Memories: Molecules and Circuits B. Bontempi, Alcino J. Silva, 2007-04-24 This volume surveys the recent advances and provides an integrative view of molecular cellular and systems level mechanisms underlying cognitive processes in both animals and humans Current and future avenues are discussed by distinguished scientists They provide an overview of the underlying neurobiology of cognitive processes and focus on clinical and therapeutic aspects surrounding impairments associated with disorders that affect cognition

Memory in the Real World Gillian Cohen, Martin A. Conway, 2007-12-03 This fully revised and updated third edition of the highly acclaimed Memory in the Real World includes recent research in all areas of everyday memory Distinguished researchers have contributed new and updated material in their own areas of expertise The controversy about the value of naturalistic research as opposed to traditional laboratory methods is outlined and the two approaches are seen to have converged and become complementary rather than antagonistic The editors bring together studies on many different topics such as memory for plans and actions for names and faces for routes and maps life experiences and flashbulb memory and eyewitness memory Emphasis is also given to the role of memory in consciousness and metacognition New topics covered in this edition include life span development of memory collaborative remembering déjà vu and memory dysfunction in the real world Memory in the Real World will be of continuing appeal to students and researchers in the area

Behavioral Neuroscience of Learning and Memory Robert E. Clark, Stephen Martin, 2018-03-27 Behavioral Neuroscience of Learning and Memory brings together the opinions and expertise of some of the world's foremost neuroscientists in the field of learning and memory research The volume provides a broad coverage of contemporary research and thinking in this field focusing both on well established topics such as the medial temporal lobe memory system as well as emerging areas of research such as the role of memory in decision making and the mechanisms of perceptual learning Key intersecting themes include the molecular and cellular mechanisms of memory formation the multiplicity of memory systems in the brain and the way in which technological innovation is driving discovery Unusually for a volume of this kind this volume brings together research from both humans and animals often relatively separate areas of discourse to give a more comprehensive and integrated view of the field The book will be of interest to both established researchers who wish to broaden their knowledge of topics outside of their specific areas of expertise and for students who need a resource to help them make sense of the vast scientific literature on this subject

On Collective Memory Maurice Halbwachs, 2020-05-21 How do we use our mental images of the present to reconstruct our past Maurice Halbwachs 1877 1945 addressed this question for the first time in his work on collective memory which established him as a major figure in the history of sociology This volume the first comprehensive English language translation of Halbwach's writings on the social construction of memory fills a major gap in the literature on the sociology of knowledge Halbwachs primary thesis is that human memory can only function within a collective context Collective memory Halbwachs asserts is always selective

various groups of people have different collective memories which in turn give rise to different modes of behavior Halbwachs shows for example how pilgrims to the Holy Land over the centuries evoked very different images of the events of Jesus life how wealthy old families in France have a memory of the past that diverges sharply from that of the nouveaux riches and how working class construction of reality differ from those of their middle class counterparts With a detailed introduction by Lewis A Coser this translation will be an indispensable source for new research in historical sociology and cultural memory Lewis A Coser is Distinguished Professor of Sociology Emeritus at the State University of New York and Adjunct Professor of Sociology at Boston College

Autobiographical Memory Charles P. Thompson,Douglas J. Herrmann,Darryl Bruce,J. Don Read,David G. Payne,2014-10-10 The organization of the first Society for Applied Research in Memory and Cognition SARMAC conference centered around two specifically identifiable research topics autobiographical memory and eyewitness memory These two areas long time staples on the menu of investigators of memory in more natural settings differ on a variety of dimensions perhaps most notably in their specific goals for scientific inquiry and application For many questions about memory and cognition that are of interest to scientific psychology there have been historical as well as rather arbitrary reasons for their assignment to the autobiographical or eyewitness memory fields Perhaps as a result of differing historical orientations the first volume s seven autobiographical memory chapters focus upon the qualities or types of recall from research participants whereas the seven chapters in the eyewitness memory volume generally focus upon the quantity a concern for completeness and accuracy of recall This interest in the ultimate end product and its application within the legal process in general encourages eyewitness memory investigators to modify their testing procedures continually in an attempt to gain even more information from participants about an event Indeed several of the eyewitness memory chapters reflect such attempts Beyond the specific contributions of each chapter to the literature on autobiographical and eyewitness memory the editors hope that the reader will come away with some general observations the autobiographical and eyewitness memory fields are thriving these two fields are likely to remain center stage in the further investigation of memory in natural contexts although the autobiographical and eyewitness memory chapters have been segregated in these two volumes the separation is often more arbitrary than real and connections between the two areas abound the two research traditions are entirely mindful of fundamental laboratory methods research and theory sometimes drawing their research inspirations from that quarter and the two fields though driven largely by everyday memory concerns can contribute to a more basic understanding of memory at both an empirical and a theoretical level

Theoretical Perspectives on Autobiographical Memory M.A. Conway,David C. Rubin,Hans Spinnler,Willem A. Wagenaar,2013-04-17 The meeting Theoretical Perspectives on Autobiographical Memory was held at the Grange Hotel Grange over Sands in the Lake District region of North Western

England July 1991 The workshop was financed by a generous grant from the NATO Scientific Affairs Division under the Advanced Research Workshop programme and without this funding the meeting would not have been possible the organisers and delegates gratefully acknowledge the support of the NATO Advanced Research Workshops programme Thirty five scientists from five different NATO countries attended the workshop and twenty seven delegates presented papers The two aims of the workshop were to bring together in one forum a number of comparatively separate approaches to autobiographical memory and to promote theory in the area generally These aims were fulfilled in the presentations and discussions particularly the final discussion session in which delegates focussed on the central issues of the nature structure and functions of autobiographical memory and how these emerge in different research areas The present volume contains the papers arising from the workshop We thank Mrs Sheila Whalley for secretarial help and Fiona Hirst and Stephen Anderson for practical assistance in coordinating registration for the workshop

The Medical Basis of Psychiatry S. Hossein Fatemi, Paula J. Clayton, 2008-05-15 Psychiatry has emerged as a burgeoning scientific field with major advances in etiology and treatment of several disorders Just as there was excitement in the anatomic advances that took place a hundred years ago when Emil Kraepelin and his collaborators took on the enormous task of classification of psychiatric disorders based on rational scientific thinking new advances in genetics biochemistry neuroanatomy and pharmacotherapy of mental disorders have brought us even closer to a better understanding of complex disorders like schizophrenia bipolar disorder depression and even autism The major goal of the previous edition of this classic book was to update the busy clinician psychiatric resident and medical student with the most up to date information on etiology diagnosis and treatment of psychiatric disorders This goal remains the focus of the third edition of this book In this updated and expanded edition the reader is provided with the most contemporary information and literature supported by a close survey of the field Several new chapters dealing with new concepts in biology and treatment of mental disorders have been added This new edition of this classic title with its focus on biologic and medical aspects of psychiatry will continue to be of significant help to all interested

in the scientific practice of psychiatry **Zen and the Brain** James H. Austin, 1999-06-04 A neuroscientist and Zen practitioner interweaves the latest research on the brain with his personal narrative of Zen Aldous Huxley called humankind's basic trend toward spiritual growth the perennial philosophy In the view of James Austin the trend implies a perennial psychophysiology because awakening or enlightenment occurs only when the human brain undergoes substantial changes What are the peak experiences of enlightenment How could these states profoundly enhance and yet simplify the workings of the brain Zen and the Brain presents the latest evidence In this book Zen Buddhism becomes the opening wedge for an extraordinarily wide ranging exploration of consciousness In order to understand which brain mechanisms produce Zen states one needs some understanding of the anatomy physiology and chemistry of the brain Austin both a neurologist and a Zen practitioner interweaves the most recent brain research with the personal narrative of his Zen experiences The science is both inclusive and rigorous the Zen sections are clear and evocative Along the way Austin examines such topics as similar states in other disciplines and religions sleep and dreams mental illness consciousness altering drugs and the social consequences of the advanced stage of ongoing enlightenment
