## **Recent Advances In Solids Structures :**

**IUTAM Symposium on Recent Advances of Acoustic Waves in Solids** Tsung-Tsong Wu, Chien-Ching Ma, 2010-09-08  
Rapid growth of the mobile communication market has triggered extensive research on the bulk as well as surface acoustic wave devices in the last decade. Quite a few important results on the modeling and simulation of Film Bulk Acoustic Resonator FBAR and Layered SAW devices were reported recently. The other recent advance of acoustic waves in solids is the so called phononic crystals or phononic band gap materials. Analogous to the band gap of light in photonic crystals, acoustic waves in periodic elastic structures also exhibit band gap. Important applications of phononic band gap materials can potentially be found with creating a vibration free environment in microstructures and design of advanced acoustic frequency filter etc. In addition to the wave electronics and phononic crystals to facilitate the emerging needs in the quantitative nondestructive evaluation of materials, waves in anisotropic solids and or electro magneto interaction problems also regained much attention recently. Topics treated include Waves in piezoelectric crystals, Simulation of advanced BAW and SAW devices, Analysis of band gaps in phononic structures, Experimental investigation of phononic structures, Waves in multilayered media, Waves in anisotropic solids and or electro magneto interaction problems. *Current Developments in Solid Mechanics and Their Applications* Holm Altenbach, 2025-07-07 This book is a collection of articles by eminent scientists from different countries who participated in the traditional international conference Topical Problems of Continuum Mechanics held at the Institute of Mechanics of the National Academy of Sciences of Armenia since 2007. The topics of the articles: Coupled Fields in Solids, Composites, Soil Mechanics, Fluid Mechanics, Mechanics of Nano Systems, Structural Mechanics, Biomechanics, Hydraulics and Hydraulic Facilities, Experimental Mechanics. *Recent Advances in Structural Joints and Repairs for Composite Materials* Liyong Tong, C. Soutis, 2013-03-09 Joints in components or structures incur a weight penalty, are a source of failure, cause manufacturing problems and are unfortunately unavoidable in most structures ranging from aircraft and spacecraft to ships and offshore platforms to automobiles, bridges and buildings. An important requirement for the complete design of practical structures is the development of attachment methods and joint designs. *Recent Advances in Structural Joints and Repairs for Composite Materials* provides an up to date account of adhesively bonded and mechanically fastened joints and repairs.
