the sensual and political implications of these repositories demonstrating how they create nations establish ideologies shape international relations and structure communities Cookbook Politics argues that cookbooks highlight aspects of our lives we rarely recognize as political taste production domesticity collectivity and imagination and considers the ways in which cookbooks have or do politics from the most overt to the most subtle Cookbooks turn regional diversity into national unity as Pellegrino Artusi's *Science in the Kitchen and the Art of Eating Well* did for Italy in 1891 Politically affiliated organizations compile and sell cookbooks for example the early United Nations published *The World's Favorite Recipes* From the First Baptist Church of Midland Tennessee's community cookbook to Julia Child's *Mastering the Art of French Cooking* to the Italian Futurists' proto fascist guide to food preparation Ferguson demonstrates how cookbooks mark desires and reveal social commitments your table becomes a representation of who you are Authoritative yet flexible collective yet individualized cooperative yet personal cookbooks invite participation editing and transformation Created to convey flavor and taste across generations communities and nations they enact the continuities and changes of social lives Their functioning in the name of creativity and preparation with readers happily consuming them in similar ways makes cookbooks an exemplary model for democratic politics

Lone Wolf and Autonomous Cell Terrorism Jeffrey Kaplan, Heléne Lööw, Leena Malkki, 2017-10-02 President Obama has declared that the greatest terrorist threat which America faces is attacks by lone wolf terrorists This volume expands the lone wolf rubric to include autonomous cells small groups of terrorists who cooperate but operate independently The challenge presented by lone wolves and autonomous cells unlike the threat emanating from established terrorist groups like Al Qaeda has proven intractable because of the difficulty of gathering intelligence on these actors or effectively countering their actions Lone wolves operate under the radar staging deadly attacks such as that at the Boston Marathon and the 2011 attacks in Norway This volume includes Theory and Policy Studies individual case studies and the technological impacts of chemical biological and nuclear weapons as well as the impact of social media in the process of recruitment and radicalization This book was originally published as a special issue of *Terrorism Political Violence*

Transforming Archaeology Sonya Atalay, Lee Rains Clauss, Randall H McGuire, John R Welch, 2016-07-01 Archaeology for whom The dozen well known contributors to this innovative volume suggest nothing less than a transformation of the discipline into a service oriented community based endeavor They wish to replace the primacy of meeting academic demands with meeting the needs and values of those outside the field who may benefit most from our work They insist that we employ both rigorous scientific methods and an equally rigorous critique of those practices to ensure that our work addresses real world social environmental and political problems A transformed archaeology requires both personal engagement and a new toolkit Thus in addition to the theoretical grounding and case materials from around the world each contributor offers a personal statement of their goals and an outline of collaborative methods that can be adopted by other archaeologists

Old and New Media after Katrina Diane Negra, 2016-02-10 Ten years after Hurricane Katrina this thoughtful collection of essays

reflects on the relationship between the disaster and a range of media forms The assessments here reveal how mainstream and independent media have responded sometimes innovatively sometimes conservatively to the political and social ruptures Katrina has come to represent The contributors explore how Hurricane Katrina is positioned at the intersection of numerous early twenty first century crisis narratives centralizing uncertainties about race class region government and public safety Looking closely at the organization of public memory of Katrina this collection provides a timely and intellectually fruitful assessment of the complex ways in which media forms and national events are hopelessly entangled *Terrorism:*

appeal to anyone interested in political activism and social movements The Wrong Hands Ann Larabee, 2015-06-15 A valuable account The Wrong Hands brilliantly guides us through the challenges to American democracy Howard P Segal Times Higher Education Gun ownership rights are treated as sacred in America but what happens when dissenters moved beyond firearm possession into the realm of high explosives How should the state react Ann Larabee's The Wrong Hands a remarkable history of do it yourself weapons manuals from the late nineteenth century to the recent Boston Marathon bombing traces how efforts to ferret out radicals willing to employ ever more violent methods fueled the growth of the American security state But over time the government's increasingly forceful targeting of violent books and ideas not the weapons themselves threatened to undermine another core American right free expression In the 1886 Haymarket Square bombing a new form of revolutionary violence that had already made its mark in Europe arrived in the United States At the subsequent trial the judge allowed into evidence Johann Most's infamous The Science of Revolutionary Warfare which allegedly served as a cookbook for the accused Most's work was the first of a long line of explosive manuals relied on by radicals By the 1960s small publishers were drawing from publicly available US military sources to produce works that catered to a growing popular interest in DIY weapons making The most famous was The Anarchist Cookbook 1971 which soon achieved legendary status and a lasting presence in the courts Even novels such as William Pierce's The Turner Diaries have served as evidence in prosecutions of right wing radicals More recently websites explaining how to make all manner of weapons including suicide vests have proliferated The state's right to police such information has always hinged on whether the disseminators have legitimate First Amendment rights Larabee ends with an analysis of the 1979 publication of instructions for making a nuclear weapon which raises the ultimate question should a society committed to free speech allow a manual for constructing such a weapon to disseminate freely Both authoritative and eye opening The Wrong Hands will reshape our understanding of the history of radical violence and state repression in America **Anarchist Pedagogies**

Robert H. Haworth, 2012-08-01 Education is a challenging subject for anarchists Many are critical about working within a state run education system that is embedded in hierarchical standardized and authoritarian structures Numerous individuals and collectives envision the creation of counterpublics or alternative educational sites as possible forms of resistance while other anarchists see themselves as saboteurs within the public arena believing that there is a need to contest dominant forms of power and educational practices from multiple fronts Of course if anarchists agree that there are no blueprints for education the question remains in what dynamic and creative ways can we construct nonhierarchical anti authoritarian mutual and voluntary educational spaces Contributors to this edited volume engage readers in important and challenging issues in the area of anarchism and education From Francisco Ferrer's modern schools in Spain and the Work People's College in the United States to contemporary actions in developing free schools in the U K and Canada to direct action education such as learning to work as a street medic in the protests against neoliberalism the contributors illustrate the

importance of developing complex connections between educational theories and collective actions Anarchists activists and critical educators should take these educational experiences seriously as they offer invaluable examples for potential teaching and learning environments outside of authoritarian and capitalist structures Major themes in the volume include learning from historical anarchist experiments in education ways that contemporary anarchists create dynamic and situated learning spaces and finally critically reflecting on theoretical frameworks and educational practices Contributors include David Gabbard Jeffery Shantz Isabelle Fremeaux John Jordan Abraham P DeLeon Elsa Noterman Andre Pusey Matthew Weinstein Alex Khasnabish and many others **Process Cinema** Scott MacKenzie, Janine Marchessault, 2019-07-11

Handmade films stretch back to cinema's beginnings yet until now their rich history has been neglected Process Cinema is the first book to trace the development of handmade and hand processed film in its historical and contemporary contexts and from a global perspective Mapping the genealogy of handmade film and uncovering confluences influences and interstices between various international movements sites and practices Process Cinema positions the resurgence of handmade and process cinema as a counter practice to the rise of digital filmmaking This volume brings together a range of renowned academics and artists to examine contemporary artisanal films DIY labs and filmmakers typically left out of the avant garde canon addressing the convergence between the analog and the digital in contemporary process cinema Contributors investigate the history of process cinema unscripted improvisatory manipulation of the physicality of film with chapters on pioneering filmmakers such as Len Lye and Marie Menken while others discuss an international array of collectives devoted to processing films in artist run labs from South Korea to Finland Australia to Austria and Greenland to Morocco along with historical and contemporary practices in Canada and the United States Addressing the turn to a new sustainable creative ecology that is central to handmade films in the twenty first century and that defines today's reinvigorated film cultures Process Cinema features some of the most beautiful handcrafted films and the most forward thinking filmmakers within a global context Anarchism Today Randall Amster, 2012-03-09 With all of the provocative sometimes highly destructive acts committed in the name of anarchy this enlightening volume invites readers to discover the true meaning of anarchism exploring its vivid history and its resurgent relevance for addressing today's most vexing social problems In Anarchism Today an acclaimed scholar and one of the world's foremost advocates for the anarchistic tradition cuts through common misconceptions and caricatures to explore what is perhaps the most poorly understood of all political theories As author Randall Amster explains rather than being an anti everything rationale for defiance and destruction anarchism is in fact a coherent set of values and practices with a rich history and contemporary relevance Passionate and provocative Amster's book offers readers an expert's perspective on what anarchism really means including its relationship to other political approaches its careful balancing of individual liberty and a functioning society and its controversial image as a wellspring of violence Along the way Amster addresses a number of current issues from the perspective of anarchism including corporate

globalization environmentalism warfare nationalism education technology alternative economics criminal justice and even spirituality He concludes with a frank assessment of anarchism's impact and the role it can play in building a more just peaceful and sustainable world

Books That Cook Jennifer Cognard-Black, Melissa A. Goldthwaite, 2014-08 Whether a five star chef or beginning home cook any gourmand knows that recipes are far more than a set of instructions on how to make a dish They are culture keepers as well as culture makers both recording memories and fostering new ones Organized like a cookbook *Books That Cook: The Making of a Literary Meal* is a collection of American literature written on the theme of food from an invocation to a final toast from starters to desserts All food literatures are indebted to the form and purpose of cookbooks and each section begins with an excerpt from an influential American cookbook progressing chronologically from the late 1700s through the present day including such favorites as *American Cookery* the *Joy of Cooking* and *Mastering the Art of French Cooking* The literary works within each section are an extension of these cookbooks while the cookbook excerpts in turn become pieces of literature forms of storytelling and memory making all their own Each section offers a delectable assortment of poetry prose and essays and the selections all include at least one tempting recipe to entice readers to cook this book Including writing from such notables as Maya Angelou James Beard Alice B. Toklas Sherman Alexie Nora Ephron M.F.K. Fisher and Alice Waters among many others *Books That Cook* reveals the range of ways authors incorporate recipes whether the recipe flavors the story or the story serves to add spice to the recipe *Books That Cook* is a collection to serve students and teachers of food studies as well as any epicure who enjoys a good meal alongside a good book

Critical Theories, Radical Pedagogies, and Social Education, 2010-01-01 A refreshing collection of essays that offers a range of critical and radical voices which are generally marginalized in the critical social studies mainstream This collection is a good read with valuable insights that can impact teaching practice Canadian Social Studies Canada's National Social Studies Journal Volume 45 Issue 1 Award American Educational Studies Association AERA Critics Choice Book Award 2011 This edited collection begins with the assertion that there are emergent and provocative theories and practices that should be part of the discourse on social studies education in the 21st century Anarchist eco activist anti capitalist and other radical perspectives such as disability studies and critical race theory are explored as viable alternatives in responding to current neo conservative and neo liberal educational policies shaping social studies curriculum and teaching Despite the interdisciplinary nature the field and a historical commitment to investigating fundamental social issues such as democracy human rights and social justice social studies theory and practice tends to be steeped in a reproductive framework celebrating and sustaining the status quo encouraging passive acceptance of current social realities and historical constructions rather than a critical examination of alternatives These tendencies have been reinforced by education policies such as No Child Left Behind which have narrowly defined ways of knowing as rooted in empirical science and apolitical forms of comprehension This book comes at a pivotal moment for radical teaching and for critical pedagogy bringing the

radical debate occurring in social sciences and in activist circles where global protests have demonstrated the success that radical actions can have in resisting rigid state hierarchies and oppressive regimes worldwide to social studies education
