

Riding the Whirlwind: Managing Turbulence

Peter Benton and Bruce Lloyd

Bruce Lloyd in discussion with Peter Benton, Director General of the British Institute of Management 1985-1991 and author of Riding the Whirlwind, (Paul Blackwell (1990), 206 pp., £16.95).

Managing Turbulence

BL: Can we start with a summary of the central message of your recent book *Riding the Whirlwind*?

PB: You can see from the subtitle *Managing Turbulence* that this is the subject of the book. How can people manage turbulence successfully; manage the forces that are present in turbulence so that organisations can benefit, rather than get swept away by these apparently unpredictable events? The main title *Riding the Whirlwind* was taken from Addison's poems in praise of Marlborough, written about the battle of Blenheim: 'Calm and serene he drives the furious Main, . . . Rides in the whirlwind, and directs the storm.' The image is of Marlborough, the leader, a calm and serene mind, dispassionately reading the energy, the forces of the battle, shaping those forces towards victory. The theme right through the book is then first that we, in industry, commerce, and indeed in much of our society, are moving from the planned economy 1940s era in which fierce forces cause turbulence. And secondly that the individual can draw immense benefit from the energy unleashed in this process, but only if he or she reads the battle, shaping the forces, instead of opposing or ignoring them.

BL: One of the paradoxes that struck me from reading the book was that the whirlwind and turbulence was such a natural part of life and history, that the key thing was to recognise that it was the natural state of the life in the world as we know it. And the ability of the individual to be comfortable in living with themselves in that natural state is one of the important lessons to be learned from history. The question is how do people learn to do it, or learn to do it better.

PB: You are quite right. Turbulence is a natural state, but there have been quite extended periods of history where turbulence has been very strictly constrained by the structure of society. There are benefits in a historical perspective. If we go back to the Middle Ages we see a period of several hundred years when the structure of society constrained turbulence, initially by deliberate choice, and then by codification of the systems. It is quite understandable. After the Roman Empire broke up, life was hell almost everywhere. There were ferocious barbaric raids in areas that had been peaceful, fertile and civilised, and so any warlord who could provide some local protection soon gathered followers. That warlord system developed into the feudal structure, all growing out of the perfectly natural human desire to minimise destructive and barbaric turbulence. And then 500 years ago the Renaissance was an extraordinarily instructive period. After hundreds of years of unnatural restrictions, there was turbulent and very exciting development in art and other aspects of society.

Since the beginning of the Second World War we have seen a somewhat similar development. In the book I quote from an article by Geoffrey Crowther, a great editor of *The Economist*, that appeared in *Fortune* magazine in 1941:

'The public has not lost the desire of having the public sector controlled and somewhat. It has demanded a greater infusion of funds into a system that was generally very largely one of freedom. It is doing so it has decided, controlled, limited, managed and used the public sector, with the result that the extraordinary opportunities for private individuals have been enormously reduced . . . it is the desire to prevent existing businesses, existing markets, existing employment that leads our industry after another to try to "subsidise" its own sectors of the economy.'

That comment shows how deep is the desire, even in the most freedom-loving and capitalist sections of the world, for stability. And so we have had, for the past 50 years a managed economy—everywhere, we have had it in the U.S., we have had it in Britain, we have had it, in Europe, we have had it in Eastern
