Dunn,Howard Hirsch,Norihiko Nakajima,Suresh Sane,IBM Redbooks,2012-08-03 DB2 packages were introduced with DB2 V2.3 in 1993 During the 15 years that have elapsed a lot has changed In particular there is a more widespread use of distributed computing Java™ language new tools and upgrades in the platform software and hardware The best practices back then just might not be optimal today In this IBM Redbooks publication we take a fresh look at bringing packages into the 21st century We begin with an overview of packages and explain the advantages of using packages Because database request module DBRM based plans have been deprecated in DB2.9 you need to convert to packages if you did not use packages already We provide guidance on using a DB2 provided function to convert from DBRM based plans to packages We re examine the application development frameworks for packages program preparation package setup and execution For distributed applications we include a discussion of a utility to identify and remove deprecated private protocol and converting to DRDA as well as an introduction to the new pureQuery function of Data Studio We also discuss common problems and their resolutions We then explore administration and operational activities dealing with packages including security access path management where we discuss the newly introduced package stability feature to allow for a seamless fallback and management and performance aspects The appendixes include useful queries and mention tools for managing packages effectively **Geology and Landscape of Michigan's Pictured Rocks National Lakeshore and Vicinity** William L. Blewett,2012 **Clinical Child Psychiatry** William M. Klyklo,Jerald Kay,2012-03-23 Clinical Child Psychiatry THIRD EDITION Making a psychiatric diagnosis in children can be challenging some clinicians say the incidence of some childhood disorders such as bipolar disorder and ADHD is over diagnosed while others say they are undiagnosed undertreated and are a large burden on society The drug treatment of child psychiatric disorders can also be controversial in children and adolescents This book fulfills the need for an objective clinically relevant source to dispel this confusion Clinical Child Psychiatry is a textbook of current clinical practice in child and adolescent psychiatry It is designed as a reference for clinicians that is both easily usable and authoritative a chairside reference for the consultation room This book addresses a

defined series of clinical entities that represent the bulk of current treatment modalities and disorders encountered in 21st century practice. It is authoritative in the areas addressed while at the same time being rapidly accessible in format. To facilitate access, it presents disorders in declining order of frequency. The authors believe that worthwhile clinical work must be informed by both evidence-based practice and by psychiatry's traditional attention to internal and interpersonal dynamics. They are committed to an approach that is broadly biopsychosocial while based on current clinical evidence for a pragmatic clinical focus. The book is divided into four sections. The first, *Fundamentals of Child and Adolescent Psychiatric Practice*, addresses assessment, treatment modalities, and planning. *Common Child and Adolescent Psychiatric Disorders* and *Developmental Disorders* cover the diagnosis and treatment of the large majority of disease entities encountered in practice. The final section, *Special Problems in Child and Adolescent Psychiatry*, includes a variety of topics such as foster care and adoption, loss and grief, and forensics. New evidence relating to the areas of depression, psychosis, trauma, and new insights from genetics, genomics, and proteomics are cleverly integrated into chapters on the individual disease with focus on their clinical application. A new chapter on consultation and collaboration within systems of care. The book addresses a need for clinicians, many of whom are beginners, non-psychiatrists, or psychiatrists entering unfamiliar territory to come up to speed rapidly in providing more than perfunctory service to needy populations. This challenge grows ever greater. **For Want of**

Defensible Space a Forest is Lost Sarah Mariah McCaffrey, 2002. In the summer of 2000, the western United States was on fire. Wildfires were front-page news for weeks. On the peak activity day, there were 84 large fires, over 28,000 people fighting them, and over 1.6 million acres burning. The severity of wildfire hazard results from a complex mix of demographic change, historical fire management policy, and shifting cultural perceptions of resource management. In recent decades, more and more people have taken up residence in wildland areas. Because years of fire suppression have created forests and shrublands overloaded with fuel, migrants are moving into tinderboxes. Fire-fighting agencies' resources, strained by protecting the growing number of homes, are working to expand their activities beyond putting out fires to minimizing their potential damage. New wildland residents are widely seen as a barrier to these efforts because it is believed that their expectations of fire protection and views of nature conflict with pro-active fire mitigation methods. However, these ideas about wildland residents have never been verified. This study tests the conventional wisdom and identifies factors that foster positive public attitudes towards fire mitigation activities such as creation of defensible space, conducting prescribed burns, and thinning. A mail survey was sent to homeowners in Incline Village, Nevada, a residential wildland-intermix community located in a forest ripe for a conflagration and considered to have a proactive fire management program that works closely with town residents. Results indicate that the public's ability to understand the problem's complex nature and to recognize the need for a significant shift in wildfire management, both at the federal and the individual level, is not as limited as many fire managers think. Results show that providing specific information via one-on-one contact is important in increasing

acceptance of controversial practices Modest risk perception led homeowners to create an evacuation plan while only very high risk perception led them to create defensible space Further indirect experience of a wildfire was found to play a more positive role than direct experience and television as an information source had the opposite of the desired impact Abstract
