Right To Roam Should We Increase Access To Britains Countryside:

Protecting future generations through commons Saki Bailey, Gilda Farrell, Ugo Mattei, 2014-01-09 The recent austerity measures currently adopted in numerous European countries assume that a rise in public debt should automatically result in cuts to social programmes and the privatisation of inefficiently managed resources This type of reasoning is being used to justify the destruction of social rights of citizens for the profit of the private sector resulting in more limited access to the most fundamental resources such as water nature housing culture knowledge and information mainly for the most vulnerable members of society Such a view informed solely by short term growth and profit cycles is endangering access to those resources not only for current generations but for future ones as well This book is an attempt to go beyond liberal approaches to intergenerational and distributive justice It emphasises the role of commons and communities of the commons driven by the desire to defend and perpetuate those fundamental resources under the threat of expropriation by the state and the market This book also offers policy makers and citizens who wish to accept their political responsibility by being active and refusing corporate ideology some best practices as well as methods and solutions for renewing the configurations of societal relationships through commons thereby integrating the interests of future generations in the European Community's decision making processes and institutions This is a contribution by the Council of Europe and the International University College of Turin to the protection of the dignity of every person especially of those who even though unable to enjoy existing social rights have the right to benefit from choices and policies that ensure that human life remains unspoiled

The Right of Access to Open Countryside Great Britain: National Audit Office, 2006-06-09 Introduced under the Countryside and Rights of Way Act 2000 the new right of access commonly known as the right to roam was phased in between September 2004 and October 2005 giving walkers the right to walk on large areas of the English countryside without having to keep to specified paths 865 000 hectares of land around 6.5 per cent of all land in England is in practice open to the public and of this 733 000 hectares is land to which no right of access previously existed The NAO report finds that the right to roam was successfully introduced by the Countryside Agency in conjunction with Defra two months ahead of target with easy access to over 90 per cent of the sites tested There were initial problems with the countryside access website established to provide public information about the scheme relating to the quality of online maps of access land and to the search function but these had begun to improve by April 2006 The cost of implementing the open access programme was almost double the original estimate largely due to a failure to pilot test the implementation of the scheme and a lack of adequate project management In total the cost of implementation is estimated to be 69 million and ongoing running costs are expected to be around 13 million in 2006/07 Although the benefits of the scheme cannot be easily quantified in financial terms the NAO's initial assessment of the new right of access finds that it passed the key test of whether walkers can use it Recommendations made include that in order to improve public transport facilities to enable people on low incomes and from urban areas to have more opportunities

to use their new right of access the Agency should explore with local councils the cost effectiveness of diverting weekend bus services past open access land

The right of access to open countryside Great Britain: Parliament: House of Commons: Committee of Public Accounts, Edward Leigh, 2007-06-21 The Countryside Rights of Way Act 2000 introduced a public right to walk across designated mountain moor heath downs and registered common land in England DEFRA tasked the Countryside Agency with opening up the new access by the end of 2005 and the target was met with two months to spare However the implementation of the right to roam cost the Countryside Agency 24.6 million more than anticipated with knock on impacts on other programmes This report looks at the implementation of open access and the effect of the policy under the headings encouraging the public to use the right to roam across the countryside protecting the environment of access land and the rights of landowners improving planning and project management However the success of legislation is as yet unknown because there is no information on the extent to which the public are making use of their new right In October 2006 the responsibility for open access passed from the Countryside Agency to Natural England

conservation movement despite enjoying its highest membership ever has achieved only limited success over the last one hundred years of campaigning Can conservationists now shake off their insular disunited and negative image so as to gain the influence that the size of their movement warrants A History of Nature Conservation in Britain traces the rise of the conservation movement from its beginnings in Victorian coffee houses to today's societies with their membership numbering in the millions The first complete history of the British and oldest branch of the movement David Evans's book offers invaluable insights into the campaigns for countryside protection and access from battles against the use of pesticides against pollution and genetic engineering through to legislation for the protection of our wildlife and the freedom to walk the mountains The 2nd Edition has been fully revised and updated Topical issues are considered afresh and new chapters reflect the rapid changes throughout the 1990s both in social attitudes conservation practices legislation funding and within conservation organizations themselves In the light of recent developments Evans also looks at some difficult choices to be made in years ahead and asks how the conservation movement will fare on the new global stage

Democratic Ideals and the Politicization of Nature N. Garside, 2013-07-31. Democratic Ideals and the Politization of Nature introduces the feral citizen as a response to a perceived need to revitalize the disruptive, critical and exploratory nature of democratic culture. By learning from the traditions of aimless walking and by embracing a consciously feral method of political engagement, radically democratic citizens can prompt political moments that create conditions where the primacy of the political can be performed, realized and defended. Ultimately, this book seeks not to solve the problems and paradoxes of democracy but to assist in unleashing and celebrating them. Garside concludes that using the methodology of feral citizenship, inspired by environmentalism and democratic articulation to reprioritize the political within the green public sphere, citizens can reclaim necessary and welcome tensions between representations of nature and political citizenship.
