know what to look for Before you know it you'll be able to forecast impending storms sunny days and everything in between all without needing to consult your smartphone But The Secret World of Weather goes far beyond mere weather prediction changing the very way we think about weather itself Weather is not something that blankets an area rather it changes constantly as you walk through woods or turn down a street The weather is never identical on two sides of a tree or even beneath it Take for example Gooley's remarkable discovery that breezes accelerate beneath a tree To Gooley this is weather a tiny microclimate that explains why people sit beneath a tree to cool down not only for the shade but subconsciously for cooler breeze And so Gooley shows us not only what the weather will be like five days from now but also what to expect about the weather around every corner By carefully observing the subtle interplay of wind cloud fog temperature rain and many other phenomena we not only form a deeper understanding of weather patterns but also unlock secrets about our environment Weather forms our landscape and landscape forms our weather Everything we see in the sky reflects where we are When we learn to read weather's signs Gooley shows us the weather becomes our map revealing to us how it has made our towns cities woods and hills what they are You'll never see your surroundings the same way again **Rebel Wind** Leanne Grayson, 1993 **Rebel Wind** 27

, 1993-10-01 **Cinephilia and History, or The Wind in the Trees** Christian Keathley, 2005-11-24 Cinephilia and History or The Wind in the Trees is in part a history of cinephilia in part an attempt to recapture the spirit of cinephilia for the discipline of film studies and in part an experiment in cinephilic writing Cinephiles have regularly fetishized contingent marginal details in the motion picture image the gesture of a hand the wind in the trees Christian Keathley demonstrates that the spectatorial tendency that produces such cinematic encounters a viewing practice marked by a drift in visual attention away from the primary visual elements on display in fact has clear links to the origins of film as defined by Andr  Bazin Roland Barthes and others Keathley explores the implications of this ontology and proposes the cinephiliac anecdote as a new type of criticism a method of historical writing that both imitates and extends the experience of these fugitive moments
