Recent Advances in Intelligent Technologies and Information Systems Sugumaran, Vijayan, 2014-10-31 The amount of data used in the business world has been growing at a rapid and exponential rate These large volumes of data have led not only to the rise of big data analytics but to the need for improvements and advancements in the management of it Recent Advances in Intelligent Technologies and Information Systems brings together current practices and innovations in the management and processing of diverse big

data sets through technological integration Focusing on concepts such as semantic technologies open source tools and soft computing this book is an integral reference source for professionals researchers and practitioners interested in the application of technological advancements

Recent Advances in Visual Information Systems SShi-Kuo Chang,Zen Chen,Suh-Yin Lee,2002-02-27 Visualinformationsystemsareinformationsystemsforvisualcomputing Visual computing is computing on visual objects Some visual objects such as images are inherently visual in the sense that their primary representation is the visual representation Somevisualobjectssuchasdatastructuresarederivativelyvisual in the sense that their primary representation is not the visual representation but can be transformed into a visual representation Images and data structures are the two extremes Other visual objects such as maps may fall somewhere in between the two Visual computing often involves the transformation from one type of visual objects into another type of visual objects or into the same type of visual objects to accomplish certain objectives such as information reduction object recognition and so on In visual information systems design it is also important to ask the following question who performs the visual computing The answer to this question determines the approach to visual computing For instance it is possible that primarily the computer performs the visual computing and the human merely observes the results It is also possible that primarily the human performs the visual computing and the computer plays a supporting role Often the human and the computer are both involved as equal partners in visual computing and there are visual interactions Formal or informal visual languages are usually needed to facilitate such visual interactions

Recent Advances in Signals and Systems Omid Ansary,Meng Lin,B. R. Shivakumar,2024-11-19 This book comprises select peer reviewed papers from the International Conference on VLSI Signal Processing Power Electronics IoT Communication and Embedded Systems VSPICE 2023 The book provides insights into various aspects of electronics and communication engineering as a holistic approach The various topics covered in this book include VLSI embedded systems signal processing communication power electronics and the Internet of Things The contents mainly focus on the most recent innovations trends concerns and practical challenges and their solutions This book is useful for academicians professionals and researchers in the area of electronics and communications and electrical engineering

Annual Report of the National Science Foundation National Science Foundation (U.S.), **Advances in Information Systems Development** Gabor Magyar,Gabor Knapp,Gregory Wojtkowski,Jože Zupancic,2007-08-28 This monograph details the proceedings of the 15th International Conference on Information Systems Development ISD is progressing rapidly continually creating new challenges for the professionals involved New concepts approaches and techniques of systems development emerge constantly in this field Progress in ISD comes from research as well as from practice The aim of the Conference was to provide an international forum for the exchange of ideas and experiences between academia and industry and to stimulate the exploration of new solutions

Recent Advances in Digital System Diagnosis and Management of Healthcare Kamran Sartipi,Thierry Edoh,2021-02-03 Technologically supported healthcare management

is beginning to take center stage as advances occur in many aspects of healthcare involving big data artificial intelligence and improved user interfaces This volume provides a perspective on a number of such advances ranging from homecare with remote network support and primary homecare to telemedicine application for pediatric cardiology A special section with chapters on Clinical Decision Support Systems CDSS addresses topics in improved human interfaces intelligent support for better quality home and institutional care effective big data visualization for decision makers and gathering data from multiple sources to support the battle against resistant bacteria
