**The RIGHT to BE LAZY and OTHER STUDIES by PAUL LAFARGUE** Paul Lafargue, 2016-12-11 A strange delusion possesses the working classes of the nations where capitalist civilization holds its sway This delusion drags in its train the individual and social woes which for two centuries have tortured sad humanity This delusion is the love of work the furious passion for work pushed even to the exhaustion of the vital force of the individual and his progeny Instead of opposing this mental aberration the priests the economists and the moralists have cast a sacred halo over work Blind and finite men they have wished to be wiser than their God weak and contemptible men they have presumed to rehabilitate what their God had cursed I who do not profess to be a Christian an economist or a moralist I appeal from their judgement to that of their God from the preachings of their religious economics or free thought ethics to the frightful consequences of work in capitalist society In capitalist society work is the cause of all intellectual degeneracy of all organic deformity Compare the thorough bred in Rothschild's stables served by a retinue of bipeds with the heavy brute of the Norman farms which plows the earth carts the manure hauls the crops Look at the noble savage whom the missionaries of trade and the traders of religion have not yet corrupted with Christianity syphilis and the dogma of work and then look at our miserable slaves of machines When in our civilized Europe we would find a trace of the native beauty of man we must go seek it in the nations where economic prejudices have not yet uprooted the hatred of work Spain which alas is degenerating may still boast of possessing fewer factories than we have of prisons and barracks but the artist rejoices in his admiration of the hardy Andalusian brown as his native chestnuts straight and flexible as a steel rod and the heart leaps at hearing the beggar superbly draped in his ragged capa parleying on terms of equality with the duke of Ossuna For the Spaniard in whom the primitive animal has not been atrophied work is the worst sort of slavery The Greeks in their era of greatness had only contempt for work their slaves alone were permitted to labor the free man knew only exercises for the body and mind And so it was in this era that men like Aristotle Phidias Aristophanes moved and breathed among the people it was the time when a handful of heroes at Marathon crushed the hordes of Asia soon to be subdued by Alexander The philosophers of antiquity taught contempt for work that degradation of the free man the poets sang of idleness that gift from the Gods O Melibae Deus nobis haec otia fecit Jesus in his sermon on the Mount preached idleness Consider the lilies of the field how they grow they toil not neither do they spin and yet I say unto you that even Solomon in all his glory was not arrayed like one of these Jehovah the bearded and angry god gave his worshipers the supreme example of ideal laziness after six days of work he rests for all eternity On the other hand what are the races for which work is an organic necessity The Auvergnians the Scotch those Auvergnians of the British Isles the Galicians those Auvergnians of Spain the Pomeranians those Auvergnians of

Germany the Chinese those Auvergnians of Asia In our society which are the classes that love work for work s sake The peasant proprietors the little shop keepers the former bent double over their fields the latter crouched in their shops burrow like the mole in his subterranean passage and never stand up to look at nature leisurely And meanwhile the proletariat the great class embracing all the producers of civilized nations the class which in freeing itself will free humanity from servile toil and will make of the human animal a free being the proletariat betraying its instincts despising its historic mission has let itself be perverted by the dogma of work Rude and terrible has been its punishment

Feuerbach: The roots of the socialist philosophy Friedrich Engels,2021-04-25 In Feuerbach The Roots of the Socialist Philosophy Friedrich Engels presents a profound examination of the philosophical foundations that underpin socialist thought Engaging critically with the works of Ludwig Feuerbach Engels argues that materialist philosophy must replace idealism to effectively address the socio economic injustices of the time The book is characterized by its clear didactic prose blending philosophical discourse with social critique situating itself within the larger context of 19th century European thought where classical philosophy and emerging socialist movements intersected Engels dissects the limitations of previous philosophical systems advocating for a pragmatic understanding of human existence rooted in material conditions and collective struggle Friedrich Engels a close collaborator of Karl Marx is a prominent figure in the development of socialist theory His own experiences as a working class individual in industrial England coupled with his keen understanding of the political landscape of his time informed his critique of capitalism and advocacy for revolutionary change Engels exposure to various philosophical currents further enabled him to elaborate on Feuerbach s ideas framing them within the burgeoning socialist movement Feuerbach The Roots of the Socialist

Philosophy is essential reading for those interested in the evolution of socialist thought and the philosophical debates surrounding it. Engels' insights remain remarkably relevant, encouraging readers to contemplate the socio-economic issues that persist today. This work not only illuminates Engels' intellectual legacy but also serves as a catalyst for critical reflection on the relationship between philosophy, society, and economic systems.

**RIGHT TO BE LAZY AND OTHER STUDIES** PAUL. LAFARGUE, 2018. *New Directions in Theorizing Qualitative Research* Norman K. Denzin, James Salvo, 2020-04-17. What can it mean to resist in these troubled times and how can we do so through theory? This volume presents novel ideas on how to accomplish this in the context of the field of qualitative research. The authors show us how we might go beyond pre-existing systematized research methodologies to find our way. They challenge us to go beyond facile modes of thought and slow down any mechanistic practices of research, a slowing that can be surprisingly generative regarding pedagogy and knowledge production. The articles think through theories such as ones theorizing the postcolonial for the purpose of responding to global hegemony regarding institutional experiences of academe. They engage with practices of new materialism and show the multiform ways in which theory can be a companion to us in our journey of research. Further, the articles question hold-overs from humanist and modernist thought so that we might perform an inclusive pedagogy. Rather than falling into the cynical view that the world is too troubled to change, this volume presents a sound vision that we have no option but to engage in theoretical practice for now there is no time not to think.
