Rebuilding Communities in an Age of Individualism Paul Hopper, 2016-10-31 As modern societies become increasingly individualistic this fascinating book examines how we can maintain and revive local communities and community life It demonstrates how the major developments and processes of our time notably globalization post industrialism and de traditionalization contribute to this individualism to the detriment of community life The author examines how community is a necessary and important component of human life and discusses possible ways in which to arrest its decline In this regard strategies geared to fostering trust and social capital are outlined as the basis for reinvigorating community life The volume provides a coherent and distinct analysis of community as well as offering concrete policy prescriptions to counter the excessive individualism of our times In both the nature and scope of its analysis it offers a unique contribution to an extremely important issue in the contemporary period one that increasingly preoccupies politicians academics and ordinary citizens

Rebuilding Community in America Ken Norwood, *Community* Suzanne Keller, 2005-03-06 This book tells the story of how a human community comes to be and how aspirations for the good life confront the dilemmas and detours of real life Suzanne Keller combines penetrating analysis of classic ideas about community with a remarkable and unprecedented thirty year case study of one of the first planned unit developments in America and the first in New Jersey Twin Rivers this pioneering venture featured townhouses and shared spaces for children s play and adult work and play in a society that

stresses individual over collective goals and private over public concerns Hence the timeless questions asked over millennia How does an aggregate of strangers create an identity of place shared goals viable institutions and a spirit of mutuality and reciprocity What obstacles stand in the way and how are these overcome And how does design generate or deter community spirit Inspired by the legacy of Plato Rousseau de Tocqueville and T nnies Keller traces the difficult birth and the rich unfolding of Twin Rivers from a former potato field into a vibrant contemporary community Most community studies remain at a highly descriptive level This book has both broader and deeper aims endeavoring to develop principles of the common life as we enter the age of cyberspace Keller reveals the community of Twin Rivers through a multidimensional social microscope having monitored the community from the day it opened by participant observation attitude surveys the study of collective records and nearly 1 000 in depth interviews with homeowners She offers fascinating insight into how residents maintain privacy relate to neighbors cope with social conflict and develop ideas about the common good She shows that Twin Rivers residents remain hopeful about the possibility of community despite variable success in achieving their desires Indeed she argues that the hard won experience more than the utopian ideal is the true measure of community Keller concludes that despite the homogenizing effects of mass communication and globalization local communities will continue to proliferate in the foreseeable future due to changing lifestyles and the continuing quest for roots This important and engaging book will be appreciated by social scientists architects physical planners developers and lenders and community leaders as well as by the general reader interested in creating a bridge between individualism and community

Renewing Democracy, Rebuilding Communities ,1995 **Rebuilding Community** Joan Smith,2001-10-10 Our poorest urban neighbourhoods experience economic and social difficulties that uniquely affect the lives of those who live there This volume examines the policies and initiatives now underway on both sides of the Atlantic to revitalize those areas With contributors from the US France and the UK the volume explains the nature of specific community building programmes and explores critical issues such as the role of partnerships and the importance of race and gender in urban regeneration

Something Greater Jeanne Choy Tate,2013-05-21 Every day Americans rub shoulders with the cultures of the world on the sidewalks of their cities and increasingly in small towns and rural areas As civil discourse becomes increasingly divisive many long for our nation to better deal with its diversity Yet Americans also wonder how far the nation can stretch to embrace diversity and still maintain an identity Ethnic and faith communities Americans of many varieties share a fear of losing their traditions Will the next generation still honor the values of caring for others and contributing to community life The psychology of individualism that underlies American life is no longer adequate to guide a future filled with diversity America s children may have wings to soar into the future but they lack roots connecting them to a shared heritage Something Greater explores the impact of individualism on American child rearing practices and its inability to deal with diversity while sustaining life together in families and communities By contrasting the intergenerational values of biblical and Chinese communities and current infant

research with her own experiences in San Francisco's Chinatown the author reveals how the living stories of heritage that lie at the heart of human development speak to a deep American hunger for shared values and connectedness in family and community
