The Ecological Rift John Bellamy Foster, Brett Clark, Richard York, 2011-11-01 Humanity in the twenty first century is facing what might be described as its ultimate environmental catastrophe the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it All ecosystems on the planet are now in decline Enormous rifts have been driven through the delicate fabric of the biosphere The economy and the earth are headed for a fateful collision if we don t alter course In *The Ecological Rift* Capitalism s War on the Earth environmental sociologists John Bellamy Foster Brett Clark and Richard York offer a radical assessment of both the problem and the solution They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society which expands individual riches at the expense of public wealth including the wealth of nature In the process a huge ecological rift is driven

between human beings and nature undermining the conditions of sustainable existence a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion Critically examining the sanguine arguments of mainstream economists and technologists Foster Clark and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy Importantly they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development

The Dispensational-Covenantal Rift R. Todd Mangum,2007-06-01 This groundbreaking study explores how the fight between dispensationalists and covenant theologians started and how a unique dynamic of personalities and sociological factors enflamed it Readers may be surprised to discover that even the terminology of dispensationalists and covenant theologians originated in the 1930s disputes that the majority of the original protagonists on both sides were Presbyterians and that soteriology rather than eschatology was the original bone of contention between them This study examines how two respective strands of fundamentalism came to identify one another as theological rivals as they each vied for position in their recently formed separatist bodies The significance of disagreements over dispensationalism is explored in the founding of the Orthodox Presbyterian and Bible Presbyterian churches And then as the debate traveled southward the response of the PCUS is examined with special attention given to the consummative reports of an ad hoc committee that found dispensationalism to be out of harmony with the Westminster doctrinal standards Significant misunderstandings that impeded fruitful dialogue from the beginning are clarified particularly those that have persisted most stubbornly to the present day Perhaps most surprising of all the reader will discover that nearly all of the original points of debate between dispensationalists and covenant theologians have since been resolved as each side has honed its position in light of pertinent critiques Why has this development gone almost unnoticed This study suggests an answer and proposes that understanding how the feud began may hold the key to rapprochement today

Divergent Continental Margins and Associated Rift Systems of the Atlantic Ocean, Gulf of Mexico and Indian Ocean ,1985

England's Wars of Religion, Revisited Dr Charles W A Prior,Professor Glenn Burgess,2013-06-28 The causes and nature of the civil wars that gripped the British Isles in the mid seventeenth century remain one of the most studied yet least understood historical conundrums Religion politics economics and affairs local national and international all collided to fuel a conflict that has posed difficult questions both for contemporaries and later

historians Were the events of the 1640s and 50s the first stirrings of modern political consciousness or as John Morrill suggested wars of religion This collection revisits the debate with a series of essays which explore the implications of John Morrill s suggestion that the English Civil War should be regarded as a war of religion This process of reflection constitutes the central theme and the collection as a whole seeks to address the shortcomings of what have come to be the dominant interpretations of the civil wars especially those that see them as secular phenomena waged in order to destroy monarchy and religion at a stroke Instead a number of chapters present a portrait of political thought that is defined by a closer integration of secular and religious law and addresses problems arising from the clash of confessional and political loyalties In so doing the volume underlines the extent to which the dispute over the constitution took place within a political culture comprised of many elements of fundamental agreement and this perspective offers a richer and more nuanced readings of some of the period s central figures and draws firmer links between the crisis at the centre and its manifestation in the localities

The British Empire (and Japan) William Bisiker,1909 **Emerging Infectious Diseases** ,2013 *The Rift Between America and Old Europe* Peter Merkl,2005-11-17 This new book explains the recent rift between America and some of her oldest European allies especially with Germany and France Particular attention is devoted to the several competing interpretations of the Euro American rift for example that Europeans were taken aback when American neo conservative leaders scornfully rejected their well meant offers of post 9 11 assistance with expressions of disdain for the allies backward military technology and budgets The Bush administration s rejection of the Kyoto Treaty its environmental stance and its position on international treaties are also examined in detail Merkl s interpretation emphasizes America s neo imperial unilateralist posture and policies as contrasted to the Wilsonian internationalism that created the United Nations and established international rule of law backed up by the Security Council a web of international treaties and international courts including the International Court of Criminal Justice Today s American leaders thus oppose European champions of an American initiated international order while identifying themselves with the imperialist European doctrines and practices of another age

Soviet Union Review ,1925 Interior Rift Basins Susan M. Landon,1994 **The Hollow Crown** Mark Peel,2020-05-18 Award winning cricket writer Mark Peel charts the development of the England captaincy from 1945 to the present with portraits of England s 43 captains Is England s failure to produce sufficient leaders of stature especially in comparison with Australia down to individual deficiencies or the exacting nature of the job

NUREG/CR. U.S. Nuclear Regulatory Commission,1979 **Photography and Environmental Activism** Conohar Scott,2022-05-30 This publication maps out key moments in the history of environmentalist photography while also examining contemporary examples of artistic practice Historically photography has acted as a technology for documenting the industrial transformation of the world around us usually to benefit the interests of capitalist markets An alternative photographic tradition exists however in which the indexical image is used evidentially to protest against incidents of industrial pollution By providing a definition of

environmental activism in photographic praxis and identifying influential practitioners this publication demonstrates that photography plays a vital role in the struggle against environmental despoliation This book will be of interest to scholars in photography art and visual culture environmental humanities and the history of photography

Sedimentation in Continental Rifts Robin W. Renaut, Gail Mowry Ashley, 2002 Sedimentation and Tectonics in Rift Basins Red Sea:- Gulf of Aden B.H. Purser, D.W. Bosence, 2012-12-06 Sedimentation and Tectonics in Rift Basins Red Sea Gulf of Aden presents new case studies and synthesises the results of recent research on the sedimentological evolution of the Red Sea Gulf of Aden rift system This rift basin is generally regarded as the best natural geological laboratory in the world in which to study the processes of rift formation Uplift of the rift margins in an arid climate results in extensive three dimensional exposures of pre and syn rift strata and associated structures These serve as analogues for the understanding and hydrocarbon exploration of deeper buried rift systems on continental margins such as the North Sea and the Atlantic margins The Red Sea Gulf of Aden rift is also exceptional in that its stratigraphy spans all stages from pre rift environments syn rift continental to marine environments through the rift to drift transition to post rift sea floor spreading The work is arranged in eight sections following a review of the sedimentology and stratigraphy of rift basins the magmatism and structural evolution of the Red Sea Gulf of Aden rift is reviewed Subsequently new case studies are presented of the early rifting environment syn rift sedimentation tectonics and diagenesis evaporites and salt tectonics Post rift sediments of the axial trough are then discussed along with studies of reefs coastal zone and shelf sediments and the tectonic geomorphology of the rift margin escarpment This work results from extensive new research in the rift basin largely carried out under collaborative research projects by European and Middle Eastern geologists It will be an invaluable reference work for geoscientists in the hydrocarbon groundwater and mineral extraction industries as well as for researchers in university departments of earth sciences mining and physical geography
